

PROCEEDINGS OF SPIE

# ***Sixteenth International Conference on Signal Processing Systems (ICSPS 2024)***

**Robert Minasian  
Li Chai**  
*Editors*

**15–17 November 2024  
Kunming, China**

*Organized by*  
Kunming University of Science and Technology (China)

*Co-organized by*  
Jiangsu University of Science and Technology (China)  
Southwest Jiaotong University (China)  
National Key Laboratory on Blind Signal Processing at the University of Electronic Science and  
Technology of China (China)

*Assisted by*  
The Signal Processing Branch of the Chinese Institute of Electronics (China)

*Published by*  
SPIE

**Volume 13559**

**Part One A**

Proceedings of SPIE 0277-786X, V. 13559

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sixteenth International Conference on Signal Processing Systems (ICSPS 2024)*, edited by Robert Minasian, Li Chai, Proc. of SPIE 13559, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

I vii Conference Committee

## Part One

### SIGNAL ACQUISITION AND DETECTION

---

- 13559 02 **Analysis of boundary performance in feature time series detection in marine environments**  
[13559-177]
- 13559 03 **Bayesian detection for maritime radar targets in CG-LN sea clutter without training data**  
[13559-61]
- 13559 04 **A modified PHD filter for extended targets tracking with unknown detection probability**  
[13559-59]
- 13559 05 **Automatic detection method for water entry sounds in strong ocean noise backgrounds**  
[13559-213]
- 13559 06 **A non-contact vital signs detection method with 77-GHz mmWave FMCW radar** [13559-202]
- 13559 07 **Machine learning for signal processing: kernel-extreme learning machines with  
augmented complex-valued and mixture correntropy techniques** [13559-44]
- 13559 08 **Endpoint detection of marine biological acoustic signals based on wavelet coefficient  
correlation function thresholding** [13559-72]
- 13559 09 **A modulated envelope feature detection method for clutter suppression** [13559-78]
- 13559 0A **Variational modal decomposition based on whale optimization algorithm for vital signs  
detection of FMCW radar** [13559-26]
- 13559 0B **Sea surface small target detection using tri-median normalized Doppler spectrum feature**  
[13559-118]
- 13559 0C **A physical cluster-based passive scatterer detection method in ISAC systems** [13559-234]
- 13559 0D **On detection of moving weak targets using MIMO continuous active sonar and Doppler  
filtering** [13559-210]
- 13559 0E **Design of optical testing turntable data acquisition system based on LabVIEW** [13559-15]

---

## SIGNAL SOURCE DETECTION AND LOCALIZATION

---

- 13559 OF **AOA/TDOA location technology of weak satellite signal based on satellite-ground cooperation** [13559-86]
- 13559 OG **Bearing-crossing localization technology for UAV target based on signal characteristics** [13559-119]
- 13559 OH **Pseudo-linear approach to joint LOS and NLOS localization** [13559-190]
- 13559 OI **Separation and localization of multiple bat signals using frequency-domain beamforming and dual-array-localization method** [13559-225]
- 13559 OJ **Direct position determination based on sparse signal representation via overcomplete dictionary design** [13559-57]
- 13559 OK **The analysis of indoor high-precision positioning performance using dual-panel system** [13559-68]
- 13559 OL **DV-hop localization for local distance estimation** [13559-46]
- 13559 OM **A TDOA positioning technology based on PF-KF hybrid filtering in NLOS scenarios** [13559-56]
- 13559 ON **Position determination from CSI measurements of multiple UEs under unaware environment** [13559-155]
- 13559 OO **Feed-forward neural network-based algorithm for intelligent positioning of direction-finding crossings** [13559-88]
- 13559 OP **Misspecified CRB for TDOA-based passive localization** [13559-133]

---

## SIGNAL ESTIMATION AND ALGORITHMS

---

- 13559 OQ **Robust adaptive beamforming based on reconstruction of interference covariance matrix and estimation of steering vector** [13559-70]
- 13559 OR **Comparison of CRB on TOA estimation of LOS path between incoherent and coherent processing of two subbands CSI measurements** [13559-94]
- 13559 OS **Range estimation based on Chinese remainder theorem with optimal common remainder** [13559-11]
- 13559 OT **A robust DOA estimation algorithm for impulsive noise based on improved phased fractional lower-order moments** [13559-98]
- 13559 OU **Compressed sampling time difference of arrival estimation method based on amplitude and phase clustering** [13559-157]

- 13559 0V **Research on BLE AOA estimation method based on FOCUSS improved algorithms** [13559-107]
- 13559 0W **A low-complex one-bit DOA estimation algorithm based on DTFT** [13559-22]
- 13559 0X **TDOA estimation method based on frequency domain decimation** [13559-216]
- 13559 0Y **Continuous DOA estimation via tensorized LSTM** [13559-159]
- 13559 0Z **Analysis of DOA estimation under mixed-resolution based on conformal arrays** [13559-183]
- 13559 10 **A high-speed DOA estimation method for low SNR underwater acoustic echo signal** [13559-154]
- 13559 11 **Subspace-based DOA estimation method for coherent signals assisted by transformer** [13559-142]
- 13559 12 **GMAMflow: learning optical flow through global multi-scale attention matching** [13559-144]
- 13559 13 **A trajectory-oriented estimation method based on polynomial time series model and its decoupled implementation** [13559-229]

---

#### DIGITAL SIGNAL FILTERING AND DENOISING

---

- 13559 14 **Multiresolution compound-Gaussian models for sea clutter with independent identically distributed textures** [13559-52]
- 13559 15 **Bernoulli filter-based direct tracking of an emitter under unified far-field and near-field situations** [13559-244]
- 13559 16 **Implementation and optimization of amplitude and phase measurement based on Kalman filtering** [13559-147]
- 13559 17 **Interactive multiple-model probability hypothesis density filter for coexisting point and extended targets tracking** [13559-71]
- 13559 18 **A novel entropy-based method for signal and noise classification in time-frequency analysis** [13559-160]
- 13559 19 **Research on long-term coherent accumulation algorithm for high-speed targets** [13559-2]
- 13559 1A **Target tracking technology based on improved swarm intelligent particle filter via PauTa criterion migration optimization** [13559-114]
- 13559 1B **An adaptive pulse compression SNR improvement method based on single-pulse and phase encoded secondary measurements** [13559-187]

- 13559 1C **Target tracking algorithm based on unbiased conversion of TDOA/FDOA measurements** [13559-132]
- 13559 1D **A new VMD signal processing method combining AFSA optimization and wavelet denoising** [13559-198]
- 13559 1E **An adaptive Kalman filter: application to processing the measurement results of MWC photometer** [13559-99]

---

#### DIGITAL SIGNAL ANALYSIS AND PROCESSING METHODS

---

- 13559 1F **Acoustic feature analysis of 53 marine biological audio** [13559-81]
- 13559 1G **A method for suppressing ISRJ based on noise frequency modulated signal and multi-channel matched filtering** [13559-110]
- 13559 1H **Robust multilayer matrix factorization for blind hyperspectral image unmixing** [13559-236]
- 13559 1I **An efficient algorithm for low-PAPR multi-target jamming signal synthesis** [13559-145]
- 13559 1J **A novel environment reconstruction method based on distributed NLOS signals** [13559-179]
- 13559 1K **Enhancing radar heart sound signal denoising using generative adversarial network** [13559-163]
- 13559 1L **The metrication of LPI signal performance by signal phase agility characteristics** [13559-27]
- 13559 1M **HF signal protocol unique sequence classification based on deep learning** [13559-191]
- 13559 1N **Robust integrated parallel covariance intersection fusion predictor for AR signal systems with mixed uncertainties** [13559-193]
- 13559 1O **Sparse array optimization for wideband signals using adaptive genetic algorithm** [13559-137]
- 13559 1P **CEEMDAN-WTD denoising method for enhanced magnetic memory detection signal of defects** [13559-228]
- 13559 1Q **Multi-beam 2D amplitude comparison direction finding method based on dimensionality reduction search** [13559-149]

---

#### RADAR-BASED SIGNAL DETECTION AND MEASUREMENT

---

- 13559 1R **Smeared spectrum jamming suppression for radar based on signal separation** [13559-67]

- 13559 1S **Radar adaptive MTI filtering algorithm based on linear prediction method** [13559-151]
- 13559 1T **Multi-label learning-based intelligent jamming frequency detection method of frequency-hopping communication** [13559-116]
- 13559 1U **Moving target detection in satellite-based passive radar by using multi-channel integration** [13559-130]
- 13559 1V **Research on radar anti-deceptive-jamming method based on characterization** [13559-170]
- 13559 1W **Range ambiguous clutter suppression and moving target indication for side-looking airborne radar with vertical coherent FDA** [13559-48]
- 13559 1X **An automatic data cleaning method for radar emitter signal recognition** [13559-79]
- 13559 1Y **A multi-station radar orthogonal waveform design and signal processing method based on STC with phase coding** [13559-173]
- 13559 1Z **Hand gesture recognition method based on mmWave radar with MobileViT and knowledge distillation** [13559-205]
- 13559 20 **DSP implementation of signal processing system for millimeter-wave water flow velocity online monitoring radar** [13559-117]

---

#### SIGNAL-BASED MEASUREMENT PARAMETER ESTIMATION

---

- 13559 21 **Hyperparameter free sparse estimation for MIMO radar direction finding in the presence of unknown gain-phase errors** [13559-146]
- 13559 22 **Compound Gaussian clutter modelling with log-Laplace distributed texture and parameter estimation using fractional-moment-based method** [13559-106]
- 13559 23 **Outlier-robust parameter estimation method of compound-Gaussian clutter with inverse Gaussian texture based on truncated moments** [13559-12]
- 13559 24 **Multi-dimensional parameters estimation for HF signals using an electrically large monopole-crossed-loops array** [13559-55]
- 13559 25 **High-precision TOPSAR radial velocity estimation method based on raw data** [13559-120]
- 13559 26 **Performance bound on blind estimation of environmental parameters and radiation source locations with misspecified multipath TOA measurements** [13559-148]
- 13559 27 **OTFS-based target parameter estimation for integrated sensing and communication** [13559-104]

---

#### RADAR SIGNAL DETECTION TECHNOLOGY AND APPLICATION

---

- 13559 28 **PETer: a lightweight human action recognition network based on millimeter-wave radar sparse point clouds** [13559-8]
- 13559 29 **Radar PRI modulation recognition based on ResNet-LSTM model** [13559-140]
- 13559 2A **Echo classification method for flow velocity monitoring radar based on MCCNN+LSTM network** [13559-16]
- 13559 2B **Design of PMCW millimeter-wave radar algorithms on an embedded DSP** [13559-165]
- 13559 2C **A new method of radar antenna scanning mode recognition using LightGBM** [13559-168]
- 13559 2D **A motion compensation method in echo domain for squinted along track interferometric synthetic aperture radar** [13559-101]
- 13559 2E **Radar heart rate estimation based on learnable wavelet transform** [13559-167]
- 13559 2F **Non-contact real-time heart rate estimation based on multi-channel FMCW radar sensor** [13559-109]
- 13559 2G **Decentralized target localization in distributed MIMO radars** [13559-220]

---

#### RADAR-BASED COMMUNICATION PERCEPTION SYSTEM AND POSITIONING TECHNOLOGY

---

- 13559 2H **Reducing bias for closed-form TDOA localization in unified near- and far-field model** [13559-162]
- 13559 2I **A particle belief propagation algorithm based on track-before-detect for tracking low-observable and maneuvering targets using multiple sensor** [13559-32]
- 13559 2J **LPI-based optimal power allocation scheme for multiple targets tracking in collocated MIMO radar** [13559-9]
- 13559 2K **Machine learning classifier for marine radar small targets based on normalization features** [13559-51]
- 13559 2L **Research on improved TDOA algorithm for shallow water underwater positioning** [13559-178]
- 13559 2M **Research on underwater ambient noise prediction in the Eastern Indian Ocean based on the LightGBM algorithm** [13559-204]
- 13559 2N **A low-complexity self-position determination method based on nested array** [13559-76]

13559 2O **An underwater TDOA location algorithm based on AUV assistance** [13559-38]

---

#### MULTI-AGENT COLLABORATIVE CONTROL AND SIGNAL PROCESSING

---

13559 2P **Data-free binary neural network with image heterogeneity** [13559-90]

13559 2Q **EAD-COHA: a cost-optimized edge application deployment method ensuring high availability** [13559-197]

### Part Two

13559 2R **A collaborative task allocation and path planning algorithm for heterogeneous UAV cluster based on intelligent emotional mode** [13559-31]

13559 2S **Cooperative formation and navigation methods for distributed unmanned surface vehicle systems with sensing information** [13559-226]

13559 2T **Track segments association of ballistic targets based on prediction covariance propagation** [13559-3]

13559 2U **Multi-agent decentralized area search based on anti-flocking control** [13559-131]

13559 2V **Mode deconvolved beamforming for a circular array near a cylindrical baffle** [13559-139]

13559 2W **Research on multi-aircraft cooperative signal-level non-coherent fusion algorithm under data link transmission constraints** [13559-82]

---

#### DIGITAL SIGNAL RECOGNITION AND INTERFERENCE ANALYSIS

---

13559 2X **Synthetic pseudo-text aided radar interference recognition: a few-shot learning approach** [13559-66]

13559 2Y **Research on countermeasures against interrupted sampling repeater jamming** [13559-60]

13559 2Z **Unsupervised domain adaptation for variable-SNR signal modulation recognition** [13559-112]

13559 30 **Joint coherent demodulation technology for AIS signals** [13559-84]

13559 31 **Multi-feature classification and recognition method of underwater acoustic signal based on deep decomposition** [13559-128]

13559 32 **Deep learning-based human activity recognition using Wi-Fi signals** [13559-43]

- 13559 33 **An identification algorithm of coherent jamming for monopulse angle measurement** [13559-237]
- 13559 34 **LSTM-based variational autoencoder for radar interference recognition** [13559-186]
- 13559 35 **Interrupted-sampling repeater jamming recognition based on the PC-LFM waveform** [13559-200]
- 13559 36 **An intelligent recognition method of wireless communication signal modulation based on DANet attention mechanism** [13559-201]
- 13559 37 **Dialect recognition based on improved GFCC with VMD and Teager energy operator cepstral coefficients** [13559-64]
- 13559 38 **Cooperative jamming allocation algorithm based on interference efficiency** [13559-10]
- 13559 39 **Adaptive interference suppression method based on log-Euclidean function** [13559-169]

---

#### SIGNAL DETECTION AND MEASUREMENT IN MODERN ELECTRONIC SYSTEMS

---

- 13559 3A **Long-time coherent integration for maneuvering targets using vertical PA and horizontal FDA** [13559-24]
- 13559 3B **Fixed-point maximum complex correntropy algorithm with variable shape parameter** [13559-129]
- 13559 3C **Design and FPGA implementation of automatic white balance algorithm for images from rearview electronic mirrors** [13559-47]
- 13559 3D **A method of multi-station time synchronization based on ADS-B** [13559-195]
- 13559 3E **Transmission characteristics of the left-handed circularly polarized waves in weakly impacted dusty plasma with full ionization** [13559-122]
- 13559 3F **A minimum description length constant false alarm algorithm based on weighted likelihood sparse regularization** [13559-39]
- 13559 3G **Study on zero drift factors in micro-liquid flow measurement using Coriolis mass flowmeters** [13559-58]
- 13559 3H **A novel track initiation method based on rule knowledge and deep detection network** [13559-215]
- 13559 3I **Matrix CFAR detection algorithm based on minimum antieigenvalue** [13559-97]
- 13559 3J **Detection method based on nonlinear feature re-expression with variance maximization** [13559-7]

- 13559 3K **A meta-learning-based online adaptive fine-tuning VAE for industrial process data streams**  
[13559-235]

---

#### MODERN SENSING THEORY AND SENSOR DESIGN

---

- 13559 3L **Optimization of sensitive films for pressure sensors based on wet corrosion** [13559-37]
- 13559 3M **Chipless passive crack sensor based on radio frequency identification technology**  
[13559-25]
- 13559 3N **Fabrication and application of a flexible piezoresistive pressure sensor with a hollow-carved structure** [13559-34]
- 13559 3O **A novel passive RFID sensor for crack monitoring of metallic structures** [13559-93]
- 13559 3P **Numerical study on sound absorption characteristics based on virtual impedance tube and dual-channel acoustic sensor** [13559-33]
- 13559 3Q **Room-temperature ammonia sensor based on MoS<sub>2</sub>/polyaniline** [13559-89]
- 13559 3R **Mechanical modeling and decoupling analysis of the large deformation six-axis force sensor based on sensing units** [13559-85]
- 13559 3S **A passive RFID sensor for crack detection on metal surfaces** [13559-35]

---

#### ELECTRONIC AND COMMUNICATION ENGINEERING

---

- 13559 3T **Ion-doped tungsten disulfide optoelectronic synaptic device for biomimetic vision system**  
[13559-95]
- 13559 3U **Enhanced decoupling minimum processor for coherent multi-target direction estimation in sparse arrays** [13559-221]
- 13559 3V **Electromagnetic scattering characteristics and passive simulation methods of blade type targets** [13559-241]
- 13559 3W **An improved correlation interferometer based on hybrid array** [13559-180]
- 13559 3X **Design of DFB laser driver circuit for CRDS trace gas detection** [13559-42]
- 13559 3Y **Feature stability assessment method for ship targets based on transmitter and receiver position differences** [13559-211]
- 13559 3Z **Simulation design of a rectangular low-frequency amplifier** [13559-223]

13559 40 **Frequency-domain diffusion adaptation with quantized communication** [13559-238]

---

#### COMMUNICATION AND SIGNAL SYSTEM

---

13559 41 **Transmission scheme based on collaborative AUV communication** [13559-243]

13559 42 **OFDM integrated signal design based on communication pre-modulation** [13559-6]

13559 43 **Fusion time-frequency distribution method and its application to aircraft target analysis**  
[13559-143]

13559 44 **A novel low computational complexity timing synchronization algorithm for underwater acoustic communication** [13559-54]

13559 45 **Implementation of parallel optimization for a broadband adaptive beamforming algorithm on localized GPUs** [13559-208]

13559 46 **Research on intelligent detection technology of wireless communication signals based on Yolov10 model** [13559-181]

---

#### CHANNEL CHARACTERISTIC ANALYSIS AND CHANNEL ESTIMATION

---

13559 47 **Performance of LDPC coded MC-MFSK in shallow water acoustic channel** [13559-222]

13559 48 **Indoor mobile channel modelling and simulation based on ray tracing** [13559-115]

13559 49 **Self-interference channel characterization in underwater acoustic decoy and difficulty of interference cancellation in digital domain** [13559-73]

13559 4A **Underwater acoustic channel estimation algorithm based on recursive logarithmic minimum average P norm** [13559-49]

13559 4B **VAMP-based channel estimation for wideband beamspace massive MIMO systems**  
[13559-87]

13559 4C **Channel estimation of data reuse proportional RLS for single-carrier UWA communication**  
[13559-152]

13559 4D **TinyResNetDOA-DCS: a tiny residual network for direction-of-arrival estimation with dual channel switched-element system** [13559-206]

13559 4E **V2V 3D MIMO channel modeling and statistical characteristics analysis based on urban street scenarios** [13559-188]

---

## INTEGRATED SENSING AND COMMUNICATIONS

---

- 13559 4F **Design method for waveform parameters in multi-function radar operating states** [13559-23]
- 13559 4G **Comparison of actual performance between CDMA and DDMA waveforms in vehicle radar application** [13559-63]
- 13559 4H **FDA-MIMO transmit beamforming design for dual-function radar-communication systems based on beampattern modulation** [13559-18]
- 13559 4I **Dual-function radar-communication system: joint design method of transmit waveform and receive weight** [13559-164]
- 13559 4J **Secure energy-efficient beamforming design for integrated sensing and communication** [13559-4]
- 13559 4K **Asynchronous fusion method for passive radar data and satellite data** [13559-184]
- 13559 4L **Node selection method for underwater sensor networks based on deep reinforcement learning** [13559-121]
- 13559 4M **Working pattern recognition of phased array radar based on attention mechanism and feature fusion** [13559-83]

---

## TARGET DETECTION AND DETECTION MODEL

---

- 13559 4N **Enhancement of target detection in rotating multi-channel systems** [13559-207]
- 13559 4O **Adaptive gait zero speed detector based on mapping iteration** [13559-239]
- 13559 4P **RCB object detection method based on Eckart weighted diagonal loading** [13559-218]
- 13559 4Q **Sun-focused spot detection method for AR-HUD** [13559-125]
- 13559 4R **Multimodal perception system for real open environment** [13559-217]
- 13559 4S **A semi-supervised TB detection model based on improved YOLOv5** [13559-135]
- 13559 4T **Super-resolution based on high-frequency feature guidance for small-scale pedestrian detection** [13559-158]
- 13559 4U **UAV obstacle perception based on transmission line detection from 3D point cloud** [13559-209]

---

#### COMPUTER VISION AND IMAGE ANALYSIS

---

- 13559 4V **Robust image watermarking scheme based on orientation of local image texture** [13559-13]
- 13559 4W **Dual-band image sequence registration based on description of velocity and curvature distribution** [13559-65]
- 13559 4X **Affine registration for medical images via coarse-to-fine Swin Transformer** [13559-75]
- 13559 4Y **An image encryption algorithm based on non-degenerate chaos and dynamic bi-directional permutation** [13559-14]
- 13559 4Z **QSVG: quaternion vision graph neural network with structure inference for texture classification** [13559-212]
- 13559 50 **An efficient simultaneous SAR imaging method for multiple moving targets** [13559-227]
- 13559 51 **PET image reconstruction based on multi-kernel fusion** [13559-196]
- 13559 52 **UGC-Net: a generative communication framework for underwater images oriented to semantic understanding** [13559-232]
- 13559 53 **Interference-resisted cross-dimensional information aggregation local refinement network for colposcopic image lesion segmentation** [13559-111]

---

#### IMAGE MODEL AND OPTICAL IMAGING TECHNOLOGY

---

- 13559 54 **RDM: a light field super-resolution model improved with Retinex decomposition** [13559-199]
- 13559 55 **Target point alignment with Gaussian mixture models** [13559-36]
- 13559 56 **Marine targets InISAR imaging via virtual antenna construction method under squint scenarios** [13559-45]
- 13559 57 **A fast cross-range scaling method for geosynchronous broadcasting satellite-based passive bistatic ISAR imaging** [13559-108]
- 13559 58 **TAGE: trustworthy attribute group editing for stable few-shot image generation** [13559-166]
- 13559 59 **Research on the influence of breast sound velocity inversion based on ultrasound computed tomography** [13559-231]
- 13559 5A **Research on radar imaging method based on tensor neural network** [13559-21]

## INTELLIGENT IMAGE ANALYSIS AND PROCESSING METHODS

---

- 13559 5B **FGNet: a lightweight network for tongue image segmentation** [13559-41]
- 13559 5C **Fusion feature multi-objective classification algorithm based on adaptive scale feature residual network** [13559-123]
- 13559 5D **Robust and fragile watermarking for medical imaging** [13559-20]
- 13559 5E **Research on land and sea segmentation of remote sensing images based on improved UNET** [13559-134]
- 13559 5F **Human action recognition method based on spatiotemporal decoupling multi-scale feature fusion network** [13559-192]
- 13559 5G **A study of image recognition intelligent small car system** [13559-150]
- 13559 5H **Joint dehazing and low-light image enhancement with complete atmospheric model** [13559-161]
- 13559 5I **WResUNet: an instance segmentation method based on two-way residual networks and asymmetric convolution** [13559-100]
