# TABLE OF CONTENTS

|                                                                                                                                                    |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Four Novel Circuit Topologies of Weakly Hyperchaotic Oscillators .....                                                                             | 1  |
| <i>Jiri Petrzela</i>                                                                                                                               |    |
| Marine Debris Detection from Sentinel-2 .....                                                                                                      | 6  |
| <i>Nima Saghi, Jan Pidanic, Amit Mishra Kumar</i>                                                                                                  |    |
| Exploring Deep Learning Architectures for RF Signal Classification.....                                                                            | 11 |
| <i>Ladislav Polak, Samuel Turak, Roman Sotner, Jan Kufa, Roman Marsalek, Arvind Dhaka</i>                                                          |    |
| Cost-Effective Measurement Setup for Analyzing Signal Coverage in 4G/5G Mobile Networks .....                                                      | 17 |
| <i>Ladislav Polak, Michal Baranek, Jan Kufa, Roman Sotner, Jitka Dluha</i>                                                                         |    |
| DVB-T2 MISO System Influenced by I/Q-Errors in Mobile and Portable Transmission Scenarios.....                                                     | 23 |
| <i>Ladislav Polak, Simon Buchta, Marek Svoboda, Dmitrii Semenov, Roman Sotner, Jiri Petrzela, Tomas Kratochvil</i>                                 |    |
| Comparison of Feature Extraction Algorithms for Speech-Based Emotional Stress Level Detection .....                                                | 28 |
| <i>Ján Staš, Katarína Škotková, Lukáš Hudák</i>                                                                                                    |    |
| Lessons Learned from the First Year of Operations of the PRETTY CubeSat for Future Small<br>Satellite Missions .....                               | 34 |
| <i>Andreas Johann Horner, Manuela Wenger</i>                                                                                                       |    |
| Dispersion Limitation of Digital Signal and Carrier Distribution in Optical-Wireless Networks .....                                                | 39 |
| <i>Attila Hilt, Andrea Farkasvölgyi</i>                                                                                                            |    |
| Open Dataset for Modeling Nonlinear Systems for Electric Guitar .....                                                                              | 45 |
| <i>Matej Huzvar, Stanislav Vitek</i>                                                                                                               |    |
| High-Matching Current-Starved Inverter for Two-Dimensional Vernier Time-To-Digital Converter.....                                                  | 49 |
| <i>Marek Svoboda, Pavel Horsky</i>                                                                                                                 |    |
| Low-Complexity Autonomous RC Time Constant Calibration for Accuracy Improvement of CMOS<br>Integrated Analog Frequency Filters .....               | 54 |
| <i>Vratislav Michal</i>                                                                                                                            |    |
| Multi-Objective Optimization of Vector Fitting for Accurate and Compact S-Parameter Models .....                                                   | 59 |
| <i>Petr Kadlec, Vojtech Bednarský, Ming Shen</i>                                                                                                   |    |
| Microcontroller-Based Encryption Module for Secure Internet Client-Server Chatting .....                                                           | 65 |
| <i>Nikita Kuropatkin, Milos Drutarovsky</i>                                                                                                        |    |
| Machine Learning-Assisted Deterministic Satellite Localization Using Doppler Analysis to Counter<br>GPS Attacks in Maritime Navigation .....       | 71 |
| <i>Hosam Alamleh, Bradley Hays</i>                                                                                                                 |    |
| Groove Gap Waveguide Crossover for Butler Matrices and Beamforming in Millimeter-Wave<br>Satellite Antenna Systems .....                           | 77 |
| <i>Mohammad Alibakhshikenari, Peiman Parand, Ali Zidour, Bal S. Virdee, Lida Kouhalvandi,<br/>Patrick Longhi, Takfarinas Saber, Ernesto Limiti</i> |    |

|                                                                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Development of an Efficient and Fast Computational Tool for Multi-Precision Floating Point Numbers .....                                                                                | 81  |
| <i>László Leitold, Bence Cseppento, Zsolt Kollár</i>                                                                                                                                    |     |
| Modification of CNN Model for mMIMO CSI Localization .....                                                                                                                              | 86  |
| <i>Juraj Machaj, Matej Chudovský, Peter Brida, Xaver Zak, Bohumil Adamec</i>                                                                                                            |     |
| ESP32 Microcontroller Based Lightweight TLS 1.3 Client for IoT Applications .....                                                                                                       | 90  |
| <i>Jaroslav Pajkos, Eva Kupcova, Matus Pleva, Milos Drutarovsky</i>                                                                                                                     |     |
| The Importance of Correlation Coefficients in Optimizing Input Data for Hybrid FSO/RF Systems.....                                                                                      | 96  |
| <i>Zuzana Lišcinska, Luboš Ovsenik, Jakub Oravec</i>                                                                                                                                    |     |
| AI-Enhanced Annotation Tool for Aneurysm Medical Image Labeling.....                                                                                                                    | 102 |
| <i>Martin Paralic, Patrik Kamencay, Róbert Hudec</i>                                                                                                                                    |     |
| LSTM-Based Power Delay Profile Predictions for Intra-Bus Wireless Propagation.....                                                                                                      | 107 |
| <i>Rajeev Shukla, Atharva Verma, Aniruddha Chandra, Ondrej Zelený, Radek Zavorka, Jiri Blumenstein, Aleš Prokeš, Jaroslav Wojtun, Jan M. Kelner, Cezary Ziolkowski, Domenico Ciunzo</i> |     |
| Deep Reinforcement Learning for Energy-Efficient Secure Dual UAV-Assisted Networks .....                                                                                                | 112 |
| <i>Gaurav K. Pandey, M. J. Nikitha, Uppala Harini, Vishal Pal, Devendra S. Gurjar, Suneel Yadav, Juraj Gazda</i>                                                                        |     |
| Exploiting Direct Link in RIS-Aided Two-Way Communications with Traffic Asymmetry.....                                                                                                  | 118 |
| <i>Suneel Yadav, Radhika Gour, Devendra S. Gurjar, Juraj Gazda</i>                                                                                                                      |     |
| Framework for Indoor Wireless Propagation Modeling Through Wireless Insite® .....                                                                                                       | 124 |
| <i>Arao Zau Macaia, Niraj Narayan, Rajeev Shukla, Aniruddha Chandra, Ondrej Zelený, Radek Zavorka, Jiri Blumenstein, Aleš Prokeš, Jaroslav Wojtun, Jan M. Kelner, Cezary Ziolkowski</i> |     |
| Comparative Assessment of Modern Approaches for 3D Reconstruction.....                                                                                                                  | 130 |
| <i>Oleh Kryvoshei, Patrik Kamencay, Roberta Hlavata, Adam Stech, Miroslav Benco</i>                                                                                                     |     |
| A New Approach for Classification Intracranial Aneurysm Using GRU and 2D Convolution Layers .....                                                                                       | 135 |
| <i>Roberta Hlavata, Patrik Kamencay, Robert Hudec, Peter Sykora, Miroslav Benco</i>                                                                                                     |     |
| Development of a Custom MANET Simulator with Enhanced Integration of AI-Based Routing Protocols.....                                                                                    | 139 |
| <i>Jozef Badar, Jan Papaj</i>                                                                                                                                                           |     |
| Computer Network Security and Analysis of the Use of Artificial Intelligence in Protection .....                                                                                        | 143 |
| <i>Ján Kubaš, Michal Hraška, Jozef Papán, Michal Janovec</i>                                                                                                                            |     |
| Capacity and Performance Test Methods for Cloud-Based Telecommunication Network Functions .....                                                                                         | 150 |
| <i>Attila Hilt, Gábor Járó, Andrea Farkasvölgyi</i>                                                                                                                                     |     |
| A New Approach for Detection Intracranial Aneurysm.....                                                                                                                                 | 156 |
| <i>Peter Sykora, Roberta Hlavata, Patrik Kamencay, Robert Hudec</i>                                                                                                                     |     |
| Simple Fiber Ring Laser with Unpumped Erbium-Doped Fiber.....                                                                                                                           | 160 |
