**Volume 13557**

Proceedings of SPIE 0277-786X, V. 13557

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Eighth International Conference on Computer Graphics and Virtuality (ICCGV 2025)*, edited by Haiquan Zhao, Proc. of SPIE 13557, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## IMAGE ANALYSIS AND RECONSTRUCTION

---

- 13557 02 **LLM Gesticulator: leveraging large language models for scalable and controllable co-speech gesture synthesis** [13557-8]
- 13557 03 **3D Gaussian object segmentation via COLMAP point cloud classification** [13557-14]
- 13557 04 **Optimizing porosity calculations in breakwater construction simulations: a comparative analysis between grid-based and octree-based methods for efficient computational performance** [13557-3]
- 13557 05 **Stable and performance-enhanced rectangling for image stitching using diffusion models** [13557-11]
- 13557 06 **DDP-Gaussian: dense depth priors guide Gaussians optimization** [13557-18]
- 13557 07 **Research on pupil segmentation network based on improved TransUNet** [13557-12]
- 13557 08 **Efficient 3DGS object segmentation via COLMAP point cloud** [13557-15]

---

## INTELLIGENT IMAGE DETECTION MODEL AND APPLICATION

---

- 13557 09 **A survey of hand pose estimation and hand datasets** [13557-20]
- 13557 0A **YOLO-Handwritten: improved YOLOv8 for handwritten text detection in examination papers** [13557-24]
- 13557 0B **Camouflaged object detection based on multi-scale fusion network with fuzzy region enlargement and shrinking** [13557-21]
- 13557 0C **Cropping-classification-based semi-supervised learning for object detection** [13557-28]
- 13557 0D **An efficient auxiliary system for mechanical maintenance based on 3D object tracking** [13557-4]

---

#### VIRTUAL REALITY AND APPLICATIONS

---

- 13557 OE **Analysis of tools to support the design review process in virtual reality** [13557-25]
- 13557 OF **Advancing the facilitation of social interaction and community engagement among American football enthusiasts through immersive metaverse platform** [13557-26]
- 13557 OG **Fusing multi-scale attention mechanisms with diffusion models for virtual try-on** [13557-7]
- 13557 OH **Research on equipment visualization maintenance training system based on virtual reality technology** [13557-30]

---

#### COMPUTER VISION AND MULTIMEDIA PROCESSING TECHNOLOGY

---

- 13557 OI **Accurate stereo visual-inertial SLAM with rapid initialization and map point sparsification** [13557-16]
- 13557 OJ **Generating multiview-consistent images from a single-view image based on latent diffusion model** [13557-5]
- 13557 OK **A novel automatic target reporting method with STC-YOLO for videos** [13557-9]
- 13557 OL **GGX-GAN: a generative adversarial network for single-image material appearance editing with physical parameters** [13557-13]
- 13557 OM **Extracting palmprint ROI from videos with complex backgrounds based on hand pose estimation** [13557-23]
- 13557 ON **A translucency image editing method based on StyleGAN** [13557-19]
- 13557 OO **AC-LoRA: auto component LoRA for personalized artistic style image generation** [13557-2]
- 13557 OP **A comprehensive Gaussian splatting evaluation system: from geometric consistency to novel view synthesis** [13557-17]
- 13557 OQ **Enhancing image consistency through zone-restricted self-attention for advanced generation and editing** [13557-27]
