**Volume 13383**

Proceedings of SPIE 0277-786X, V. 13383

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Emerging Digital Micromirror Device Based Systems and Applications XVII*, edited by Benjamin L. Lee, Alex Lyubarsky, Proc. of SPIE 13383, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## ADVANCED MANUFACTURING USING A DMD OR OTHER SLM: JOINT SESSION WITH 13381 AND 13383

---

- 13383 02 **High-resolution additive manufacturing for 3D multifunctional microelectronic devices (Best Paper Award)** [13383-2]

---

## PHASE LIGHT MODULATOR

---

- 13383 03 **High-volume production test methodology and parametrics of the Texas Instruments phase light modulator (PLM)** [13383-4]
- 13383 04 **Adaptive optics using Texas Instruments phase light modulator** [13383-5]
- 13383 05 **Simulating the beam steering accuracy and efficiency of a pixelated micromirror phase light modulator (Best Student Paper Award)** [13383-6]

---

## BIOMEDICAL IMAGING AND OTHER ADVANCED APPLICATIONS

---

- 13383 08 **Sustainable, next generation data storage solution leveraging DMD for laser ablation** [13383-17]
- 13383 0A **Reflection-mode optical diffraction tomography at 1.3  $\mu\text{m}$  for deep tissue imaging** [13383-19]
- 13383 06 **Advanced non-quantum ghost imaging for detecting and quantifying surface fluorescence in light-polluted environments** [13383-11]
- 13383 07 **Performance analysis of a Hadamard transform spectral imaging system** [13383-12]
- 13383 09 **A versatile approach to incorporate distorted fringe patterns into fringe projection profilometry** [13383-14]
