PROCEEDINGS OF SPIE

Ultrafast Phenomena and Nanophotonics XXIX

Markus Betz Abdulhakem Y. Elezzabi Editors

27–30 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13364

Proceedings of SPIE 0277-786X, V. 13364

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Ultrafast Phenomena and Nanophotonics XXIX, edited by Markus Betz, Abdulhakem Y. Elezzabi, Proc. of SPIE 13364, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510684768 ISBN: 9781510684775 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

ULTRAFAST PHENOMENA IN MONOLAYERS AND 2D MATERIALS I

13364 02 Engineering ultrafast photoconductive response in SnS₂ through metal intercalation [13364-3]

ULTRAFAST LATTICE, COHERENT PHONONS, AND SPIN DYNAMICS

13364 03 Lamb-like waves in GaAs/AIAs multilayer structures [13364-19]

TERAHERTZ SPECTROSCOPY

13364 04 Coherent excitation of chiral phonons using THz light (Invited Paper) [13364-21]

NONLINEAR OPTICS AND STRONG FIELD PHENOMENA

- 13364 05 New insights to the process of resonant high harmonic generation in plasma plume (Invited Paper) [13364-25]
- 13364 06 Electron tunneling driven by bright two-mode squeezed quantum pulses [13364-28]

ULTRAFAST SPECTROSCOPY AND COHERENT DYNAMICS

13364 07 Ultrafast coherent vibrational dynamics of atomic-scale defects in diamond (Invited Paper) [13364-29]

QUANTUM OPTICS: SYSTEMS AND SOURCES

13364 09 Near field investigation of plasmonic vortex lenses [13364-39]

ULTRAFAST PHENOMENA IN MONOLAYERS AND 2D MATERIALS II

13364 0A Exciton and carrier dynamics of binary layered Dion-Jacobson perovskites [13364-47]

COHERENT AND NONLINEAR DYNAMICS OF OPTICAL EXCITATIONS

13364 0B Selective excitation of organic exciton-polaritons in open photonic cavities [13364-51]
13364 0C Identification of origin of superfluorescence from multiexcitons in CuCl quantum dot assembly systems embedded in NaCl single crystals [13364-52]
POSTERS SESSION
13364 0D Laser and pressure-induced phase-change transition in levitating single particle [13364-20]
13364 0E Non-linear optical interaction of ultra-broadband fs-laser pulses with 2D materials [13364-45]
