

PROCEEDINGS OF SPIE

Second International Conference on Big Data, Computational Intelligence, and Applications (BDCIA 2024)

Sos Agaian
Editor

15–17 November 2024
Huanggang, China

Organized by
Huanggang Normal University (China)

Published by
SPIE

Volume 13550

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13550

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Second International Conference on Big Data, Computational Intelligence, and Applications (BDCIA 2024)*, edited by Sos Agaian, Proc. of SPIE 13550, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii Conference Committee

Part One

BIG DATA AND DATA ANALYSIS

- 13550 02 **Design and implementation of proxy server for meteorological big data platform Tianqing**
[13550-31]
- 13550 03 **Automatic analysis method of electricity tariff credit risk integrated with external data
labels and knowledge map** [13550-11]
- 13550 04 **Research on intelligent recognition of data assets based on the MKG-JERE algorithm**
[13550-29]
- 13550 05 **Analysis of air conditioning energy saving patterns and operational data augmentation
algorithm based on generative adversarial networks** [13550-170]
- 13550 06 **Parallel solution and optimization of microphysics module in GRAPES physics process**
[13550-58]
- 13550 07 **Trend-aligned feature correlation: holistic feature relevance metric on time series data**
[13550-131]
- 13550 08 **Exploring automatic syntactic translation methods across heterogeneous databases based
on the principle of functional equivalence** [13550-81]
- 13550 09 **Design of highly adaptive data storage system based on optimization algorithm** [13550-67]
- 13550 0A **Intelligent connected vehicle data security based on blockchain combining zero-
knowledge proof and post-quantum cryptography** [13550-3]
- 13550 0B **Highway service area traffic forecasting based on multidomain mixed temporal data
pre-training** [13550-114]
- 13550 0C **Analysis on the distribution of the economy hotel guest flow in Wuhan based on the data of
guest's check-in time** [13550-2]
- 13550 0D **Visual analysis of Liaoning province tourism spots data based on Python in English context**
[13550-117]
- 13550 0E **Application and research of particle swarm optimization algorithm in cloud data backup**
[13550-49]

- 13550 OF **Construction and realization of modern Chinese vocabulary base driven by big data**
[13550-85]
- 13550 OG **Research on financial data trend prediction based on deep learning** [13550-71]
- 13550 OH **Development of a Python-based comprehensive employment data visualization platform**
[13550-12]
- 13550 OI **Artificial intelligence based on big data exploring the application of accounting supervision in colleges and universities** [13550-47]
- 13550 OJ **A high-dimensional robust test for distribution homogeneity under the new measure**
[13550-84]
- 13550 OK **Intelligent evaluation method for carbon reduction pathways in prefabricated buildings based on data analytics and mining** [13550-79]
- 13550 OL **Construction and empirical analysis of data governance system based on knowledge graph** [13550-40]
- 13550 OM **Research on microservice gateway technology based on data processing characteristics of service-oriented architecture design models** [13550-73]
- 13550 ON **Intelligent data transmission system for digital power enterprise architecture: based on deep reinforcement learning** [13550-46]
- 13550 OO **Design of personalized recommendation system based on optimized fuzzy mean algorithm**
[13550-65]
- 13550 OP **Data-mining-based evaluation of English teachers' teaching ability** [13550-54]
- 13550 OQ **Design and implementation of the second classroom transcript social practice course management system based on B/S architecture** [13550-133]
- 13550 OR **Design of a user electricity consumption reminder system and sensitivity analysis of credit ratings based on big data analytics** [13550-118]
- 13550 OS **A data-driven TSK fuzzy system with adaptive rule construction for high-dimensional regression problems** [13550-125]
- 13550 OT **Markov property checking methods for time series data** [13550-126]
- 13550 OU **Intelligent scheduling and resource prediction framework for multidimensional data streams in cloud computing environments** [13550-175]
- 13550 OV **Research on multidimensional data stream cloud platform resource scheduling and management based on deep neural networks** [13550-174]
- 13550 OW **Big data mining algorithm for malicious behavior feature extraction and application in network security** [13550-173]

OPTICS AND OPTICAL APPLICATIONS

- 13550 0X **Design of angle correction algorithm for robot chip assembly based on optical vision inspection and analysis** [13550-119]
- 13550 0Y **Research on image optimization of graphic design based on 3D laser vision technology** [13550-7]
- 13550 0Z **Finite-time adaptive command filtering control for manipulators based on disturbance observer** [13550-27]
- 13550 10 **Design of reservoir environmental monitoring system based on IoT technology** [13550-104]
- 13550 11 **Remote sensing image super-resolution reconstruction algorithm based on improved anchored neighborhood regression** [13550-66]
- 13550 12 **Multimodal sentiment analysis and fusion based on deep learning** [13550-77]
- 13550 13 **Trend prediction of traffic flow survey data in intelligent service areas based on GPBO-LightGBM** [13550-39]
- 13550 14 **Multi-image partition steganography method based on phase multiplexing technology** [13550-87]
- 13550 15 **Analysis and design of pervasive computing intelligent surveillance system integrating optical sensors and behavioral analysis for industrial internet** [13550-78]
- 13550 16 **The interactive impact and integration of AI, big data, and cloud computing combined with photonics technology** [13550-134]
- 13550 17 **On development of a pervasive computing aided assistive systems for the elderly in Internet of Things** [13550-76]
- 13550 18 **Recognition and localization of human hand acupoints based on HrNet** [13550-19]
- 13550 19 **The application of GIS technology in accident prevention and management in intelligent traffic management systems** [13550-106]
- 13550 1A **Spatial analysis application research of 3D geological point cloud data** [13550-144]
- 13550 1B **Design of optical image segmentation system based on K-means clustering algorithm in smart ranch** [13550-140]
- 13550 1C **Research on replenishment and pricing strategy for vegetable commodities based on gray prediction and planning model** [13550-105]
- 13550 1D **Study on automatic segmentation and classification of remote sensing images of photovoltaic power plants based on data preprocessing** [13550-95]

- 13550 1E **People flow image optimization and extraction analysis for tourism** [13550-48]
- 13550 1F **Research on transition colour processing algorithm for colour 3D printing based on particle swarm optimization algorithm** [13550-146]
- 13550 1G **Distributed photovoltaic fault feature detection and adaptive reclosing analysis based on wavelet transform and support vector machines** [13550-115]
- 13550 1H **Exploration of face recognition technology based on the improved LeNet-5 neural network** [13550-86]
- 13550 1I **C3Ghost and C3k2: performance study of feature extraction module for small target detection in YOLOv11 remote sensing images** [13550-139]
- 13550 1J **Design and control of fully automated material handling and assembly system for block drawing assembly machine** [13550-113]
- 13550 1K **U-Net-based model with integrated SE module and asymmetric convolution for vessel segmentation** [13550-152]
- 13550 1L **Research on depth estimation and human body reconstruction effects in single-image scene reconstruction** [13550-120]
- 13550 1M **The fusion application of intelligent perception and data analysis in product design innovation** [13550-148]
- 13550 1N **Improved GoogLeNet based on CBAM module for fundus disease classification network** [13550-150]
- 13550 1O **Acoustic wave communication system based on single-chip microcomputer** [13550-155]
- 13550 1P **Optimization technology of ship real-time automation control system based on edge computing** [13550-172]
- 13550 1Q **Research on intelligent control system of temperature in highland daylight greenhouse based on CFD technology** [13550-177]
- 13550 1R **Crop disease identification by integrating Internet of Things and stacking algorithm** [13550-50]
- 13550 1S **Research on target detection of UAV captured images and videos based on deep learning** [13550-26]
- 13550 1T **Optimization techniques for real-time optical image processing using edge computing** [13550-122]

AI AND COMPUTATIONAL INTELLIGENCE

- 13550 1U **UAV trajectory planning method based on improved Grey Wolf algorithm and its improvement research** [13550-57]
- 13550 1V **A comparative study of machine learning in diabetes classification: decision trees, logistic regression, and SVM** [13550-101]
- 13550 1W **Fast parallel implementation of AES based on CUDA and fixed slicing technology** [13550-124]
- 13550 1X **A joint event extraction model for psychological evolution process analysis of telecommunication network fraud victims** [13550-53]
- 13550 1Y **Spatial transformation based on integrated artificial intelligence system: a case study of an ancient village in Jiangxi Province** [13550-62]
- 13550 1Z **Risk prediction of stroke patients based on deep neural networks and CatBoost** [13550-14]
- 13550 20 **Design and implementation of a smart farming system for Jidong County based on the Django framework** [13550-9]
- 13550 21 **Design of a university English teaching system based on artificial intelligence technology** [13550-45]
- 13550 22 **Malicious domain name detection based on deep learning and software-defined networks** [13550-121]
- 13550 23 **Generation of text summaries based on preprocessing pointer networks** [13550-82]
- 13550 24 **Design and simulation of intelligent control systems for grid-side and user-side in power IoT based on bionic algorithms and neural networks** [13550-25]
- 13550 25 **An enhanced LSTM method for financial market forecasting** [13550-34]
- 13550 26 **A guiding bidirectional rapidly exploring random-tree*-based trajectory planning method for tobacco picking robot** [13550-24]
- 13550 27 **PDR: a language model for predicting protein-DNA binding sites** [13550-18]

Part Two

- 13550 28 **Design and optimization of dynamic customized bus system based on particle swarm algorithm** [13550-69]
- 13550 29 **Evaluation of jet energy determination in heavy-ion collisions using machine learning** [13550-43]

- 13550 2A **2D cluster finding with the help of enhanced deep residual networks** [13550-63]
- 13550 2B **A hybrid GRU-CRF framework for enhancing English tokenization efficiency and accuracy** [13550-41]
- 13550 2C **Construction and optimization of enterprise ESG performance evaluation model based on support vector machine** [13550-8]
- 13550 2D **Intelligent algorithm for evaluating tobacco planting environment** [13550-89]
- 13550 2E **Object-centered heuristic A* conformance checking method** [13550-88]
- 13550 2F **Research on automatic extraction technology of key information for grid equipment fault analysis reports** [13550-52]
- 13550 2G **Research on GSEm-Net detection method of embroidery pattern lightweight operator for digital protection of Gansu intangible cultural heritage long embroidery** [13550-70]
- 13550 2H **Leveraging feature engineering in AI-generated content for enhanced virtual learning experiences** [13550-28]
- 13550 2I **Research on agricultural planting optimization model based on Harris Hawk Optimization algorithm** [13550-68]
- 13550 2J **Defect detection of fasteners in transmission lines based on Real-ESRGAN and improved YOLOv11n** [13550-149]
- 13550 2K **Research and implementation of an adaptive learning system based on knowledge graphs: a deep-learning-driven personalized recommendation model** [13550-51]
- 13550 2L **Personalized learning pathways with generative adversarial networks in intelligent education management** [13550-142]
- 13550 2M **GAN-INN-Steg: a simple and accurate method for image steganography** [13550-5]
- 13550 2N **Research on economic system modeling based on artificial intelligence algorithms** [13550-38]
- 13550 2O **Graph convolution recommendation system based on knowledge graph** [13550-6]
- 13550 2P **A lightweight small-defect detection algorithm for cold-rolled strip surfaces with high precision and efficiency** [13550-135]
- 13550 2Q **Design and implementation of visual analysis system based on network retail** [13550-35]
- 13550 2R **Study on learning path optimization based on reinforcement learning and collaborative filtering** [13550-141]

- 13550 2S **Research on the application of neural networks for detecting financial reporting fraud**
[13550-13]
- 13550 2T **Design of optimization model for tourism programme based on user profiling and factorization machine** [13550-21]
- 13550 2U **Extreme gradient boosting algorithm in employment prediction of college graduates**
[13550-42]
- 13550 2V **Research on basketball goal recognition and sports analysis based on improved Yolo V7 detection algorithm** [13550-100]
- 13550 2W **Application of improved random forest algorithm to enterprise architecture performance evaluation** [13550-80]
- 13550 2X **Prediction method of rational utilization rate of new energy based on backpropagation neural networks and long-range energy alternatives planning system model** [13550-64]
- 13550 2Y **Research on false news detection based on BERT model and attention mechanism**
[13550-96]
- 13550 2Z **Cross border e-commerce product recommendation technology based on quantitative feature analysis and mean clustering algorithm** [13550-44]
- 13550 30 **Investigation into art education course suggestion algorithms using a lightweight gradient boosting machine and deep belief network** [13550-72]
- 13550 31 **Financial risk fraud detection method based on improved FedAvg algorithm** [13550-32]
- 13550 32 **Construction of German machine translation model combining long short-term memory and multi-subspace attention mechanism** [13550-74]
- 13550 33 **Prediction method for foreign language teaching achievement utilizing an enhanced BP neural network** [13550-22]
- 13550 34 **Cross-border e-commerce product search technology based on self attention mechanism neural network model** [13550-92]
- 13550 35 **Research on the development and application of an interactive AI-based power supply system** [13550-75]
- 13550 36 **Research on differentiated service methods for electric power customers based on automation technology** [13550-56]
- 13550 37 **Identification method of wireless communication suppression interference signal**
[13550-123]
- 13550 38 **Research on wind power output prediction based on ASD-LSTM** [13550-59]
- 13550 39 **An improved secretary bird optimization algorithm with hybrid improvement strategies**
[13550-55]

- 13550 3A **Research on digital media art creation based on vision and generation algorithm**
[13550-99]
- 13550 3B **Personalized tutoring and optimization system for knowledge points of higher vocational computer courses based on machine learning** [13550-136]
- 13550 3C **Personalized learning pathway design and course recommendation based on K-means, Apriori, and genetic algorithm** [13550-61]
- 13550 3D **Attribute reduction based on weighted average attribute importance** [13550-97]
- 13550 3E **Research on rural tourism flow density based on SVR-PSO algorithm** [13550-94]
- 13550 3F **Dynamic decision-making algorithm for remote fee control based on reinforcement learning and game theory** [13550-91]
- 13550 3G **Dynamic credit rating evaluation algorithm for customers using reinforcement learning and multi-feature weight analysis** [13550-116]
- 13550 3H **Analysis of Aeolian vibration failure mechanisms in transmission line fittings using machine learning algorithms** [13550-98]
- 13550 3I **Application of intelligent spectrum analysis and deep learning in fault detection of transmission line fittings under micro-wind-induced vibrations** [13550-109]
- 13550 3J **Research on style transfer and automation in visual communication design based on deep learning** [13550-110]
- 13550 3K **Research on automatic generation and style transfer of IP imagery based on deep learning**
[13550-111]
- 13550 3L **Attention-mechanism-based model for microdefect detection on cigarette packages with performance optimization** [13550-93]
- 13550 3M **Design of college English oral training system based on collaborative filtering algorithm**
[13550-102]
- 13550 3N **Comparative analysis of high-frequency algorithms and low-frequency algorithms in quantitative trading** [13550-103]
- 13550 3O **Stock price prediction research in steel and food industries using random forest algorithm**
[13550-138]
- 13550 3P **Research on stock prediction of the automobile manufacturing industry and agricultural product processing industry based on the decision tree optimization algorithm** [13550-108]
- 13550 3Q **Predicting financial and manufacturing stocks in China's stock market with random forest**
[13550-107]

- 13550 3R **Study on prediction of soil corrosion in power grounding based on artificial neural network** [13550-143]
- 13550 3S **Analyzing tennis match momentum through machine learning techniques and the TOPSIS model** [13550-128]
- 13550 3T **Design and implementation of an autonomous driving vehicle control system based on PID adjustment** [13550-129]
- 13550 3U **Full-text retrieval mechanism based on count bloom filter and inverted table** [13550-83]
- 13550 3V **Enhancing human-AI collaboration in game testing: the application of AI in identifying game defects** [13550-127]
- 13550 3W **Multibranch sequential model based on diffusion model for automatic sleep staging** [13550-145]
- 13550 3X **Research on efficiency evaluation of financial management in universities based on GWO-BPNN algorithm** [13550-169]
- 13550 3Y **Research on enhanced calibration of biological models using hybrid particle swarm optimization and gradient descent method** [13550-158]
- 13550 3Z **Music recommendation methods using the MR-CTCFI algorithm** [13550-156]
- 13550 40 **Adaptive English vocabulary recommendation systems: a computational intelligence approach using deep reinforcement learning** [13550-137]
- 13550 41 **Research on evaluating English teaching quality using the PSO-BP algorithm** [13550-159]
- 13550 42 **Adaptive reinforcement learning for automated corporate financial decision making** [13550-147]
- 13550 43 **The key management of wireless sensors based on wireless communication** [13550-151]
- 13550 44 **The application of computational intelligence technology in educational evaluation system** [13550-153]
- 13550 45 **Design and implementation of digital twin PaaS platform based on industrial internet** [13550-164]
- 13550 46 **Research on distribution network reconstruction technology considering the time variability of distributed power sources** [13550-130]
- 13550 47 **Research on rapid classification of artistic paintings based on an improved LSTM algorithm** [13550-166]
- 13550 48 **Clustering analysis of Russian satirical literary texts based on an improved K-means algorithm** [13550-167]

- 13550 49 **Research on computer recognition of sentiment expression in Russian satirical literature based on an improved transformers algorithm** [13550-162]
- 13550 4A **A deep federated learning approach for cross-regional railway image analysis** [13550-154]
- 13550 4B **Diverse image inpainting by optimal transport** [13550-160]
- 13550 4C **Computer network information security monitoring system** [13550-161]
- 13550 4D **The impact of sustainable management systems on the sustainable development of water resources in agriculture and the reduction of agricultural carbon footprint** [13550-157]
- 13550 4E **Performance comparison and application of deep-learning-based image recognition models** [13550-165]
- 13550 4F **Exploring the use of genetic algorithms to improve thesis topic selection** [13550-163]
- 13550 4G **Research on human pose and action detection algorithm based on YOLOv8** [13550-168]
- 13550 4H **Next timestamp prediction in business process monitoring using large language models** [13550-179]
- 13550 4I **Improvement of deep learning for traffic flow prediction in intelligent transportation** [13550-171]
