Next-Generation Optical Communication: Components, Sub-Systems, and Systems XIV

Guifang Li Kazuhide Nakajima Atul K. Srivastava Editors

28–30 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13374

Proceedings of SPIE 0277-786X, V. 13374

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Next-Generation Optical Communication: Components, Sub-Systems, and Systems XIV, edited by Guifang Li, Kazuhide Nakajima, Atul K. Srivastava, Proc. of SPIE 13374, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510684966 ISBN: 9781510684973 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

EMERGING OPTICAL TRANSMISSION TECHNOLOGY

- 13374 02 Whispering at the shot noise limit: communication using single photons through photonstarved channels (Invited Paper) [13374-1] 13374 03 Long-haul transmission of a 4096-ary optical eigenvalue-modulated signal (Invited Paper) [13374-2] 13374 04 Exploiting the acousto-optic effect for developing secure digital identifiers [13374-3] 13374 05 The quantum age begins: now, 5, 50, or 500 years? An operator perspective on quantum (secure) communication evolution in the next years (Invited Paper) [13374-4] SDM TRANSMISSION 13374 06 Enabling multimode SDM at reduced equalization complexity via optimized elliptical core fibers [13374-6] NETWORK SENSING AND WIDEBAND TRANSMISSION 13374 07 Diverse sensing applications with dual optical frequency comb (Invited Paper) [13374-8] 13374 08 Numerical study of high-speed opto-electronic arbitrary waveform estimator using adaptive filter synthesis [13374-9] 13374 09 Analytical and numerical hybrid capacity estimation method for multi-band elastic optical **networks** [13374-10] AI NATIVE NETWORK AND SILICON PHOTONICS 13374 0A On-chip comb light source integration in silicon photonics (Invited Paper) [13374-15] NOVEL OPTICAL TRANSCEIVERS TECHNOLOGIES
 - 13374 0B Reducing the power consumption of optical interconnects by employing oDAC-based transmitters [13374-17]

- 13374 0C EEPN mitigation by local oscillator phase isolation with dual pilot carriers [13374-18]
- 13374 0D Beyond 100GHz operation of AIN-glass hybrid sub-mount for high-speed EML assembly [13374-19]
- 13374 OE Pluggable and embedded optics: capacity and rate support (Invited Paper) [13374-20]

OPTICAL TECHNOLOGY FOR AI

- 13374 OF High-density high-speed linear I/O for AI clusters (Invited Paper) [13374-22]
- 13374 0G Energy efficient optical interconnects for AI compute (Invited Paper) [13374-23]

NOVEL OPTICAL FIBERS AND SUBSYSTEMS

- 13374 0H Infinitely scalable modular OXC node architecture with sparse and regular intra-node interconnection [13374-25]
- 13374 01 **50Gbit/s transmission at 850nm with a surface-normal electroabsorption modulator** [13374-26]
- 13374 0J The latest fusion splicing technologies supporting innovation of fiber optics (Invited Paper) [13374-27]

NEXT GENERATION OPTICAL TRANSMISSION TECHNIQUES

- 13374 0K Fiber fading-free dual-sideband direct detection OFDM transmission by optoelectronic phase-conjugation processing [13374-29]
- 13374 OL Optical wireless convergence: development and challenges (Invited Paper) [13374-31]

POSTER SESSION

- 13374 0M Enhancing traffic flow with visible light communication: a deep reinforcement learning approach [13374-32]
- 13374 ON **RAMZI-coupled all optical digital to analog converter** [13374-33]
