# TABLE OF CONTENTS

|                                                                                                                                                  |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------|----|
| A Sionna-Based Cybertwin Simulation Framework for 6G Digital Health Networks .....                                                               | 1  |
| <i>Alinafe Kaliwo, Clement Nyirenda</i>                                                                                                          |    |
| A Novel Active Revocation Algorithm for Intelligent Transport System Security .....                                                              | 6  |
| <i>Nuno R. P. Lopes, Naercio Magaia, Paulo Rogério Pereira</i>                                                                                   |    |
| Fingerprinting Localization in Sigfox Networks: Analysis of the Impact of Base Stations with a<br>Small Number of Received Messages .....        | 12 |
| <i>Albert Selebea Lutakamale, Herman C. Myburgh, Allan De Freitas</i>                                                                            |    |
| Simplified Temporal Convolutional-Based Channel Estimation for a WiFi Vehicular<br>Communication Channel .....                                   | 17 |
| <i>Simbarashe Aldrin Ngorima, Albert Helberg, Marelie H. Davel</i>                                                                               |    |
| Impact Assessment of Hardware Configuration on a 5G Standalone Testbed .....                                                                     | 22 |
| <i>Andries Oelofse, Melvin Ferreira, Herman Blackie</i>                                                                                          |    |
| Comparative Analysis of 5G SDR-Based Open-Source Software Platforms: OpenAirInterface and<br>srsRAN .....                                        | 27 |
| <i>Morebodi Motaung, Nosipho Mthethwa, Boikobo Nokane, Moshe Masonta</i>                                                                         |    |
| From GenAIs to RGenAIs: A Contextual Modelling of Potential Network Attacks Within IoT<br>Networks .....                                         | 34 |
| <i>Akintunde Alonge</i>                                                                                                                          |    |
| Axial MQAM for Lower SER .....                                                                                                                   | 38 |
| <i>Peter Odero Akuon, Chabalala S. Chabalala</i>                                                                                                 |    |
| Digital Twin-Enhanced Edge Compute and Service Configuration in Open RAN Vehicular<br>Applications .....                                         | 43 |
| <i>Mduduzi C. Hlophe, Bodhaswar T. Maharaj</i>                                                                                                   |    |
| Resource Management for MEC-Enabled Next-Generation Wireless Sensor Networks .....                                                               | 48 |
| <i>B. S. Awoyemi, M. C. Hlophe, B. T. Maharaj</i>                                                                                                |    |
| PoS-Enabled PainlessMesh Protocol for Secure Data Transmission Using ESP32 .....                                                                 | 53 |
| <i>Suale Yakubu, Agnes Mindila, Peter Kihato</i>                                                                                                 |    |
| Battery Lifetime Analysis of Energy Harvesting IoT Network Nodes .....                                                                           | 59 |
| <i>Neo Selematsela, Fambirai Takawira, Chabalala Chabalala</i>                                                                                   |    |
| Advanced Modeling of Sodium-Ion Batteries for Electric Vehicles: Enabling Wireless<br>Communication and Intelligent Transportation Systems ..... | 64 |
| <i>Khanyisile Masemola, Cuthbert Nyamupangedengu, David G. Dorrell</i>                                                                           |    |
| Cell-Free Massive MIMO NOMA Network with Deep Reinforcement Learning Aided User<br>Association and Power Allocation .....                        | 69 |
| <i>James Zungunde, Fambirai Takawira, Chabalala S. Chabalala</i>                                                                                 |    |
| Hyperparameter Tuning of SVM Using Metaheuristics: An Empirical Analysis .....                                                                   | 75 |
| <i>Sunday O. Oladejo, Lateef A. Akinyemi, Stephen O. Ekwe, Taiwo G. Omomule, Oluwaseyi P. Babalola</i>                                           |    |

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| Review of Machine Learning Techniques that Enable Network Slicing in Open RAN .....                                       | 81  |
| <i>Nosipho Mthethwa, Joyce Mwangama, Moshe Masonta</i>                                                                    |     |
| The Design and Development of a 5G Network Agnostic System for Emergency Smart Ambulance Applications.....                | 87  |
| <i>Tadiwanashe Mabhudhu, Bessie Malila, Joyce Mwangama</i>                                                                |     |
| Hybrid Channel Estimation Scheme for RIS-Assisted mmWave MIMO System Using Compressive Sensing and an Untrained DNN ..... | 94  |
| <i>Peter Ogolla, Olutayo Oyerinde</i>                                                                                     |     |
| Network Slicing for Mitigating Interference in Dense Deployments .....                                                    | 99  |
| <i>Lucky O. Daniel, Daniel Mashao, Peter Olukanmi, Ghanshyam Singh</i>                                                    |     |
| Non-Orthogonal Multiple Access Integrated Sensing and Communication Beyond 5G Network .....                               | 105 |
| <i>C. E. Ngene, P. Thakur, G. Singh</i>                                                                                   |     |
| Antipodal Vivaldi Microstrip Antenna for Terahertz MIMO.....                                                              | 111 |
| <i>Uri Nissanov Nissan, Segun Akinola, Ghanshyam Singh</i>                                                                |     |
| Lightweight Intrusion Detection Systems for IoT-Based Smart Agriculture: A Deep Learning Perspective.....                 | 118 |
| <i>Issah Ngomane, Mthulisi Velempini, Mncedisi Bembe</i>                                                                  |     |
