

PROCEEDINGS OF SPIE

Light-Emitting Devices, Materials, and Applications XXIX

**Jong Kyu Kim
Michael R. Krames
Martin Strassburg**
Editors

**27–29 January 2025
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 13386

Proceedings of SPIE 0277-786X, V. 13386

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Light-Emitting Devices, Materials, and Applications XXIX*, edited by Jong Kyu Kim, Michael R. Krames, Martin Strassburg, Proc. of SPIE 13386, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

LEDS FOR AR/VR/XR I

- 13386 02 **Techno-economics of axial nanowire light-emitting diodes for augmented reality displays and data communication applications** [13386-3]
- 13386 03 **Developments toward monolithic III-N microLEDs: red InGaN active region and tunnel junctions grown by MOCVD (Invited Paper)** [13386-4]

LEDS FOR AR/VR/XR II

- 13386 04 **MicroLED micro-display technology with μ -PixelLED solution (Invited Paper)** [13386-5]
- 13386 05 **Strategies for improving light extraction in thin film-based InGaN micro-LED arrays for AR displays (Invited Paper)** [13386-8]

LEDS FOR AR/VR/XR III

- 13386 06 **Pyramidal microLEDs delivering RGB in single materials system** [13386-59]

UVC EMITTERS AND APPLICATIONS

- 13386 07 **Far-UVC LEDs fabricated on face-to-face annealed sputter-deposited AlN templates (Invited Paper)** [13386-14]
- 13386 08 **Spectral components, initial improvement, and degradation of 265nm UV-C LEDs** [13386-16]
- 13386 09 **Optical sensing of ammonia performed using a 229nm LED as a far UV-C light source (Invited Paper)** [13386-17]

III-N EFFICIENCY CHALLENGES

- 13386 0A **Defects in InGaN QW structures: microscopic properties and modeling (Invited Paper)** [13386-19]

- 13386 0B **Modeling of III-N heterostructures for GaN light-emitting diodes based on effective bond-orbital model (Invited Paper)** [13386-21]

APPLICATIONS AND MANUFACTURING II

- 13386 0C **Options for cost and performance improvements and integrated emitter design in GaN based electro-optical devices (Invited Paper)** [13386-26]
- 13386 0D **Intelligent traffic management at airport: innovative integration of visible light communication and artificial intelligence** [13386-28]
- 13386 0E **Progress in hybrid integration of light sources and detectors in ceramic packages for ultra-compact sensors** [13386-29]

EMERGING MATERIALS AND DEVICES

- 13386 0F **Impact of defects on the spectral characteristics of PureB avalanche-mode light emitting diodes** [13386-33]

WAVELENGTH CONVERSION

- 13386 0G **Utilizing novel hybrid color conversion thin film for ultra-high resolution and thin micro-LED arrays** [13386-38]
- 13386 0H **Far-red to near-infrared bulk ceramic phosphors pumped by blue lasers for high radiant exitance** [13386-39]

POSTER SESSION

- 13386 0I **Removal of etch damage in GaN mesas for μ LED applications** [13386-43]
- 13386 0J **Demonstration of a novel full structure electrically driven AlGaIn-delta-GaN QW DUV LED** [13386-49]
- 13386 0K **Analysis of extrinsic failure mechanisms of high-power blue, red, and white LEDs for horticulture and street lighting** [13386-52]
- 13386 0L **Numerical optical optimization of a micro-LED package for fluorescence microscopy** [13386-54]
- 13386 0M **Laser-driven phosphor-converted green photonic technology based solid state lighting device for high-brightness illumination** [13386-57]
