PROCEEDINGS OF SPIE

Quantum Sensing, Imaging, and Precision Metrology III

Selim M. Shahriar Editor

25–31 January 2025 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 13392

Proceedings of SPIE 0277-786X, V. 13392

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Quantum Sensing, Imaging, and Precision Metrology III*, edited by Selim M. Shahriar, Proc. of SPIE 13392, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510685321 ISBN: 9781510685338 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix Conference Committee

ATOM INTERFEROMETRY AND MATTER WAVES I

- 13392 02 Quantum sensing using trapped atom interferometry (Invited Paper) [13392-1]
- 13392 03 Preliminary noise budget of an on-chip cold atom Ramsey interferometer with a state selective spatial splitting [13392-4]

ATOM INTERFEROMETRY AND MATTER WAVES II

- 13392 04 Techniques for sensitive measurements of gravitational acceleration using single state echo atom interferometers (Invited Paper) [13392-6]
- 13392 05 A quantum-classical cold atom system for inertial navigation [13392-7]

ATOM INTERFEROMETRY AND MATTER WAVES III

- 13392 06 Programmable quantum sensing using ultracold atoms in 3D optical lattices (Invited Paper) [13392-145]
- 13392 07 Progress toward a dual-beam 3D-cooled atom interferometer gyroscope (Invited Paper) [13392-13]
- 13392 08 Vector atom accelerometry in an optical lattice (Invited Paper) [13392-14]

MAGNETOMETRY

- 13392 09 Laser threshold magnetometry with a combined laser diode, nitrogen-vacancy center cavity [13392-17]
- 13392 0A A compact vectorized magnetometer for measuring Earth's magnetic field in space (Invited Paper) [13392-19]

SENSING WITH NV-DIAMOND AND OTHER COLOR CENTERS I

13392 OB Rare earth element detection via optically detected magnetic resonance using nitrogen vacancies in nanodiamonds [13392-25]

	ATOM INTERFEROMETRY AND MATTER WAVES IV
13392 OC	Atom interferometric sensing over large baselines [13392-37]
13392 OD	Advancements in generating and manipulating structured neutrons (Invited Paper) [13392-38]
	ATOMIC, OPTICAL, AND NUCLEAR CLOCK II
13392 OE	Micro-integrated laser distribution modules for low-SWaP optical atomic clocks [13392-47]
	INTEGRATED PHOTONICS AND ATOMICS II
13392 OF	Active frequency combs in fast and slow gain media (Invited Paper) [13392-53]
	FREQUENCY COMBS FOR SENSING
13392 OG	Machine learning techniques for frequency comb optimization [13392-57]
	RECENT DEVELOPMENTS IN QUANTUM SENSING I
13392 OH	Integrating NV-center diamonds with hollow whispering gallery resonators for quantum sensing (Invited Paper) [13392-21]
	ATOMIC, OPTICAL, AND NUCLEAR CLOCK III
13392 01	Enhancing optical clocks: strontium lattice clock with a record precision and accuracy (Invited Paper) [13392-65]
13392 OJ	Gallium nitride laser development for optical atomic clock applications [13392-67]
	OPTOMECHANICS AND LEVITATED MECHANICS I
13392 OK	Quantum sensing with optomechanical systems (Invited Paper) [13392-73]

_

-

ENABLING TECHNOLOGY FOR SENSING I

- 13392 OL Photonic integration of GaN laser diodes for quantum sensing and precision metrology [13392-80]
- 13392 0M Teaching single-photon detection metrology with off-the-shelf CMOS SPAD detectors [13392-81]

OPTOMECHANICS AND LEVITATED MECHANICS II

- 13392 0N Towards quantum science and technology with Brillouin-Mandelstam scattering (Invited Paper) [13392-89]
- 13392 00 Nonlinear cavity quantum optomechanics in the unresolved-sideband regime [13392-90]

DARK MATTER AND DARK ENERGY SEARCH

13392 OP The invisible drummer: a search for ultralight dark matter with a membrane [13392-93]

QUANTUM GRAVITY, GW DETECTION, AND FUNDAMENTAL PHYSICS II

13392 0Q Fluctuation-induced decoherence of macroscopic superpositions (Invited Paper) [13392-100]

RECENT DEVELOPMENTS IN QUANTUM SENSING III

- 13392 OR Near-surface quantum sensing [13392-103]
- 13392 0S Intuitive and versatile software for real-world quantum sensors [13392-104]

NONLINEAR OPTICS FOR SENSING APPLICATIONS

13392 OT Investigation of quantum optical phenomena in MXene with fiber Bragg grating technique [13392-108]

QUANTUM IMAGING I

13392 0U Image resolution limit optimization for quantum imaging with undetected light [13392-115]

QUANTUM SENSING WITH ENTANGLED STATES I

13392 0V Long wavelength, small quantum interferometer module: shrinking MIR OCT systems via quantum entanglement [13392-118]

OPTICAL AND SPIN SQUEEZING AND NON-CLASSICAL STATES OF LIGHT II

- 13392 OW A compact and modular source of highly squeezed light [13392-130]
- 13392 0X Creating non-classical states of light through photon arithmetic with single emitters and atomic ensembles (Invited Paper) [13392-133]

QUANTUM IMAGING II

- 13392 OY Quantum-limited imaging of a nanomechanical resonator by spatial mode sorting [13392-135]
- 13392 0Z Atmospheric turbulence in quantum illumination [13392-136]

QUANTUM COMMUNICATION AND QUANTUM NETWORKS I

13392 10 Advancements in deployed quantum communication networks (Invited Paper) [13392-141]

RECENT DEVELOPMENTS IN QUANTUM SENSING IV

- 13392 11 Efficient non-classical light sources based on deterministic photon subtraction [13392-149]
- 13392 12 Advances in intracellular temperature measurements with NV colour centres in diamond (Invited Paper) [13392-28]

RYDBERG SENSORS

- 13392 13 Millimeter wave sensing and imaging using Autler-Townes induced fluorescence in Rydberg vapor [13392-154]
- 13392 14 Rydberg atomic receiver for AM, FM, and phase shift keying data transmission (Invited Paper) [13392-157]
- 13392 15 Multiband RF field reception in Rydberg atoms via dual-band frequency comb spectroscopy (Invited Paper) [13392-159]

VAPOR CELL TECHNOLOGY FOR SENSING APPLICATIONS

- 13392 16 Three-photon Rydberg atom electrometry with enhanced sensitivity (Invited Paper) [13392-162]
- 13392 17 An all-fibered iodine photonic microcell for portable frequency references [13392-164]

RECENT DEVELOPMENTS IN QUANTUM SENSING V

13392 18 An endoscope the thickness of a human hair: using adaptive transmission matrices to create a scanning spot at the output of a multimode fibre (Invited Paper) [13392-168]

RECENT DEVELOPMENTS IN QUANTUM SENSING VI

- 13392 19 Quantum optics with free electrons: from quantum sensing to strong coupling and single-photon nonlinearity (Invited Paper) [13392-172]
- 13392 1A Nonlinear classical and quantum sensing by thermal noise (Invited Paper) [13392-174]

RECENT DEVELOPMENTS IN QUANTUM SENSING VII

13392 1B Efficient MIR sensing with undetected photons: high brightness, miniaturized SPDC module for real world applications [13392-180]

POSTER SESSION

13392 1C Isotopically purified NV diamonds for enhanced quantum sensing [13392-182]
