## Fifth International Conference on Physics and Engineering Mathematics (ICPEM 2024)

Alam Md. Mahbub Editor

18–20 October 2024 Wuhan, China

Organized by Hubei Zhongke Institute of Geology and Environment Technology (China)

Sponsored by American Society for Science and Technology (United States)

Published by SPIE

Volume 13554

Proceedings of SPIE 0277-786X, V. 13554

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in *Fifth International Conference on Physics and Engineering Mathematics (ICPEM 2024)*, edited by Alam Md. Mahbub, Proc. of SPIE 13554, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X ISSN: 1996-756X (electronic)

ISBN: 9781510689152 ISBN: 9781510689169 (electronic)

Published by **SPIE** P.O. Box 10, Bellingham, Washington 98227-0010 USA Telephone +1 360 676 3290 (Pacific Time) SPIE.org Copyright © 2025 Society of Photo-Optical Instrumentation Engineers (SPIE).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.

• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## Contents

v Conference Committee

## FIFTH INTERNATIONAL CONFERENCE ON PHYSICS AND ENGINEERING MATHEMATICS

13554 02 Few-shot relation extraction method based on self-supervised learning prototypical **networks** [13554-11] 13554 03 Multi-dimension distribution network planning evaluation and investment strategy based on fuzzy cognitive map [13554-12] 13554 04 Underwater distorted image restoration based on Fourier wave compression sensing [13554-2] 13554 05 Study on quantum phase transition in a 3-leg ladder model based on tensor network algorithm [13554-14] 13554 06 Integrating physics models and machine learning for the soccer shot prediction: a trajectory analysis approach [13554-5] 13554 07 A time-interleaved sampling calibration algorithm adapted to temperature changes [13554-17] 13554 08 Does the thermodynamic arrow reverse?—total entropy changes in cosmic space to be zero: infinite thermodynamic cycles [13554-7] 13554 09 Analyzing and researching student score based on big data [13554-10] 13554 0A Safety assessment model for transmission tower structures based on multi-source information fusion method [13554-6] 13554 OB Steinmetz-equation of magnetic core materials [13554-9] 13554 OC A short-term wind power forecasting method based on sequence decomposition and high-dimensional feature aggregation [13554-15] 13554 0D The atomic structure and law as the scientific foundation of traditional Chinese medicine [13554-4] 13554 OE Reduction of power of Sine and Cosine function with n=3 to its simplest form using Half angle identities as initial step [13554-18] 13554 OF Study on the measurement method of building cluster regulation and control potential using air conditioning as an example [13554-1]

- 13554 0G UAV countermeasures: status quo, breakthroughs, challenges, and future prospects [13554-3]
- 13554 0H Stopping power for nitrogen ion in plasma with laser by machine learning [13554-13]
