PROCEEDINGS OF SPIE

Gallium Nitride Materials and Devices XX

Hiroshi Fujioka Hadis Morkoç Ulrich T. Schwarz Editors

27–30 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13366

Proceedings of SPIE 0277-786X, V. 13366

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Gallium Nitride Materials and Devices XX*, edited by Hiroshi Fujioka, Hadis Morkoç, Ulrich T. Schwarz, Proc. of SPIE 13366, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510684805 ISBN: 9781510684812 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

GROWTH

13366 02	Ammonia-MBE growth of ScAIN for high-power/high-frequency electronics (Invited Paper) [13366-2]
13366 03	Growth and applications of AIScN and AIYN grown by MOCVD (Invited Paper) [13366-3]
	CHARACTERIZATION I
13366 04	Structural characterization of scandium aluminum nitride/gallium nitride heterostructures for photonic applications [13366-6]
13366 05	Broadly tunable cubic phase InGaN/GaN quantum wells grown by metal-organic chemical vapor deposition [13366-11]
	NEW DEVICES I
13366 06	III-nitride semiconductors are more flexible than other compound semiconductors for integrated photonics and efficient nonlinear interactions (Invited Paper) [13366-13]
13366 07	Insights from forward bias in GaN quantum well photodetectors [13366-14]
13366 08	Fabrication of GaN-based monolithic integrated LET-PD module for display applications [13366-15]
	NEW DEVICES II
13366 09	Impact of out-of-plane thermal strain on electron charge density in AlGaN/GaN HEMTs

[13366-17]

	LDS I
13366 OA	Extending the emission wavelength of SLEDs to the pure-green spectral region [13366-22]
13366 OB	Advancements in GaN-based horizontal-cavity and surface-emitting superluminescent diodes for next-generation holographic displays [13366-23]
	LDS III
13366 OC	High-power GaN-based edge-emitting laser diodes (Invited Paper) [13366-28]
	VISIBLE LEDS I
13366 OD	Challenges of MOCVD in volume production of MicroLED (Invited Paper) [13366-33]
13366 OE	Heterogeneous integration of 20x10µm blue micro-LEDs/pixels on GaN HEMTs for visible light communication [13366-34]
	UV LEDS I
13366 OF	AlGaN short-period superlattice-based far-UVC LEDs on AlN templates (Invited Paper) [13366-44]
13366 0G	Defects and reliability of UVC-LEDs (Invited Paper) [13366-46]
	UV LEDS II
13366 OH	Spectral study to estimate effects on human skin of irradiation at 226-240nm far UV-C LEDs (Invited Paper) [13366-48]
