

PROCEEDINGS OF SPIE

Practical Holography XXXIX: Displays, Materials, and Applications

**Pierre-Alexandre J. Blanche
Hiroshi Yoshikawa**
Editors

**28–30 January 2025
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 13390

Proceedings of SPIE 0277-786X, V. 13390

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Practical Holography XXXIX: Displays, Materials, and Applications*, edited by Pierre-Alexandre J. Blanche, Hiroshi Yoshikawa, Proc. of SPIE 13390, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

TECHNIQUES AND CONCEPTS IN DISPLAY HOLOGRAPHY I

- 13390 02 **Holographic displays for augmented reality (Invited Paper)** [13390-1]
- 13390 03 **Towards zero-th order free, full field of view, computer generated holography** [13390-2]
- 13390 04 **See through three-dimensional aerial display by HOE, dihedral corner reflector array, and depth fused 3D display** [13390-3]
- 13390 05 **Compressing phase-only holograms via deep phase unwrapping** [13390-4]

TECHNIQUES AND CONCEPTS IN DISPLAY HOLOGRAPHY II

- 13390 06 **Learning plane-to-multipane light propagation improves hologram optimization (Invited Paper)** [13390-5]
- 13390 07 **Wireframe holography: a new method for computer-generated holography** [13390-9]

TECHNIQUES AND CONCEPTS IN DISPLAY HOLOGRAPHY III

- 13390 08 **Isolated measurement of the effect of spherical aberration on photophoretic trap rate with Revibro tunable focus mirror** [13390-10]
- 13390 09 **Enhanced image upsampling with time-multiplexed phase holography using batch gradient descent** [13390-12]
- 13390 0A **INTERFERE: a high-throughput, view-selective codec for holography** [13390-13]

ELECTRO-HOLOGRAPHY: ELECTRONIC GENERATION/DISPLAY OF HOLOGRAPHIC IMAGE INFORMATION

- 13390 0B **Target image phase optimization hologram generation method for phase-only spatial light modulators** [13390-19]
- 13390 0C **Real time generation of full color 32K rainbow hologram with line source approximation** [13390-21]

13390 OD **Reproducing light sheets for continuous-depth holography** [13390-23]

HOES AND DOES UTILIZING MATERIALS PROPERTIES FOR ENHANCED PERFORMANCE

13390 OE **Wavelength multiplexed volume holographic optical couplers to couple red, green, and blue light for solar collection** [13390-24]

13390 OF **A new application example for NIR sensitized Bayfol HX film** [13390-26]

13390 OG **Optimizing multilayered diffractive optical elements for compressive sensing in imaging systems** [13390-27]

HOE APPLIED IN LASER SYSTEMS

13390 OH **Training techniques for robust laser beam shaping with diffractive neural networks** [13390-28]

3D IMAGING FOR APPLICATION IN INDUSTRY, MEDICINE, EDUCATION, ADVERTISING, AND OTHERS

13390 OI **Enhancing 3D displays through student-led research: an update on the Hunt for the Hologram program** [13390-32]

13390 OJ **Quantitative holography for the characterisation of semiconductor amplifiers and lasers** [13390-34]

POSTER SESSION

13390 OK **Optimizing top-hat beam arrays: relative angular adjustment between beam shapes and unit cells in square lattice** [13390-35]

13390 OL **Fast calculation method for curved surface mirror reflections using subdivision in computer-generated hologram** [13390-36]

13390 OM **Display method of real-world data captured by an RGBD camera on a holographic head-mounted display reacting to viewpoint movement** [13390-37]

13390 ON **Denisyuk-type wavefront printer and its computational correction of aberration in optical system** [13390-40]

13390 OO **Experimental investigations on the performance of dynamic binary hologram based trapped bead movement** [13390-41]
