

PROCEEDINGS OF SPIE

Second International Conference on Optical Communication and Optical Information Processing (OCOIP 2024)

Yang Yue
Editor

20–22 December 2024
Wuhan, China

Organized by
Hefei University of Technology (China)

Co-organized by
Shanghai University (China)
iPatLab (China)

Published by
SPIE

Volume 13548

Proceedings of SPIE 0277-786X, V. 13548

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Second International Conference on Optical Communication and Optical Information Processing (OCOIP 2024)*, edited by Yang Yue, Proc. of SPIE 13548, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

OPTICAL COMMUNICATION

- 13548 02 **Training datasets construction for deep learning based on core-offset model in few-mode fibers** [13548-3]
- 13548 03 **The improved inertial S-subgradient projection algorithm for non-convex split feasibility problems** [13548-4]
- 13548 04 **In-depth development of temperature insensitive refractive index Fabry-Perot optical sensor** [13548-12]
- 13548 05 **Blind identification of channel codes based on neural network in optical fiber communication** [13548-14]
- 13548 06 **A review of applied research on microwave absorption and stealth technology** [13548-15]
- 13548 07 **Cooperative scanning performance analysis in point-to-multipoint laser communication systems** [13548-16]
- 13548 08 **Transformer-based long-distance PDM optical fiber channel modeling method** [13548-17]
- 13548 09 **Intelligent electromagnetic resource allocation for UAV swarms using union equalization algorithms** [13548-20]
- 13548 0A **Investigation on helix side-pumping few-mode coupler with high pump efficiency and excellent modal gain flatness** [13548-21]
- 13548 0B **Design of optical transmission link of C-band program distribution system** [13548-27]

OPTICAL INFORMATION PROCESSING

- 13548 0C **An optimized scheme of computer-generated hologram compression with convolutional neural networks and genetic algorithm** [13548-5]
- 13548 0D **Quantum-weighted autoencoder for compression computer-generated holograms** [13548-6]
- 13548 0E **Quantum confocal imaging based on entangled photons** [13548-11]

- 13548 OF **Reconfigurable optical matrix operations based on GST superlattice microring array** [13548-13]
- 13548 OG **Fast single image dehazing based on improved dark channel prior** [13548-24]
- 13548 OH **Optimization design of aerospace optical module based on ray tracing simulation method** [13548-26]
- 13548 OI **A multimode excitation metasurface for microscale molecular thin film recognition and refractive index sensing** [13548-30]
- 13548 OJ **Identification of hybrid rice varieties of the same series using near-infrared spectrum** [13548-32]

OPTOELECTRONIC DEVICES AND INTEGRATION

- 13548 OK **All-optical tunable integrator based on microring resonator assisted by GST superlattice** [13548-8]
- 13548 OL **Hong-Ou-Mandel interference with absorption and dispersion from rare earth ions** [13548-9]
- 13548 OM **Optical tunable differentiator based on microring resonator assisted by low-loss superlattice phase change material** [13548-10]
- 13548 ON **Fast quasi-adiabatic 3 dB power splitter on thin-film lithium niobate** [13548-18]
- 13548 OO **Thin-film lithium niobate multimode anti-symmetric chirped Bragg grating for dispersion compensation** [13548-19]
- 13548 OP **Compact and broadband TFLN two-mode multiplexer using fast quasi-adiabatic dynamics** [13548-22]
- 13548 OQ **1.6T linear-drive optical engine for Chinese co-packaged optics standard** [13548-23]
- 13548 OR **High-energy all-fiber femtosecond burst laser delivering 158 μ J, 148 fs at 1 kHz repetition rate** [13548-29]
- 13548 OS **Analysis and optimization of optical device packaging stress failure based on low temperature environment** [13548-31]
- 13548 OT **High-performance UV detector based on freestanding AlGaIn film by electrochemical etching technology** [13548-33]
- 13548 OU **1 mJ femtosecond pulsed vortex laser at 1030nm** [13548-34]
