

PROCEEDINGS OF SPIE

Emerging Liquid Crystal Technologies XX

**Liang-Chy Chien
Nelson V. Tabiryan
Jun Yamamoto**
Editors

**27–29 January 2025
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 13387

Proceedings of SPIE 0277-786X, V. 13387

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Emerging Liquid Crystal Technologies XX*, edited by Liang-Chy Chien, Nelson V. Tabiryan, Jun Yamamoto, Proc. of SPIE 13387, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

LASING/WAVEGUIDE I

- 13387 02 **Laser induced damage threshold test for dual-domain polymer stabilized liquid crystals with different twist angles** [13387-3]

FLAT OPTICS/BEAM STEERING/TWEEZING

- 13387 03 **Spatial-temporal coherence modulating liquid crystal devices** [13387-7]

AR/VR/LENS

- 13387 04 **FLCoS: a promising path towards small form-factor, high performance color-sequential micro-displays** [13387-8]
- 13387 05 **Enhanced off-axis performance of single-layer tunable LC lenses for near-eye devices** [13387-9]
- 13387 06 **Mapping liquid crystal-alignment layers interaction in LCoS-type and thin cells** [13387-10]

E-SIGNAGES/SMART WINDOWS

- 13387 07 **Color cholesteric LCD: innovations driving ESG goals in display technology (Invited Paper)** [13387-11]
- 13387 08 **Dual-cell liquid crystal window with three substrates and three electrodes (Invited Paper)** [13387-12]

NEW MATERIALS, DEVICES, AND APPLICATIONS

- 13387 09 **Reversible morphological transformation of liquid crystal droplet induced by UV light irradiation (Invited Paper)** [13387-15]
- 13387 0A **Method for rapid foodborne pathogen detection with liquid crystal materials (Invited Paper)** [13387-16]

CHIRAL PHOTONICS

- 13387 0B **Photoaligned 3D liquid crystal arrangements for photonic components (Keynote Paper)** [13387-18]
- 13387 0C **Helielectric polar fluid and its application (Invited Paper)** [13387-19]

SLM/BEAM STEERERS/GRATINGS

- 13387 0D **Liquid crystal cells with nanowall electrodes (Invited Paper)** [13387-25]
- 13387 0E **Large continuous steering angle with millisecond response liquid crystal-based beam steering (Invited Paper)** [13387-26]

POSTER SESSION

- 13387 0F **Tunable diffractor using liquid crystals and carbon black nanoparticles** [13387-30]
- 13387 0G **Demonstrating terahertz induced optical non-linearity in liquid crystal using z-scan method** [13387-31]
- 13387 0H **Dynamic deep-ultraviolet beam pattern structuring in nonlinear third harmonic generation by spatial wavefront modulation of near-infrared driving laser** [13387-33]
- 13387 0I **When liquid crystals encounter structured light** [13387-34]
