PROCEEDINGS OF SPIE

Novel In-Plane Semiconductor Lasers XXIV

Alexey A. Belyanin Peter M. Smowton Editors

27–30 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13385

Proceedings of SPIE 0277-786X, V. 13385

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Novel In-Plane Semiconductor Lasers XXIV*, edited by Alexey A. Belyanin, Peter M. Smowton, Proc. of SPIE 13385, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510685185 ISBN: 9781510685192 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

NITRIDES

13385 02 High-efficiency UV-A lasers using GaN waveguides on native GaN substrates (Invited Paper) [13385-1]

MODE-LOCKING AND FREQUENCY COMBS

- 13385 03 Flexible mode locking in photonic band-gap semiconductor laser (Invited Paper) [13385-4]
- 13385 04 Addressing experimental self-generation of frequency combs in III-V/SiN hybrid integrated tunable lasers [13385-5]
- 13385 05 Experimental validation of two-section ridge and tapered lasers for the design of a monolithically mode-locked 200pJ source at 900nm for two-photon excitation fluorescence lifetime imaging microscopy [13385-6]

NANOWIRES

13385 06 Room temperature lasing from InGaAs quantum well nanowires on silicon-on-insulator substrates [13385-10]

LASERS ON SILICON

13385 07 Direct growth of O-band quantum dot lasers on silicon (Invited Paper) [13385-14]

SCALING LASER WAFER SIZE

13385 08 Electrically injected InGaAs/GaAs nano-ridge laser fully processed in a 300mm CMOS pilot line (Invited Paper) [13385-19]

QCL FREQUENCY COMBS

13385 09 Effective Rabi frequency in quantum cascade lasers and its role in the origin of harmonic frequency combs [13385-24]

	DFB AND DBR
13385 0A	830nm multimode interference coupler-based dual-wavelength master oscillator power amplifier for spectroscopic applications [13385-28]
13385 OB	Carbon monoxide absorption line detection using 2.3-micrometer distributed Bragg reflector laser embedded on control driver with graphical user interface [13385-29]
13385 OC	Quantification of losses in bent waveguide distributed Bragg reflector diode lasers at 785nm [13385-31]
13385 OD	Widely tunable 2.3-µm-wavelength superstructure grating (SSG) DBR laser with InAs/InGaAs multiple quantum wells grown on InP substrate [13385-32]
	MID-IR QCLS AND APPLICATIONS
13385 OE	Ultra-broadband external-cavity quantum cascade laser synchronization for mode-hop free tuning [13385-37]
	QCL MODELING, NEW MATERIALS, AND DESIGNS
13385 OF	Dynamic modeling of quantum cascade lasers based on Maxwell-density matrix approaches (Invited Paper) [13385-41]
	HIGH POWER AND HIGH BRIGHTNESS
13385 0G	Wavelength tunable tapered diode lasers at 1180nm with high spectral radiance (Invited Paper) [13385-45]
13385 OH	Recent advances in visible AlGaInP laser diodes (Invited Paper) [13385-46]
	PCSELS
13385 01	Design study on large-area all-semiconductor PCSELs [13385-51]

MID-IR LASERS AND APPLICATIONS

13385 0J Characterization of degradation and failure in long-wave quantum cascade lasers [13385-52]

|--|

- 13385 OK High-power DBR lasers at elevated operation temperature [13385-56]
- 13385 0L Comprehensive modeling and experimental characterization of III-V AlGaInAs MQW for Fabry-Perot lasers bonded on silicon [13385-57]
- 13385 0M Enhanced high Q-factor single mode for photonic Majorana quantum cascade laser [13385-58]
