# TABLE OF CONTENTS

## VOLUME 1

### **BEYOND REACH: ADVANCED APPLICATIONS IN HORIZONTAL AND MULTILATERAL WELLS**

Continuous Improvement and Innovative Downhole Tool Combinations Used in the United Arab Emirates to Break Boundaries with Mega-Reach Coiled Tubing Interventions Available ..... 1  
*Y. Shbeb, G. Correia, G. Ambrosi, E. Tuoyo, L. Hernandez*

Advanced Techniques for Addressing Critical Injection Well Challenges: A Focus on Concentric and Hybrid Coiled Tubing, Innovative Inverted DTS Algorithm, and Coanda Effect Technology Available.....11  
*M. Gaeta, G. Iervese, R. Abdallah, V. Mahue*

Post-Stimulation Plug Removal in Unconventional Wells with Extended Reach Horizontal Lateral, Leveraging Dissolvable Plugs and Hourglass Coiled Tubing String Design Available..... 43  
*Abdulrahman M. Alowaid, Karim Mechkak, Hassan A. Khan, Rafiq H. Zahaezuani, Mohammed A. Kneina*

Foam Cleanouts in Low-Pressured Horizontal Wells Available ..... 52  
*J. Glanville, J. Green*

Well Control During Complex Coiled Tubing Operations. Equipment Requirements and Methods Available..... 62  
*R. J. Hampson*

Unlocking the Potential for Horizontal Wellbore Fishing of Non-Magnetic Debris in a Dry Environment Available ..... 78  
*O. A. Gjstein, J. Kalaoja, T. Ismailov, H. A. Langaker, O. Kvamsy, J. Pettersen*

Coiled- Tubing Rigless Intervention in Geothermal Output Enhancement Journey Available..... 94  
*N. D. Suresh, N. Yong, A. Shah, M. H. Sabadi, C. S. Tan, Y. M. Ling*

Revolutionizing Well Interventions: The Development and Best Practices of the High-Expansion Thru-Tubing Bridge Plug Available ..... 104  
*Lamyaa Al-Otaibi, Hamad Al-Mehanna, Ahmad Al-Hajji, Mohamed Taher Mesbah, Hazim Abbas Ayyad, Hedi Slama, Abdulaziz Al-Ajmi, Mohammad Al-Dousari, Mohammad Al-Mousharji, Abdullah Al-Debasi, Dalal Al-Kanderi, Alaa Sultan, Wuroud Al-Fadhli, Abdulrahman Kamal, Ibraheem Al-Kanderi, Ahmad Al-Dossary, Abdulaziz Najaf, Saad Awadh Matar, Ali Hussain Qasem*

Reaching Farther with Fewer Issues: An OEM View of the Coiled Tubing Assembly Available .....117  
*K. Elliott, K. Scherer, B. Hammond*

### **LATEST ADVANCEMENTS IN DIGITAL APPLICATIONS, DOWNHOLE TOOLS, SURFACE EQUIPMENT AND MATERIALS FOR WELL INTERVENTION**

Mitigating Mechanical Damage in Coiled Tubing-Advances in Repair Strategies and Fatigue Modeling Available ..... 126  
*G. McClelland, I. I. Galvan, S. Tipton, G. L. Mallanao*

|                                                                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Advanced Software Simulations Using Next-Generation Coiled Tubing Technologies for Shallow Geothermal Applications Available .....                                                          | 145 |
| <i>Bashar Albaalbaki, Michael Chien, Tim Mickel, Kenny Stone, Tanner Palmer, Kyle Clark, Fernando Aguilera, Silviu Livescu, Carlos Torres</i>                                               |     |
| Cloud-Based Slickline Reporting Software Improves Operational Efficiency Available.....                                                                                                     | 161 |
| <i>J. Segura, M. E. Billingham, S. Aboelnaga, M. Al-Dahhan, S. J. R. Kuchipudi</i>                                                                                                          |     |
| Improved Coiled Tubing Data: Combining Real Time Surface, Downhole, and Flowback Data for Enhanced Decision Making Available .....                                                          | 174 |
| <i>P. Jeschke, C Theriot, J. Burke</i>                                                                                                                                                      |     |
| Enhancing Service Delivery of Coiled Tubing Logging Operations with Intelligent Automation Available.....                                                                                   | 186 |
| <i>Hassan Alnasser, Sadaf Chishti, Zhiheng Zhang</i>                                                                                                                                        |     |
| The Pioneering Use of Additive Manufacturing Techniques to Create an Unfolding Metal Cement Retainer for a Water Shut off Project in the UK Southern North Sea Available.....               | 199 |
| <i>G. Fyfe, D. Docherty, C. Harcourt</i>                                                                                                                                                    |     |
| Enabling Advanced Electric-Line Logging on Long Alloy Monocables Available .....                                                                                                            | 211 |
| <i>Wei Dai, Matthieu Billaud, Soon Seong Chee, Hadrien Dollfus, Adolfo Recio, Nalin Weerasinghe, Yerlan Issabekov</i>                                                                       |     |
| Well Intervention Optimization Thru Electrification Available .....                                                                                                                         | 222 |
| <i>James F. Newman, Fred M. Newman, Glenn Schaller, Jonathan Huseman, Michael Kuhl</i>                                                                                                      |     |
| World's First Novel Developed and Deployed Multi-Set 9 5/8" Plug Improves Operational Efficiency in Multi Well Project by Moving Work Scope from Hwu to Wireline Available .....            | 240 |
| <i>T. A. Stokkeland, T. Espeland, A Ahmad, T. B. Johansen, H. A. Langaker</i>                                                                                                               |     |
| One Step Closer to Autonomous Real-Time Returns Measurement During Plug Drillout Coiled Tubing Operations for Unconventional Horizontal Wells in the Denver-Julesburg Basin Available ..... | 254 |
| <i>L. Zhan, K. Moncada, C. Heard, G. Cepeda, A. Nourine, L. Husoschi, B. Marmon, M. Fiore, A. Parshin, B. Theuveny</i>                                                                      |     |

## **CHALLENGING THE FRONTIERS FOR OFFSHORE WELL AND SUBSEA INTERVENTIONS**

|                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------|-----|
| Riserless Coiled Tubing Services from Light Well Intervention Vessel - First Operation in a Live Subsea Well Available .....          | 266 |
| <i>P. Buset, B. Gramstad, M. Howitt, S. Mæland, A. Sbordone, T. Stinson, C. Tramier, T. Øia, D. Barclay</i>                           |     |
| Real Time Digital Data Enables Successful Coiled Tubing Well Intervention in Deepwater Available.....                                 | 281 |
| <i>L. Ramnath, F. Garzon, L. He, C. Aurich, K. Escobar, M. Saidian, B. Schupp, A Molina, N. Webb, E. Gagen, A. Dodds</i>              |     |
| Successful Case History of Scale Well Bore Cleanout in a Caspian Sea Operation Using Electric Line Deployed Technology Available..... | 301 |
| <i>Owen O'Donnell, Stuart Murchie</i>                                                                                                 |     |
| Multisubsea Plug and Abandonment Deployed on Heavy Well Intervention Vessel Available.....                                            | 314 |
| <i>S. Luepongattana, C. Carmona, F. Manja, J. Jenie, N. Yong, Jp. Taboada, B. Cheong, K. Singh, D. Dhorje, S. Milroy</i>              |     |

|                                                                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Recovery of Stuck Telemetry Coiled Tubing Utilising Downhole Severance Methodology Available.....                                                                                      | 331 |
| <i>Gus Garmany, Donald Kellock, Paul Stott</i>                                                                                                                                         |     |
| New Coiled Tubing Open-Sea Technology Reduced Cost in Presalt Deepwater Pipeline Pre-Commissioning in Brazil Available.....                                                            | 341 |
| <i>V. Vivas, R. Martinez, D. Miguel, M. Nunes, M. Apolinar</i>                                                                                                                         |     |
| De-Completion Optimization by Feed Through Production Packer Retrieval with Coiled Tubing Available.....                                                                               | 359 |
| <i>Mohammed Alabdullah, Pedro Correa, Ali Baghanim, Sadaf Chishti</i>                                                                                                                  |     |
| A Groundbreaking On-Demand Remote-Controlled Barrier: World's First Application for Offshore Rig Approach, Enhancing Efficiency, Safety, and Reducing Carbon Footprint Available ..... | 368 |
| <i>A. Abdalla, S. D. Al-Hassani, R. Abdi, A. Aldhaheeri, A. Alhosani, A. Al Dhanhani, N. J. Juvarajah, M. Abdulla, R. Burke, S. Al Messabi, S. Ross</i>                                |     |
| Offshore Through-Tubing Interventions: Downhole Telemetry with CT Technology for Efficient Fish Removal and Increased Well Productivity. a Case History from Brazil Available .....    | 378 |
| <i>V. Vivas, A. F. Cavani, A. Jost, B. Silva, B. Guimaraes</i>                                                                                                                         |     |
| Novel High-Force Tractor Application for Efficient Offshore Well Interventions Available .....                                                                                         | 387 |
| <i>S. Kishore, T. Sheiretov, T. Osmond, W. Dai, L. Silva, S. Al-Toqi, J. Medina-Gutierrez</i>                                                                                          |     |

## **NOVEL AND LIGHT WELL INTERVENTION SOLUTIONS: DOING MORE WITH LESS**

|                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The Evolution of Riserless Wireline Subsea Intervention in Deepwater Gulf of Mexico, Doing More with Less Available .....                                                 | 397 |
| <i>S. E. Townsend, J. Duenas, L. W. Ramnath</i>                                                                                                                           |     |
| Electric-Driven Light Coiled Tubing Unit Unlocks New Intervention Potential Through Efficiency on the Norwegian Continental Shelf Available.....                          | 408 |
| <i>A. H. Keong, J. P. Alberto, A. Grebnev, A. Casali, A. Mussenov, F. Jahn, G. G. Todnem, V. Haugstvedt</i>                                                               |     |
| Anatomy of a Wireline Tractor Perforating Intervention Train Wreck Available .....                                                                                        | 428 |
| <i>H. Castillo</i>                                                                                                                                                        |     |
| Integrated Telemetry, Flow Simulator, and Data Visualization Software Streamline Cleanout Operations with Coiled Tubing Available.....                                    | 439 |
| <i>Felix J. Fajardo, Felix Jahn, Kjetil Austbø</i>                                                                                                                        |     |
| Single Stage Sandstone Acidizing Fluid Improves Well Productivity in Subsea Multi Well Hydraulic Intervention Campaign Available .....                                    | 455 |
| <i>Chinedu Okpalla, Samuel E Bremner, Pedro Artola, Vanessa Cruz, Zaida Francisco, Luis Atilio Riolfo, Ehizokhale Asibor, Nelson Felix, Mickael Mohamed, Jorge Santos</i> |     |
| Rigless Intervention Pipe Expansion Method to Seal Gas Or Fluid Leaks Available.....                                                                                      | 471 |
| <i>J. Foerstner, A. Camponeschi, J. Rairigh, B. Murphy</i>                                                                                                                |     |
| Successful Robotic Bullnose Milling in Horizontal Offshore Well Gaining Access for Open Hole Logging Available .....                                                      | 480 |
| <i>Juan Jose Nobile Blanco, Shiwanshu Shiwam, Amitav Rout, Murilo Andrade, Shekhar Kumbhar, Fadila Nur Rachman</i>                                                        |     |

|                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Maximizing Efficiency: Single-Run Multi-Cluster Coiled Tubing Perforation and Acid Squeeze in Horizontal Wells Using Hydraulic Delay Systems Available ..... | 488 |
| <i>William R. Tapia, M. Amir Naveed, Nestor Molero, Yermek Kaipov</i>                                                                                        |     |

## **EMERGENCE OF DATA SCIENCE, REDUCTION OF CARBON FOOTPRINT, AND THE VALUE OF INTERVENTIONS IN INCREASINGLY CONSTRAINED DRILLING MARKET**

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Mitigating Shock and Vibration in Coiled Tubing Drilling by Combining Big Data Analytics and Physics-Based Modeling Available .....                | 504 |
| <i>F. Song, Y. Wang, A. Zheng, A. Battentier</i>                                                                                                   |     |
| Enhancing Well Intervention Strategies: A Data-Driven Framework for Water-Shutoff Candidate Selection and Post-Treatment Assessment Available..... | 514 |
| <i>O. E. Abdelaziem, S. F. Farrag, A. E. Abdelgawad, M. Mehrem</i>                                                                                 |     |

## **VOLUME 2**

|                                                                                                                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Coiled-Tubing-Conveyed Long Propellant Sleeved Perforating Gun for Highly Deviated Well Pilot Project – Design and Execution Available.....                                                                                 | 539 |
| <i>S. Bukhari, A. Ng, W. A. W. Ismail, S. Vierkandt, M. I. A. Halik, S. Yusoff, K. K. Anuar, Y. X. Choi, C. K. Khong, A. A. M. Noor, H. S. Hidzir, N. Yong</i>                                                              |     |
| New Digital Coiled Tubing Pipe Design Optimizer Available .....                                                                                                                                                             | 551 |
| <i>A. Jan, S. Hassig Fonseca, Z. Liu, S. P. Talluri, B. Brouwer, N. Vodnikov, P. Spesivtsev</i>                                                                                                                             |     |
| Coiled Tubing Equipment Evolution to Overcome the New Well Intervention Challenges on the North Slope of Alaska Available.....                                                                                              | 574 |
| <i>Rodrigo Aviles Miranda, Hussein Mazen, Jerry Webre, Ed Burrell, Chris Littlewood, Eloy Muniz, Jacob Raney, Tyler Senden, Bradley Gathman</i>                                                                             |     |
| The Key to Reliably and Efficiently Installing Casing Patches with Coiled Tubing: Practices from an Indonesian Campaign Available .....                                                                                     | 589 |
| <i>D. S. Kuswardani, P. Nugraha, D. Saputra, B. Ramdhani, D. Pramesti, N. Yong, P. Ramondenc, J. Jenie, P. Djanaka</i>                                                                                                      |     |
| Novel and Sustainable Approach for Norm Scale Removal with Coiled Tubing Milling and Cyclonic Desander System to Restore Tubing Accessibility and Restore Production from High Scale Prone Wells in the UAE Available ..... | 606 |
| <i>K. Salahat, G. Correia, A. Ibrahim, G. Ambrosi, E. Tuoyo, Rüdiger B. Richter, G. Evangelista</i>                                                                                                                         |     |
| Analyzing Coiled Tubing Stuck Pipe Events and the Implication of Understanding the Stuck Mechanism Available .....                                                                                                          | 619 |
| <i>F. Jahn, K. Alhamwi, J. P. Taboada Antona</i>                                                                                                                                                                            |     |
| Operational Improvements Using a Light Work-Over Rig and Concentric Coiled Tubing Vacuum Technology Delivered an Optimized and Cost-Effective Cleanout and Stimulation Available.....                                       | 630 |
| <i>S. A. Alwaili, R. O. Alfonzo, S. H. Craig</i>                                                                                                                                                                            |     |
| Advanced Wireline Conveyance Modeling Powered by Physics-Informed Neural Network Available.....                                                                                                                             | 645 |
| <i>J. Wang, N. Baklanov, B. Durand</i>                                                                                                                                                                                      |     |
| Transformation of Well Intervention Operation Planning into a Digital Workflow Available.....                                                                                                                               | 662 |
| <i>Ted Brueren, Stefan Dinger</i>                                                                                                                                                                                           |     |

|                                                                                                                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Restoring Well Productivity: Leveraging Instrumented Coiled Tubing and Through-Tubing Inflatable Packers for Optimized Waterflood Sweep Efficiency – a Successful Injector-To-Producer Pilot in the Wara Reservoir, Kuwait Available ..... | 673 |
| <i>Omar Abdulrazzaq Hamadah, Mohamed Hedi Slama, Kareem Badrawy, Rustem Sunagatov, Mohannad Adel Sebah, Thenayyan Al-Asfoor, Safaa Mohammed, Muhanna Al-Muhanna, Kholoud Al-Rasheedi, Naween Tirkey, Ayah Al-Fadhli</i>                    |     |

|                                                                                              |     |
|----------------------------------------------------------------------------------------------|-----|
| Optimizing E-Line Milling in Oil & Gas: A Mathematical Optimization Approach Available ..... | 687 |
| <i>L. P. Hernandez, B. J. Schwanitz, J. J. Nobile</i>                                        |     |

## **STIMULATION, CONFORMANCE AND NON-CONVENTIONAL APPLICATIONS**

|                                                                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Water Shutoff Operation Closing Inflow Control Devices Using Fiber-Optic-Equipped Coiled Tubing: Case Study from the United Arab Emirates Available .....         | 703 |
| <i>M. H. Alshehhi, A. A. Malik, I. I. Almahmoud, A. Y. Sulaiman, A. S. Dyab, E. Franco Delgado, S. Seoudy, D. Argynov, A. Adniruddin, W. Mahmoud, S. Silalahi</i> |     |

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| Delayed Acid Stimulation Treatment Developed to Achieve Deeper Penetration into Carbonate Formations Available ..... | 714 |
| <i>L. S. Duthie, A. A. Alkaf, S. Chishti, A. Zakaria</i>                                                             |     |

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| Assessment of Valvular Conduit ICD Performance with FOECT Stimulation in Horizontal Oil Wells Available ..... | 731 |
| <i>Ikhsan Nugraha, Omniyah Jamal, Keshabananda Baruah, Mahmoud Abd El-Fattah</i>                              |     |

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| Revitalizing Production—Water Shutoff and Injection Profile Using Mechanical Devices and Temperature Survey Available ..... | 744 |
| <i>Sergio Rondon Fajardo, Adolfo Sandoval, Hedi Slama, Rustem Sunagatov, Kareem Badrawy</i>                                 |     |

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Design and Execution of the First Polymer Gas Shut-Off in Open Hole Gravel Pack Completion in ACG Field Using Coiled Tubing Available ..... | 754 |
| <i>T. Huseynov, N. Gafarov, C. Inglis, A. L. Hughes, M. Allahverdiyev, A. Syifaa'I, S. A. T. W. Tin, D. E. Parra, A. Taghiyev</i>           |     |

|                                                                                                                       |     |

Da Silva, Daldic Francisco Jose, Ngoma Divubu, Olimpia Madalena Joaquim, Alcino Domingos Congo, Adilson Paulo, Tomas Joao Manuel, Nilton Fernandes Manuel Sapato</i> |     |

## **INTERVENTION SOLUTIONS IN EXTREME WELL CONDITIONS**

|                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Bespoke Insert Safety Valve Design Installed in Deepwater Gulf of Mexico Via Light Well Intervention Available.....                                             | 884 |
| <i>Sarah Dallimore, Max Mondelli, Stuart Dennistoun, Charlotte Prentice, Mahd Dada, Lawrence Ramnath, Celeste Yates, Adam Manlandro, Stuart William Murchie</i> |     |

|                                                                                                                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Integrated Intervention Solution with the Longest Real-Time Hybrid Coiled Tubing and Customized Chemistry Addresses Completion Integrity Issues in a Deep Horizontal HP/HT Well: Case Study from the Sultanate of Oman Available..... | 903 |
| <i>Rishika Gaur, Walid El-Shepani, Omar Wahib, Xavier Alarcon, Julio Vasquez, Mohamed Amin, Joshua Travesso, Romeo Barrera, Deylla Gomes, Mohsin Al Barwani, Khalifa Hilal Khalifa Al Jahwari</i>                                     |     |

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| Hydrogen Embrittlement in Coiled Tubing Induced by Chemical Reactions: Lessons from the North Sea Available ..... | 919 |
| <i>H. Koldal, A. Buchanan, F. Griti, S. Andersson, J. Stuker</i>                                                  |     |

|                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Best Practices During Coiled Tubing Intervention in Extreme Sour Wells (H <sub>2</sub> S 40%) to Prevent Sulfide Stress Cracking: Case Study Available ..... | 935 |
| <i>Mohamed Salah, K. H. Al Dhaheri, S. Al Mulla, W. Mahmoud, E. F. Delgado, S. Seoudy, M. F. Izuany, A. Elattar</i>                                          |     |

|                                                                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Case History of Coiled Tubing Wellbore Scale Removal and Acidizing in High Temperature Geothermal Steam Producer Well with Fast Temperature Build Up Using Modified Acid Pumping Technique Available ..... | 944 |
| <i>H. Arstianti, R. Wijaya, A. Cahyono, D. Rochman, A. Terry, K. Rahimov</i>                                                                                                                               |     |

|                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------|-----|
| Stuck Coiled Tubing? Effective Techniques to Free the Pipe and Lessons Learned from Various Case Histories Available ..... | 959 |
| <i>Steven Craig, Sadaf Chishti, Adrian Terry, Tim Ramsey</i>                                                               |     |

|                                                                                                                   |     |
