Content / Inhalt

7 Circular Economy/Kreislaufwirtschaft

Future Sustainable Car Materials – A Contribution to a Sustainable Circular Economy for Plastics in Automotive Engineering	1
<i>Future Sustainable Car Materials – ein Beitrag zu einer nachhaltigen Kreislaufwirtschaft für Kunststoffe im Automobilbau</i>	11
M. Schneeberger, BMW AG, Munich	
Post-consumer recycles from end-of-life-vehicles	23
J. Schoberer, AUDI AG, Ingolstadt; M. Schlummer, L. Strobl, D. Arends, Fraunhofer IVV, Freising	

7 Manufacturing Processes 1/Fertigungsverfahren 1

Challenges and limitations of high-quality PCR regrinds in the interior and exterior according to the costly regulations of the ELV	39
<i>Herausforderungen und Grenzen von hochwertigen PCR Regranulaten im In- und Exterieur nach den expansiven Regularien der ELV</i>	49
D. Römhild, WIS Kunststoffe GmbH, Breitungen/Werra	
TPE compound utilizing core-back foam injection molding for automotive interior parts process simplification and recyclability improvement	59
S. Kamimura, Asahi Kasei Europe GmbH, Düsseldorf	
Expanded polypropylene beads done by foam extrusion for automotive applications – Revolutionizing the ePP market in automotive applications	67
A. Ballesteros Agudo, Sulzer Chemtech, Winterthur, Switzerland; G. Grestenberger, Borealis Polyolefine GmbH, Linz, Austria	

7 Interior/Interieur

Vehicle interiors from the perspective of sustainability – Alternative trim materials under discussion	77
S. Dietrich, A. Mondschein, H. Schulz, M. Meyer, FILK Freiberg Institute gGmbH, Freiberg	
TPE safety glass?! – An automotive application in the field of exterior trims	93
<i>Sicherheitsglas durch TPE?! – Eine automobile Anwendung im Bereich der Exterieurblenden</i>	101
E. Butsch, Sisecam Automotive, Bietigheim	

Automation – a pillar of the sustainable, high-quality interior	109
<i>Automatisierung – Eine Säule des nachhaltigen, wertigen Innenraums</i>	123
H. Meyer, M. Kaya, T. Taddigs, Volkswagen AG, Wolfsburg	

7 Exterior/Exterieur

Porsche adaptive front diffuser – from racetrack to street	139
<i>Porsche Adaptiver Front Diffusor – Von der Rennstrecke auf die Straße</i>	157
S. Harter, C. Bouvatier, S. Schoell, Porsche Aktiengesellschaft, Stuttgart	
Recyclate use and passive safety: components in the bumper of the new Audi A5	175
<i>Rezyklateinsatz und passive Sicherheit: Bauteile im Stoßfänger des neuen Audi A5</i>	193
F. Fischer, W. Dorfner, AUDI AG, Ingolstadt; S. Cannavò, SMP Deutschland GmbH, Bötzingen; A. Benndorf, M. Kirchberger, PCW GmbH, Eilenburg	

7 Lightweight Design 1/Leichtbau 1

Process combinations for the production of sustainable load-appropriate molded parts	209
<i>Prozesskombinationen zur Herstellung nachhaltiger belastungsgerechter Formteile</i>	219
F. Tautenhain, R. Rinberg, Institut für Strukturleichtbau, TU Chemnitz	
Method development for mapping the mold-filling process of thermoplastic compression-molded components with continuous-fiber reinforcement and complex rib structure	229
<i>Methodenentwicklung zur Abbildung des Formfüllprozesses thermoplastischer Pressbauteile mit Endlosfaserverstärkung und komplexer Rippenstruktur</i>	239
J. Rausch, AUDI AG, Neckarsulm; A. Suratkar, Fraunhofer Institut für chemische Technologie (ICT), Pfinztal; M. Hohberg, Simutence GmbH, Karlsruhe; A. Rau, ElringKlinger AG, Lenningen	

7 Plastics Electronics/*Kunststoffelektronik*

Innovative EMI-Shielding plastics – Functional integration enabling weight and cost reduction in the example of a DC-DC converter application 249
S. Lee, J. Heinisch, LG Chem, Frankfurt

From ideation to validation – Low-pressure overmolding in ADAS cameras 261
J. Houben, A. Sanap, Beyond Materials Corp, Tokyo, Japan

7 Sustainability 1/*Nachhaltigkeit 1*

Uncovering the Material State: Potential of PA66 Fan Modules from End-of-Life Vehicles for Closed-Loop Recycling 271
T. Baeyens, D. Kugele, Robert Bosch GmbH, Renningen; I. Taha, Faculty of Mechanical Engineering and Material Science, Aalen University of Applied Sciences, Aalen; F. Henning, Institute of Vehicle System Technology, Karlsruhe Institute of Technology, Karlsruhe

Lignin – Next generation renewable resource for sustainable plastics BioForm project, bio-based and sustainable materials with vacuum forming for the automotive industry 287
L. Jerpdal, Scania CV AB, Södertälje; C. Carrick, Lignin Industries AB, Knivsta; X. Wei, Royal Institute of Technology, Stockholm; A. Åhrlin, Autoform AB, Malung; A. Matsson, Autoform AB, Malung; M. Hedenqvist, Royal Institute of Technology, Stockholm; T. Prade, Swedish University of Agricultural Sciences, Alnarp; S. Bruder, Scania CV AB, Södertälje, Sweden

7 Simulation

Enabling Reliable Virtual Prototyping with Digital Material Twins – The current state of the art from the perspective of a plastics manufacturer 301
T. Rausch, Covestro Deutschland AG, Leverkusen

Competitive Advantages Through Smart AI-Driven Engineering 311
Wettbewerbsvorteile durch smartes KI-gestütztes Engineering 323
W. Pelzer, U. Seefeldt, M.TEC ENGINEERING GmbH, Herzogenrath

7 Lightweight Design 2/Leichtbau 2

Sustainable Innovation – Achieving Net Zero with Function-Oriented Plastic Design, Tool Design, and Process Management 337

B. Trinkwalter, Head of Innovation, Innovationmanagement, Motherson DRSC Deutschland GmbH; S. Ostwald, Expert Research and Instrument Panel, Volkswagen AG

Ultrasound based measurement of mechanical properties of continuous fiber reinforced thermoplastic laminates – A non-destructive method to identify changes in fiber matrix adhesion 347

E. Moritzer, P. Brandes, L. Claes, B. Henning, Universität Paderborn

7 Recyclates/Rezyklate

A contribution to sustainable development – the use of recyclates in highly loaded applications 361

D. Spancken, J. Decker, E. Metzsch-Zilligen, Fraunhofer LBF, Darmstadt

Risk potential use of post-consumer recyclates – PCR What the automotive industry can learn from the food and hygiene products industry 373

Risikopotential Einsatz von Post-Consumer Rezyklaten – PCR Was die Automobil-Industrie von der Lebensmittel- und Hygieneartikelbranche lernen kann 383

H. Wunsch, E. Jantzen, GALAB Laboratories, Hamburg

Reliable component quality despite PCR recycled materials 395

S. Englich, Schwarz Plastic Solutions GmbH, Gilching; A. Chaloupka, NETZSCH Process Intelligence GmbH; N. Rudolph, NETZSCH-Gerätebau GmbH

7 Materials/Werkstoffe

Tier 1 Supplier Role in Boosting PCR Integration in Automotive Injection-Molded Products for a Circular Economy 405

M. Nowak, Simoldes Plastics, Wolfsburg

Sustainability and Circular Economy – Applying new sustainable materials into plastic parts 407

Y. Schnerb, UBV Materials, Bergen op Zoom, The Netherlands

Expanded TPE – more than just a gap filler	419
<i>Expandiertes TPE – mehr als nur ein Lückenfüller</i>	421
M. Dietz, Woco Industrietechnik, Bad Soden-Salmünster	

7 Manufacturing Processes 2/Fertigungsverfahren 2

BIOPOLYMER PBS – The foreseeable future of plastics: from vision to concrete applications	423
<i>BIOPOLYMER PBS – Die absehbare Zukunft der Kunststoffe: Von der Vision zur konkreten Anwendung</i>	431
P. Putsch, CEO, M. Putsch, Head of Sales, Exipnos GmbH, Merseburg	
TPE as a recyclable alternative for sealings and haptic parts	439
K. Heilmann, F. Dresel, T. Köppl, Hexpol TPE GmbH, Lichtenfels	
Closing the Loop for Automotive Plastics — Sustainable Paint-Removal Technology to Realize Car-to-Car Recycling with High-Quality PCR	451
N. Thormann, Kingfa Sci. & Tech. Co., Ltd., Guangzhou, China; M. Klocke, Kingfa Sci. & Tech. (Europe) GmbH, Wiesbaden; C. Li, Kingfa Environmental Sci. & Tech. Spain SL, Spain	

7 Materials in Electric Drivetrain/ Materialien im elektrischen Antriebsstrang

New Bonding Technology Opens New Technical Opportunities for Hybrid Power Electronics	459
A. Lambrecht, Celanese, Sulzbach/Ts.; L. Malfatti, Röchling Automotive, Leifers, Italy	
Sustainable, new and useful: Pentatonic Green+ plastic battery housing	473
<i>Nachhaltig, neu und nützlich: Kunststoffbatteriegehäuse Pentatonic Green+</i>	489
M. Lipperheide, J. Pfaff, Kautex Textron GmbH & Co. KG, Bonn; S. Louis-Mossberg, Kautex Textron Iberica, S.L., Barcelona, Spain	

7 Sustainability 2/Nachhaltigkeit 2

Driving Sustainability with Simulation – Mercedes-Benz frontend crash absorber structure with Borealis Fibremod™ PP 505

Mit Simulation zu mehr Nachhaltigkeit – Mercedes-Benz energieabsorbierendes Strukturelement im Frontend mit Borealis Fibremod™ PP 515

T. Epple, Borealis Polymere GmbH, Burghausen; K. Heldmaier, Mercedes-Benz Group, Sindelfingen; R. Raulf, HBPO GmbH, Lippstadt

Recyclate use in the painted radiator grilles of the Audi A3 with implementation of a „post-industrial closed-loop“ approach 525

Rezyklateinsatz in den lackierten Kühlerschutzgittern des Audi A3 mit Realisierung eines „post-industrial closed-loop“-Ansatzes 543

W. Dorfner, F. Fischer, AUDI AG, Ingolstadt;

W. Meschitz, Diepersdorf Plastic Manufacturing GmbH, Leinburg;

C. Metzker, MOCOM Compounds GmbH & Co. KG, Hamburg

7 Market Requirements in the Plastics Industry/ Marktanforderungen in der Kunststoffindustrie

Implications of increasingly diverse markets & customer requests on a globally active automotive tier 1 561

K. Schmidt, JOYSONQUIN

Method for determining the cost impact of tolerances on plastic components – How much does accuracy cost? How much does precision cost in the injection-molding process? 575

Methode zur Ermittlung der Kostenauswirkungen von Toleranzen an Kunststoffbauteilen – Was kostet Genauigkeit? Wie viel kostet Präzision im Spritzgussprozess? 597

A. Falke, Doktorandin der Kunststofftechnik, FAU Erlangen-Nürnberg

7 Plenary Session/Plenar-Session

How mobile injection-molding opens up new opportunities in cable assembly and assembly technology 619

Wie sich durch das mobile Spritzgießen neue Chancen in der Kabelkonfektionierung und der Montagetechnik ergeben 629

M. Stegelmann, M. Krah, ANYBRID GmbH, Dresden;

A. Al-Sheyyab, N. Gerber, Rehau Industries, Rehau;

D. Weck, M. Gude, TU Dresden, Institut für Leichtbau und Kunststofftechnik, Dresden
