Photonic and Phononic Properties of Engineered Nanostructures XV

Ali Adibi Shawn-Yu Lin Axel Scherer Editors

27–30 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13377

Proceedings of SPIE 0277-786X, V. 13377

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Photonic and Phononic Properties of Engineered Nanostructures XV, edited by Ali Adibi, Shawn-Yu Lin, Axel Scherer, Proc. of SPIE 13377, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510685024 ISBN: 9781510685031 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

NOVEL DEVICES AND PHENOMENA IN ENGINEERED NANOSTRUCTURES

- 13377 02 Nonreciprocal scintillation using magneto-optical photonic crystals [13377-5]
- 13377 03 Detection of plasmonic circular dichroism on biotemplated gold [13377-57]

PHOTONIC NANOSTRUCTURES FOR IMAGING AND SENSING APPLICATIONS

13377 04 Wide-angle meta-optical projectors (Invited Paper) [13377-8]

PHOTONIC METASURFACES I

- 13377 05 Harnessing dielectric metasurfaces for light-matter interactions in the infrared region [13377-31]
- 13377 06 Can an angular engineered meta-lens break the conservation of etendue? [13377-32]

PHOTONIC METASURFACES II

13377 07 Study of a perfectly absorbing PbSe metasurface for mid-IR photodetection [13377-36]

NOVEL INVERSE DESIGN TECHNIQUES FOR NANOPHOTONIC STRUCTURES

- 13377 08 **Topology optimization of dispersive nanostructures for broadband absorption** [13377-38]
- 13377 09 A flexible framework for large-scale FDTD simulations: open-source inverse design for 3D nanostructures [13377-40]

PHONONIC CRYSTALS AND ACOUSTIC METAMATERIALS I

13377 0A Elliptical optophononic resonators as efficient platforms for the generation and detection of acoustic phonons [13377-48]

13377 OB Observation of merging mechanical bound states in the continuum in phononic crystals [13377-49]

PHONONIC CRYSTALS AND ACOUSTIC METAMATERIALS II

13377 OC Mesoporous-based GHz acoustic resonators with different pore size distributions [13377-52]

TIME CRYSTALS AND RESONANCE EFFECTS IN PHOTONIC NANOSTRUCTURES

- 13377 0D Ultrathin absorber metasurfaces for photothermal conversion using split ring resonator arrays [13377-56]
- 13377 OE Tailoring directional scattering in double Fano resonances based on coupled resonators metasurface [13377-59]

POSTER SESSION

- 13377 OF Design of dielectric-metal-dielectric structures by artificial bee colony algorithm [13377-64]
- 13377 0G Inverse design of robust out-of-plane coupling elements [13377-66]
