

IABSE Symposium Tokyo 2025

Environmentally Friendly Technologies
and Structures: Focusing on Sustainable
Approaches

Tokyo, Japan
18-21 May 2025

Volume 1 of 5

ISBN: 979-8-3313-2086-7

Table of Content

Preface	24
Scientific Committees	26
Organizing Committees	27
Sponsors	29
Supporting Organizations and Collaborators	30
Opening Speech	31
Keynote Lectures	35
Session Plan	51
Full Papers	105

Keynote Lectures

K8	Towards Intelligent Cracking Analysis and Design for Concrete Bridges Based on Three-layer Stress Indicator System	106
-----------	--	-----

SS08: Condition Assessment and Mitigation of Civil Structures under Natural Hazards and Climate Change

641	A Machine Learning-Enhanced Method to Bridge Condition Evaluation considering Defect Prioritization	116
622	A regional climate variable modified probabilistic natural carbonation prediction model for service bridges	124
123	Study on Damage Assessment of RC Piers Based on Residual Cracks	132
155	Assessing Tuned Mass Damper Effectiveness in Long-Span Bridges Using Machine Learning	141
623	Mapping structural damage to material damage for the analysis of RC structures in actual damage states	149
328	Investigation of Thermo-Hydro-Mechanical Variations in Seasonal Frozen Region Tunnels	158

SS02: Is Steel Reuse Feasible?

320	Reusability of Structural Steel Beams after Cyclic Plastic Deformation and Strain Aging	166
49	Test on beam-to-column connection of existing steel buildings for reuse	174
317	Research progress on reuse of steel structures in Mainland China	180
41	Application of Reclaimed Elements in Structural Engineering Towards Circular Economy	189
565	Novel Connection Technique for Temporary Structures: Labor-Saving and Reuse of Existing Members	196

SS16: Application of Innovative Data-Driven Methodologies for Enhancing the Decision-Making Processes in Asset Management

524	Bridge testing field data for damage quantification and decision- making	205
346	Seismic fragility curves of multi-span masonry arch bridges in Portugal	214
642	Sustainable Network-Level Bridge Maintenance Decision-Making Based on NSGA-III.....	223
626	Optimisation of bridge maintenance strategy and cost considering whole life costs and carbon emissions.....	230
599	Automated Detection and Measurement of Bridge Expansion Joints Using Deep Learning Algorithm and Inspection Vehicles	238

Green concrete

431	Stress-Strain Behavior of Confined Green Concrete	244
458	Shrinkage and microstructural evolution analysis of AAFS with tetrasodium of 1-hydroxy ethylidene-1, 1-diphosphonic acid (HEDP•4Na)	251
459	Study on Confinement of Ultra-High Performance Concrete Using Ties	259
500	Sustainable Concrete with Dairy Wastewater: A State-of-the-Art Review	265

Inspection and assessment 1

411	Integrated Structural Assessment Based on Measurements for bridge structures	273
591	Guidance on inspection-supported reliability assessment of existing bridges in Germany	282
562	A study on live load factor considering actual traffic load for evaluation of existing bridges.....	290
615	Structural Integrity Evaluation of Old Railway Bridges: Focus on Longitudinal Loading and Substructure.....	299
132	Experimental Study on Residual Axial Capacity of CFRP Confined Concrete Cylinder (Full and Partial Confinement) after Exposure to Elevated Temperature	307

SS23: Data-Driven and Physics-informed Machine Learning Methods for Structural Health Monitoring of Bridges-1

634	Single-spot Damage Assessment of Concrete-filled Steel Tubular Structures through Convolutional Neural Network-based Time Series Analysis	322
632	Data Anomaly Detection for Structural Health Monitoring Based on Computer Vision and Transfer Learning	329
303	Joint Input-State Estimation Based on Recurrent Neural Network Assisted-Augmented Kalman Filter	338
631	U-Net-Driven Method for Identifying Vehicle Moving Forces from Bridge Displacement Data	347
102	A physics-informed deep learning method for moving force identification.....	356
312	Drive-by road profile identification on highway using vehicle accelerations	364

Sustainable structures

9	Consequences of and Responsibility for Sustainability Failures	372
223	Cost and Environmental Impacts of Proposed NSCP 8th Edition Seismic Load Guidelines on Steel Buildings in Metro Manila	379
77	The Impact of Climate Change Scenarios on The Time-Dependent Capacity of Reinforced Concrete Structure.....	388
199	Optimizing welded structures while minimizing costs and environmental impacts	397
549	Experiment study on mechanical behavior of composite beam with fixed pier-girder system	405
17	Study on Reciprocal frame Long span Structures	414

Advanced design

264	Multi-index method for visualizing robustness of structures	421
472	Structural Behavior of a Long-span Half-through Arch Bridge: Network Hangers versus Vertical Hangers	429
481	Alternative Structural Model for Cable-stayed Bridges with Cables Simplified as Individual Elastic Supports.....	438
467	TMD Application on Existing Buildings in High-Risk Seismic Zone	447
300	Discrepancies of Amplification Factor Method in Stability Design of Tall Buildings	453

Resilience assessment

140	Development of a 1:1 scale Multi-region Agent-based Economic Model for Estimating Economic Impacts of Infrastructure Damages	461
537	Intensity Measures of Ground Motions for Estimating Nonlinear Response of Bridges with Dampers	469
168	Patterns and Risk Assessment Based on IABSE Database	475
554	Integration of Seismic Vulnerabilities into Bridge Asset Management	483
313	A Fundamental Study on Initial Assessment of Damage based on Physical Parameter Identification using SISO-ARX Model	491
569	Efficient Augmented Extended Kalman Filter Using Adaptive Strategy with Spectral Transition for Rapid Post-Earthquake Displacement Estimation.....	499

SS11: Updated Technologies on Seismic Isolation and Response Control for Sustainable Social Infrastructure

69	Lessons from the 2024 Noto Peninsula Earthquake and the applicability of damage control technology in Japan	506
280	Implementation of Innovative Retrofitting Methods after the 2023 Turkiye Earthquakes.....	514
26	Seismic-isolation retrofit of historical building, KUDAN-KAIKAN TERRACE	522
583	Publication of IABSE SED 19: Seismic Isolation and Response Control	529
164	Shaking table studies of a hybrid seismic isolation bearing system	535

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches
May 18-21, 2025 | Tokyo, Japan

510	Updated dynamic testing facilities for seismic isolation and response control devices	544
-----	---	-----

SS05: Enhancing Resilience in Infrastructure Asset Management

71	Railway Damage Prediction Using TCMC-based Markov Hazard Model	550
306	Bridge Management Technical Development With Jica Technical Advisory Team "Hashimori" in El Salvador and Its	558
517	Comparison of different methods for lifetime assessment of a welded railway bridge for sustainable use	567
139	Risk-based Culvert Network Repair Prioritization Scheme	576

SS26: Caisson Foundation - A Trusted Sustainable Solution for Bridges

103	Caisson Foundations for two Bridges across river Hooghly at Kolkata	585
355	Innovative Caisson Foundations of Signature Bridge, New Delhi, India	594
96	Case Histories of Well Foundations in India-Design and Construction Challenges	603
46	Jack-Down Method of Well (Caisson) Sinking for Bridges Over River Yamuna, Delhi.....	612
94	Assessment of Existing Caisson Foundation for reuse Using Cross Hole Sonic Logging Technique	620
146	Rehabilitation of MG Setu Bridge over River Ganga, Patna, Bihar	629

Green structures

25	Adaptive Reuse of Buildings: Protection of Existing Adjacent Structures.....	637
50	Application of '4+1+1' Short-line Precast Segmental Technology in Macau C390B	645
53	"Seeblickweg"-Bridge - 70-meter-long integral timber-carbon- concrete composite bridge in Stuttgart (Germany)	654
533	Carbon footprint of innovative bridge structures with regards to their resistance	662
402	Green Infrastructure in Bridge Development: Case Studies and Applications	668

Inspection and assessment 2

629	Research on vibration activity and exposure to acoustic emissions of road infrastructure elements caused by vehicle traffic.....	675
57	Improvement of Positioning Accuracy of Augmented Reality Bridge Inspection Support System.....	683
299	UAV-Based Railroad Track Conditions Monitoring.....	691
22	Features of the Maintenance of Engineering Structures in Russia	698
437	Modelling and dynamic identification of bridge in the cold climate region: the Herøysund bridge case study	704
345	Deflection Estimation of Prestressed Concrete Bridges Using Ends-of- Span Displacement Responses	713

SS23: Data-Driven and Physics-informed Machine Learning Methods for Structural Health Monitoring of Bridges-2

618	Estimation of Grout Filling Degree in Prestressed Concrete Structures using Acceleration Signals with Autoencoder Model	720
129	Hybrid Physics Data-driven Modeling for Structural Nonlinear Boundary Condition Identification.....	729
228	Ensemble Learning-based Lightweight Acoustic Approach for Void Detection in Concrete-filled Steel Tubular Arch Bridges	736
576	How to Determine the Level of Epistemic Uncertainty and Exclude Faulty Sensors in Structural Health Monitoring Systems.....	745
376	Reconstruction of the bridge end displacement via nonlinear model accounting thermal correlation.....	753
546	Model updating of a single span prestressed concrete bridge using surrogate model and Particle Swarm Optimization	761

Sustainable bridge-1

73	Assessment of Sustainable Bridge Construction in Emerging Economies	768
104	A Design of Bridge with Combined U-Box Section Girder and Its Carbon Emission Evaluation	776
117	LT Bridge – Meeting the Modern Requirements in Bridge Engineering	785
142	Study on Composite Cable-stayed Bridge Using Sustainable Cast Iron Slab.....	792
366	User and Environmental Impacts in Bridges Maintenance Planning– Potentials of Discrete Event Simulation	801
383	High strength steel influence on sustainability of corrugated soil-steel composite bridge.....	807

Practical design of tall buildings

572	Damped Braced Tube System for seismic response control design of a supertall building facing a severe seismic environment: TOKYO TORCH Torch Tower	815
541	Study on verification of observed seismic record of over 200 meters tall mid-story-isolated building.....	823
263	Vibration Reduction Analysis Of Separate Translational Tuned Mass Damper Of Super Tall Residential Tower Under Wind Excitation.....	830
265	Multi-State Analysis and Resilience Design for Multi-Petal Supertall Buildings with Coupling Trusses under Extremely Rare Earthquake	838
226	Seismic fragility assessment of spine frame system considering various types of ground motions	846
270	Multi-State adaptive design structural system selection for over-track residential resumed Construction constructions in metro depots	854

Resilience to Wind and Earthquakes

156	Vector-Based Rapid Seismic Resilience Evaluation of Bridges Subjected to Corrosion	863
-----	--	-----

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches
May 18-21, 2025 | Tokyo, Japan

304	A Study on the Reinforcing Effect of a CCTV Pole Installed on a Bridge Based on Loading Tests	872
474	Seismic bridge retrofit in Switzerland	880
230	Wind-Resilience of a Cable-Stayed Bridge in the Coastal Region of Mombasa, Kenya	886
539	INVESTIGATION ON WIND FLOW FIELD AROUND SETO-OHASHI BRIDGES DURING DIFFERENT TYPHOON TRACKS BY WRF-LES	895
573	Reliability-based Assessment of Structural Steel Design Code of Nepal	904

SS21: Digital Twins of Infrastructure for Enhanced Design, Construction, Management, and Disaster Resilience

220	Developing Satellite Observation Digital Twin for Remote Bridge Monitoring	913
86	Disaster prevention digital twin for damage estimation methods in Society 5.0..	921
112	Digital Twin for Maintenance and Disaster Management of the Cable- stayed Bridge.....	930
232	Enhanced Method of Load Resistance Evaluation for Steel Bridges Using Lidar and Image Processing.....	937
310	Shell Model Reconstruction from Point Clouds for Efficient Analysis of Steel Bridges	946
323	Development of constructing 3D bridge models using deep learning based on structured knowledge	955
344	Development of High-Speed Cycle Simulation Scheme for Fatigue Life Prediction and Maintenance for a Group of Reinforced and Prestressed Concrete Bridges..	963
370	Point cloud-based geometry updating and finite element analysis of railway bridge pier	972

SS09: Structural Performance and Safety Assessment under Extreme Loads

645	Parameter Sensitivity Study on Sunshine Temperature Field in Concrete Structures	981
48	Analytical and Experimental Research on Transmission Towers with Simplified Design	990
162	Performance Criteria for Bridge Columns Under Impact Loads.....	999
165	Study on Inducing and Controlling Accelerated Corrosion of Steel	1007
215	Corrosion-fatigue service life estimation of reinforced concrete bridges	1016
359	Behavior analysis of tied-arch bridges in case of hanger failure.....	1025
507	Seismic Performance of Structural Glazing Connections Under Low Cycle Fatigue Loading: A Study on Alternative Joint Geometries	1033

SS20+SS28: Infrastructure Management and Performance Optimization

18	Probabilistic Cost-Benefit Analysis for bridge alternatives as decision support....	1043
40	A study on the history of imposed loads in building codes in Sweden	1052
368	Reliability of steel-concrete composite bridges considering the load cycle-dependent degradation of their shear connectors.....	1061

624	Harmonization of quality management for engineering structures Basic considerations and principles.....	1070
434	Revising Weights for Bridge Maintenance Prioritization Using Stakeholder Input	1078
557	Bridge management and decision-making perspectives	1087
83	Performance-based bridge management	1096
282	Asset management in the academic curricula and training of practitioners	1104

SS03: Resilient Bridge Infrastructure

339	UAV-Enhanced Analysis of Fatigue-Induced Damage in RC Bridge Girders Using Nonlinear Finite Element Methods	1112
552	of existing road infrastructure in Bavaria	1118
108	Resilient Design in Bridge Retrofit: Towards Repairable and Disaster- Resistant Structures	1126
243	Multi-hazard Performance and Safety Evaluation of Self-centering Bridge Piers in Earthquake-Impact Tests.....	1133
245	Conceptual Design of an 800m Span Inverted Extradosed Suspension Bridge Incorporating Prestressed Concrete Butterfly Web Girder.....	1142

Repair, Retrofit, and Renovation

44	Innovative Jacking and Support Systems for Major Bridge Retrofits In US	1150
216	Fatigue Strength Improvement by Induction Heating against Weld Root Failure in Out-of-Plane Gusset Welded Joints.....	1159
222	Development of repair laser welding technology for bridge structure	1167
234	Rapid Redecking of Urban Steel Bridges: Effective Width of Replaced Orthotropic Steel Decks Connected by Discrete Shear Connectors to Existing Steel Girders	1173
307	Research on the demolition strategy of large-span truss structure	1181
544	Experimental Study on Reinforcement Method of Upper Flange of Steel Girders Using CFRP Molded plates.....	1187
238	Large-scale Renovations for Bearings of Steel Railway Bridges on the Tokaido Shinkansen under Non-slow-speed Operations.....	1195
542	Renovation work at a major terminal station while maintaining train service	1202

SS23: Data-Driven and Physics-informed Machine Learning Methods for Structural Health Monitoring of Bridges-3

636	Comparison of Bridge Deterioration Models based on Bridge Defect Data from Inspection Report	1211
128	Physical-Based Bridge Damage Localization Using Acceleration Transfer Matrices.....	1219
322	Application of Neural Operator for Damage Identification of a Simply Supported Beam.....	1227
617	Investigating Damage Detection via Short-term Ambient Rotation Monitoring Campaigns	1235

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches
May 18-21, 2025 | Tokyo, Japan

635	Acoustic Signal Analysis in Bridge Territory for Traffic and Collision Identification	1244
39	Improving vehicle load estimation accuracy using Multi-Objective Optimization based Bridge Weigh-in-Motion	1252

Sustainable bridge-2

65	Inhabitable Bridges – Multifunctional Structures from the Past Reimagined for the Sustainable Future	1261
319	Developing a Sustainability Rating System for Bridges in the United Arab Emirates.....	1270
612	Design and construction of the first steel railway bridges in the United Arab Emirates.....	1279
23	Composite Materials in Bridge Construction in Russia	1288
465	Rapid Replacement of a Damaged Expressway Bridge in Two Weeks	1296
89	TAC.T BRIDGE–pedestrian bridge of small diameter timbers and the environmentally friendly concrete.....	1304
160	Green Connector Footbridge, Kuching, Borneo, Malaysia.....	1312

Structural system for tall buildings and spatial structures

97	Lateral Stiffness Redundancy Data Based Automatic Optimization of Super Tall Building Structures	1319
98	Sensitivity Data-driven Optimization of Coupling Trusses Section of Multi-petal Supertall Building under Period Constraint.....	1327
219	A Fundamental Study on an Alternate Space Truss Structure	1336
260	The structural design of the stadium with a wing-like roof and a beautiful back side of spectator stands.....	1344
315	Penetration performance evaluation of origami honeycomb sandwich structures.....	1352
327	Assessment of the load-bearing capacity of textile-reinforced shell structures created with a free form-finding approach.....	1359
45	Structural Behavior and Failure Modes of 765kV Transmission Towers: A Full-Scale Experimental Study	1368

Geohazards, floods, and fires

532	Protection of Stay Cables against Attacks and Fire	1376
321	Mechanical property on novel foldable panel bridge using scissors structure	1383
290	and Its Simplified Evaluation Method Based on Beam Approximation Model.....	1391
262	Flood Impact and Condition Assessment for Bridge Infrastructure in Southern Lake Michigan Region through Hybrid Fluid-Structure Interaction and Data-Driven Modeling	1399
436	Prevention of Foundation Flood Damage Using Pile-Cap Connections	1408
188	Geohazard Mitigation by Bridge Construction on Central American Highway No. 6	1417

60	Climate-change resilience indicators for engineering infrastructure based on climatic tunnel simulation	1426
-----------	---	------

SS19: Existing Bridges and Extension of BIM to Bridge Management Systems

154	Linking BrIM to BMS for bridges – Recommendations for integration into existing bridge management practice.	1435
187	Development of BIM-based Bridge Maintenance Digital Transformation System	1443
378	Deep learning-based semantic parsing and geometry extraction of bridge point cloud data toward fully automated Scan-to-BIM.....	1450
61	Digital Twin Models for the assessment of existing.....	1456
628	Introduction to BIM-Based Maintenance Policies and Implementation Guidelines in South Korea	1463
506	Resilience in Chilean Railway Infrastructure: Application of BrIM to Historic Metal Bridges.....	1471

SS07: Seismic and Multi-hazard Resilience of Bridges and Infrastructure Systems

179	Insights from Nationwide Survey of Seismic Restoration Models of Bridge Components	1479
235	Seismic Energy Distribution in Multi-span Reinforced Concrete Bridges	1485
318	Benchmarking the seismic design of bridges based on the new generation of Eurocode 8: A case-study example from Slovenia	1494
347	Analytical Study on Shear Deformation Behavior of Rubber Damper with Delamination and Hardening of Rubber due to Aging	1503
204	Creative Seismic Design and Application of Precast Concrete Member of Nakatsugawa Bridge Over the Fault Fracture Zone - Butterfly Webs Extradosed Bridge -.....	1512
288	Dynamic Response of Steel Tied Arch Bridges under High-Speed Train Loading ..	1521

AI for design

384	An Application of Machine Learning to the Detailed Design of Bridges	1530
637	A Natural Language Processing-based Approach to Bridge Structure Information Extraction.....	1539
38	Aspects of Buildability for Automated Bridge Design	1546
43	A Comparison Between Set-based Design and Genetic Algorithms for Cost and Carbon Optimization of Building Structures	1555
425	Shear Resistance Prediction of Angle Connectors Using Machine Learning.....	1564
435	The synergetic prevention and control system of bridge-ship collision based on digital twin	1572

Inspection and maintenance of cable 1

495	Inspection of the stay-cable systems of cable-stayed bridges.....	1580
------------	---	------

145	Deterioration Estimation Method for Suspension Bridge Structural Members Based on Statistical Analysis.....	1589
186	Correlation between corrosion appearance and cross-sectional reduction in corroded strands	1598
581	Quantitative Evaluation of the Effect of Corrosion on the Fatigue Strength of High-Strength Galvanized Steel Wires.....	1606
293	Numerical Analysis of Cable Corrosion and Its Effects on Structural Integrity and Vibration Characteristics of cables	1614

Bridge design

356	New Road Bridge at the Border Crossing Kipi-Ipsala – Mastering Substantial Challenges from Conception to Completion	1622
613	Sydney Gateway’s Twin Network Arches: a Case Study in Complex Bridge Design and Construction	1630
247	New Drini Arch Bridge in Kukes: Design and Launching Phases	1639
336	Design of four-tower continuous cable-stayed bridge in Kobe	1647
450	Ship Collision Bridge Risk Study Based on Slice Method	1653
452	Research on the Algorithm of Bridge-Ship collision Risk Considering Ship's Three-Dimensional Scale.....	1661

SS15: Bridge Weigh-in-Motion for Sustainable Bridge Management-1

52	Experiences implementing a BWIM system on a suboptimal bridge.....	1669
211	Advancing Bridge Weigh-In-Motion with A Novel Optoelectronic Strain Sensor..	1676
106	Fundamental study on the influence of vehicle speed on BWIM considering autocorrelation in bridge dynamic response	1684
196	Comparative Sensitivity Analysis of Virtual Axle Approaches in Bridge Weigh-in-Motion Systems.....	1692
619	Suitability of traffic load models in Codes to derive maximum load effects in long-span cable-stayed bridges.....	1701
296	Recognition of Vehicle Statistics of Random Traffic Flow by Deep- Learning for Live-load Performance Evaluation of Existing Bridges	1710

Sustainable building

358	Analyzing aerodynamic performance of high-rise timber buildings under wind-induced vibrations	1718
74	Large-scale building unit construction with carbon-neutral and robotics technologies, Kajima Technical Center.....	1727
144	Fostering Sustainability in Conventional Reinforced Concrete Building Structures: Effective Measures in Kobe Port Museum Building	1734
252	How liquid cold-poured interlayer adhesives can contribute to more sustainable glass façades	1742
206	Integrating Multicriteria Decision Analysis in a Sustainable Shelter Design Selection	1751

Steel bridge members and their performance

82	Theoretical derivation of elastic local buckling load formulae of I-shaped steel girders considering web-flange interaction	1760
157	Research on the Shear Strength of Corrugated Steel Web Used in Bridge Girders	1769
192	A Proposal of I-section Girder Assembled by Dissimilar Steels with Different Strengths.....	1777
207	Comparison and Optimization of Web Stiffening Solutions for Bridge Girders with Medium to Large Spans.....	1786
513	Influence of Temperature Variations on Fatigue Damage of Deck-Rib Welded Joints in Orthotropic Steel Decks under Vehicle Loading	1794
386	Experimental Study on Compression Strength of H-shape Cross- Section Members of Steel Bridge Superstructures using SBHS500	1803

Disaster resilience of buildings and components

70	Seismic Behaviour of Multistory Prefabricated Modular Steel Buildings in High Seismic Regions	1811
78	Time-dependent Fragility Curves for the Seismic Risk Analysis of Reinforced Concrete Buildings subjected to Degradatio	1819
90	Analysis of Geodesic Domes subjected to Cyclonic-Scale Wind Loading.....	1828
400	Concept for full-scale testing of structural sealant glazing facades.....	1838
442	Optimal Location and Time Interval of Concrete Placement on Vertical Members Compressive Strength with Cold Joints	1847
224	Nonlinear Analysis of San Augustine Church in Bantay, Ilocos Sur.....	1853

SS13: System Identification and Active Control

600	Observed Performance of Osman Gazi Bridge's Active Mass Damper for Tower Vortex-Induced Vibration during in-service Condition	1860
274	Active Control of Adaptive Railway Bridges: A Case Study	1868
627	Bridge pier natural frequency estimation using the Random Decrement technique and chronological change observation	1877
172	Lifetime extension for steel railway bridges using additional damping – a case study for an existing bridge	1885
365	Required damping estimation for Rain-Wind Induced Vibration of stay cables: A preliminary evaluation	1894
100	Damage Identification of a Reinforced Concrete Bridge Pier after an Earthquake based on a Physics-informed Neural Network.....	1902
413	Actuation Modes and Actuator Placement for Vibration Control of Adaptive Slabs with Integrated Fluidic Actuators.....	1910

Timber and composite

8	Development of an Innovative Composite Steel and Cross Laminated Timber Floor System	1919
---	--	------

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches

May 18-21, 2025 | Tokyo, Japan

84	Hybrid structures for tall buildings with hardwood LVL and concrete	1927
273	Databased prefabrication of parameterized concrete formwork elements with interlocking wood joints	1935
407	Digital manufacturing and deconstructability of timber structures – Comparative analysis of material efficiency and further sustainability factors through data-driven design and production	1944
119	Norwegian Timber Bridges: Experiences, Lessons Learned from the Tretten Bridge Collapse, and Future Development	1952
30	Low-cost technologies for monitoring timber structures	1961

AI for inspection

302	Parametric modeling-based digital twinning technology for bridge inspection....	1969
528	A transfer learning strategy for SHM of roadway bridges via domain adversarial neural networks.....	1976
197	Utilizing Digital Twins for Emergency Inspection and Remote Diagnosis of Earthquake-Affected Bridges.....	1983
208	Recognition of Apparent Defects in Bridge Cable Bundle Wraps Based on Deep Learning Algorithms.....	1992
579	Extraction of Anomaly-Sensitive Features for Reinforced Concrete Deck Slabs of Steel Girder Bridges using Perturbation-Based Convolution Autoencoders	2000
213	Post-disaster building indoor damage and survivor detection using autonomous path planning and deep learning with unmanned aerial vehicles	2009
497	The contribution of advanced structural inspection methodologies to enhancing the sustainability of the built environment.....	2018

Inspection and maintenance of cable 2

380	Effects of Hydrogen Embrittlement on the Structure and Strength of Prestressing Reinforcement	2027
429	Evaluating the Accuracy of Hanger Tension Force Measurement Using Vibration Measurements in Suspension Bridge	2034
445	Proposal and numerical verification of tension estimation method for Nielsen–Lohse bridge cables based on mode shape measurements from low to high orders.....	2040
93	Cost-effective maintenance strategy analysis for bridge suspender considering lifetime corrosion fatigue degradation	2048
294	Experimental and theoretical investigation of Dynamic Amplification Factors for cable systems regarding to cable-stayed	2056
531	Development of rotational friction dampers for cable stayed bridges.....	2064

Technologies in construction

267	Environmental sensitivity analysis of excavation process for deep foundation pit near railway in soft soil area.....	2072
-----	--	------

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches

May 18-21, 2025 | Tokyo, Japan

325	Experimental Study of the Basic Performance of 3D-Printed Stainless- Steel Plates for Application to Steel Bridges	2079
335	Optimisation and testing of an additively manufactured steel bridge	2085
406	Mitigation Measures against Pile Runs during Offshore Wind Installation	2094
205	Fundamental Study on Continuous Estimation of Vertical Displacement during PC Bridge Construction.....	2102
136	Geometry Control of the Braila Suspension Bridge Over the Danube in Romania	2109
387	Experimental 3D printed concrete footbridge	2116

SS15: Bridge Weigh-in-Motion for Sustainable Bridge Management-2

35	Rethinking the Need for Using Weights from Bridge Weigh-In-Motion as Damage Indicators.....	2124
297	Integrating Piezoelectric Sensors for Bridge-Weigh-In-Motion	2132
353	Physics-informed data-driven identification of heavy vehicle responses of an orthotropic steel deck	2141
476	Enhancement of B-WIM Using Time-Frequency Analysis of Bridge Acceleration Responses and Neural Networks.....	2149
547	Validation of Structural Behavior by Field Measurement and Continuous Data Acquisition for Infrastructure Management	2157
275	Preliminary Investigation of Vehicle-Bridge Interaction Using Instantaneous Frequency Response Functions	2165

Sustainable building elements

392	Experimental Study on RC Structures with Recycled CFRP Hoops.....	2172
447	Tensile behaviors of reinforced-UHPC members subject to uniaxial loading: experiment and numerical simulation	2179
55	Development of a Nonlinear Model of RC Beams Strengthened with Externally Bonded Basalt Fiber Reinforced Polymer.....	2188
239	The reserved design and engineering practice of light rail transportation on the Macau Sai Van Bridge	2197
152	EVALUATION OF ULTIMATE FLEXURAL STRENGTH AND DEFORMATION PERFORMANCE OF CONCRETE-FILLED SQUARE STEEL TUBULAR COLUMNS CONTAINING HIGH-STRENGTH MATERIALS	2205
430	The Influence of Galvanization on the Flexural Buckling of HSS CFCHS.....	2213
555	Structural Performance of a Multi-unit Friction Damper with Tension Braces for Large Loads	2222

Load and dynamic characteristics

279	A Study of Human Forcing Functions to Evaluate Vibration Serviceability of Structures	2230
116	Human-Induced Vibration and Damping in Richly Shaped Inverted Fink Truss Footbridges.....	2237

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches

May 18-21, 2025 | Tokyo, Japan

638	Dynamic 3D Modeling of Vehicle-Bridge Interaction Systems Considering Foundation Settlement.....	2246
639	Information Entropy in Bridge Structural Health Monitoring from the Perspective of Structural Physical Parameter Identification.....	2254
640	Preliminary Evaluation of Modal Parameters of Cable-stayed Bridges with Limited Known Information.....	2260
308	Enhancing the seismic performance of offshore marine platforms using passive devices	2267
494	Wind Load on a Square Cylinder Placed Horizontally in Boundary Layer Flow Using Roughness Blocks	2276

Energy-dissipating devices for disaster resilience

589	Vibration control of beams under moving loads using grounded tuned mass inerter systems	2285
99	Comparative Investigation of Pressure-Adjustment Fluid Viscous Damper Performance Under Moderate and High Seismic Intensity	2294
538	Analytical study about mechanical behavior of hysteresis dampers using bent steel plates for base isolated structures under bi-directional loading	2303
577	Shaking Table Tests of a Single Spherical Sliding Bearing with Highly durable Sliding Material.....	2311

SS14: Dynamic Bridge Assessment and Performance

483	Development of an innovative full-scale Digital Twin Structural Tool for predicting dynamic footbridge performance	2318
485	AI-Assisted Computer Vision with Structural Sensors for Enhanced Bridge Health Monitoring.....	2327
33	Computation-Effective Method for Prestress Force and Moving Force Identification	2336
281	Evaluation of the Vibrations of a Bridge Due to Human Movements During a Marathon Event.....	2343
498	An innovative, full-scale digital twin solution to enhance the understanding of dynamic behavior of the Matagarup Footbridge.	2352
520	Displacement Prediction by Acceleration of Bridge Pier Using Long Short-Term Memory	2360

Bamboo structure

135	Comparative Analysis of Bamboo Connections using ANSYS.....	2367
231	Experimental Study on the Bearing Capacity of Bolted T-Connection for Bambusa blumeana	2376
256	Compressive performance of parallel strand bamboo pin groove under different loading angles	2382
292	Tensile Behavior of Coated Bamboo (Bambusa blumeana J.A. & J.H. Schultes) Textile Reinforced Mortar (TRM)	2389

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches
May 18-21, 2025 | Tokyo, Japan

443	Mechanical Performance of Treated Bambusa blumeana (Bamboo) Fiber Textile Using Wide-width Tensile Test	2397
64	Structural morphology of bamboo focusing on relationship between culm geometries and mechanical characteristics	2403
 AI for construction		
218	Research on automatic construction of simulation models of road bridges for earthquake damage assessment at urban scale	2411
614	Capturing Images for Photogrammetry of Concrete and Masonry Arch Bridges ..	2419
248	AI-Assisted Bridge Scheme Design Based on Diffusion Model.....	2427
148	Exploring the Use of Large AI Models for Floor Live Load Surveys: A Preliminary Study	2435
32	Robot Process Automation protocol for the calibration of structural parameters in structural BIM	2443
 Steel elements in construction		
42	Welding distortion of thin sheet metal using Wire Arc Additive Manufacturing ..	2451
568	Evaluation of Through-Thickness Residual Stress at T-Joint Weld Toes Using Slitting Method	2459
115	Numerical Analysis of Bonding-Assisted Technology for Preventing Weld Root Fatigue Cracks: A Case Study of a Real Bridge.....	2466
259	Fatigue Strength of Fillet Welded T-Joints using New Welding Materials.....	2474
118	Experimental Study on the Rotational Loosening Mechanism of High- Strength Bolts under Service	2483
246	Experimental Study on Slip Factor for High-Strength Bolt Friction Connections with Orthogonal Slotted Holes	2490
 Monitoring Concrete bridges		
496	Investigation of bonded post-tensioning of concrete bridge structures using advanced non-destructive testing methodologies.....	2497
258	Damage detection in post-tensioned concrete bridges using distributed fiber optic sensors	2505
189	Evaluation of Distribution of Tensile Force on External Prestressing Cable Using Fiber Optic Measuring Method	2513
113	Damage Evaluation of UHPFRC Repaired RC Piers Using Optical Fiber	2520
311	Creating Crack Images of Precast Segmental Piers using Vibration Measurement and Convolutional Neural Networks	2528
276	Evaluation on the Load-Bearing Capacity of a Reinforced Concrete Bridge Using Non-Destructive Testing	2536

SS10: Uncertainty Characterization of Natural Disasters and Its Implications on Safety Assessment and Resilience Enhancement of Engineering Structures

478	Global dynamic reliability analysis of large floating offshore wind turbine under 3-directional wind and wave loads.....	2543
620	Dynamic reliability-based parameter optimization of tuned viscous mass damper using adaptive Kriging surrogate model	2552
340	Analytical Solution of Generalized Probability Density Evolution Equation for the Diffusion Process of Chloride Ions in Concrete and Diffusion Process Analysis	2560
79	Quantifying error in finite-element models of steel railway bridges.....	2567
124	Damage and Loss Assessment of School Buildings in Manila City	2574
201	Seismic Fragility Assessment using Explainable Deep Kernel Learning Surrogate Model considering Structural and Seismic Uncertainties	2581

Sustainable bridge elements

202	Reusable frame optimisation using welded and bolted joints.....	2590
120	Laser- and laser-hybrid welding of steel bridge structures.....	2599
87	Superior Corrosion resistance of Sn bearing steel under severe corrosion condition and its application for steel bridges.....	2607
80	Stress Transfer Mechanism of a Novel Pile Cap System Comprising Concrete-Filled Dual Steel Tubes.....	2614
441	Investigations on a Demountable Connection for Reusable Concrete Slab Segments	2622
457	Green Value Stream Mapping for Realizing Sustainability in Urban Road Construction using the DMAIC Approach.....	2630

Reinforced concrete elements

92	Simplified Modelling Method of Integral Abutment Bridges with Equivalent soil-pile system	2639
526	Analytical study on tensile test of CFRTP rods with anchoring devices	2647
522	Influence of Material Properties and Bond Characteristics on Structural Behavior of Patch-Repaired RC Beams	2656
377	Effect of External Steel Wire Rope Strengthening on the Flexural Behavior of RC Beams	2664
401	The role evaluation of the biaxial tension stiffening of rebars and crack behaviors on the performance of low-reinforced concrete panels.....	2672
375	Parametric Study on Reinforced Concrete Joint with Quench- Tempered Steel...	2681

Steel element characteristics 1

369	Analytical Study on Ultimate Strength and Deformation of Stiffened Plates Made of Different Steel Grades	2690
357	Comparison of Material Hysteresis Models for Steel Beam Analysis	2698
158	Full - Bridge Digital Fatigue Tests on Two Kinds of Distortion-induced Fatigue Cracks at Web Gaps in Steel Plate Girder Bridges.....	2707

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches

May 18-21, 2025 | Tokyo, Japan

584	Flexural strength and behaviour of cold rolled purlins with complex longitudinal stiffeners.....	2715
131	Numerical analysis evaluation on load-carrying capacity for corroded girder end structures.....	2724
331	Structural improvement of orthotropic steel decks focusing on fatigue durability and manufacturing cost.....	2732

SS18: Advanced Technologies for the Maintenance Cycle of Structures and Infrastructure 1

110	Numerical investigations on fatigue life of aging bridges according to maintenance scenarios against disintegration progress.....	2740
309	Study on the assessment of fresh concrete properties using image analysis	2748
178	Corrosion Inspection of PC Box Girder Bridge and its Residual Structural Performance	2754
221	Clarification of Fracture Behaviour of RC Pillar with 3D Concrete Printing Buried Formwork Based on Elastic Wave Technique	2762
229	Seismic performance of RC column surrounded by 3D printed concrete permanent formwork with short fiber	2770

Performance of Timber member 1

122	Evaluating the In-Plane Shear Capacity of Tongue-and-Groove Panels.....	2779
200	Bending test of the laminated veneer lumber beam with screws or bolts.....	2788
244	Estimation of Young's modulus for members of Timber bridge by vibration measurement test	2795
428	Development of a Deconstructable Connection for Reinforced Timber Frames...	2802
47	Experimental Study of Local Bulging Failure of Buckling-Restrained Braces with Timber Restraints	2808

SS17: Managing a Large Number of Small Bridges with Limited Manpower

159	Aggregation of Issues and Needs about Maintenance of Municipal Road Bridges in Hokuriku Region	2816
433	Inferring Deflection from Acceleration Measurements of a Slab Deck Under Live Load	2825
515	Simple Repairs to Short Span Concrete Bridges and Their Effectiveness	2831
575	Structural performance of full-scale RC box culverts used as short-span bridges.	2837

Inspection technologies 1

81	Development of a Prediction Method for Physical and Chemical Deterioration near the Surface Layer of Concrete Structures utilizing Laser Technology	2845
540	Unfilled grout investigation in PC bridge using 3.95MeV High-energy X-ray generator	2853

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches
May 18-21, 2025 | Tokyo, Japan

147	Detection of Compressive Damage in Reinforced Concrete Columns Using Piezoelectric Joint Sensors	2861
194	Development of an Autonomous Inspection Robot for Concrete Structures.....	2867
19	Experience of Underwater Inspection of Bridge Piers	2876

Bridge corrosion and fatigue countermeasures

253	Research and Development on Appropriate Use of Weathering Steel Bridges in Japan	2884
130	Statistical measurement condition of rust thickness on weathering steel bridges	2893
348	Research on the anticorrosion performance of silicone and its coating method	2900
277	Investigation on the rational cut-out shape for fatigue countermeasure in vertical stiffeners of orthotropic steel decks	2909
367	Novel method for joining stainless steel plates using metal thermal spraying	2917

SS22+SS24: Advanced Digital Twinning Techniques for Civil Infrastructure

516	Construction of a point cloud FE model for a real structure with local damage and evaluation of its element shape	2925
399	Bridge Condition Assessment and Modelling Based on Images and Digital Twins	2934
438	Design, construction and testing of curved overpass using BrIM technologies	2943
105	Research on Rotation Construction Monitoring System of Cable-stayed Bridge Based on Digital Twin	2952
364	Integration of Digital Twins for the Preventive Monitoring of Load- Bearing Glass Facades	2961

SS27: Eddy Current Damping, Electromagnetic Damping, and Vibration Control

422	Large-scale substructure dynamic tests of a tuned viscous mass damper coupled wall system	2968
551	Eddy Current-Friction Hybrid Damper: A New Solution for Longitudinal Motion Control in Suspension Bridges	2976
567	Vibration control of stay cables with eddy current/electromagnetic dampers.....	2984

Design of Concrete and Composite bridges

621	Nonlinear Analysis of Externally Prestressed Reinforced Concrete Beams with Varying Deviators and Tendon Configurations	2992
66	A Numerical Case Study of Partial Composite Action as a Strengthening Method in Steel-Concrete Bridges	3001
393	Structural Plan and Design of Multi-Span Composite Rigid Bridge for the Unforeseen Risk on Soft Ground	3010
233	Stress Distribution in the Concrete Slab of Composite Cable-stayed Bridges	3018
423	Experimental study on Composite Connections Piers with different rebar connection	3027

Steel element characteristics 2

360	The experimental study of the tensile behavior of the unseating prevention cable with damages as earthquake-resistant devices.....	3036
237	Improvement Study of the Proposed Beam-Column Carbon Minimized Dismantle Connection (CNDC) using Three-Dimensional Finite Element Analysis	3044
193	Residual Stress Distributions of Welded Joints Assembled by Normal Steel and High-strength Steel.....	3051
644	Temperature Field Simulation Method and Average Temperature Prediction on Main Cables of Suspension Bridges.....	3059
88	The Future of Fatigue Design of Steel Structures - Eurocode 2 nd Generation? ...	3068

SS18: Advanced Technologies for the Maintenance Cycle of Structures and Infrastructure 2

257	Non-destructive in-situ soil classification using electric and seismic properties to evaluate water pipeline corrosion risk.....	3076
397	Localizing Subsurface Voids by GPR 3D Scanner with Unsupervised Anomaly Detection	3085
161	Social Impact Assessment of Bridges Based on Detour Simulation Using Virtual Person Trip Data	3094
439	Sustainable Bridge Bearings and Expansion Joints.....	3100

Performance of Timber member 2

314	Development of Hybrid Multi-Angle Laminated Timber Panel for Bridge Deck Applications for advancing sustainability.....	3107
326	Thin concrete-timber-composite floors reinforced with basalt textile	3115
490	Engineered Bamboo Composite (EBC) and Its Applications to Building Structures: An Overview.....	3124
511	An Experimental Study of Bamboo-Reinforced Concrete Slab under Concentrated Load	3133
28	Cross-Laminated Timber Shear Walls Coupled with Steel Link Beams and Hold-Down Dampers: An Optimization Case Study	3141

New energy facilities / Carbon Neutral

13	Enhanced structural health monitoring for large-scale offshore photovoltaic systems based on response pattern recognition	3150
171	Comprehensive analysis of wind effects on rooftop solar photovoltaic arrays: implications for load design	3158
329	Quantifying Carbon Dioxide in Biochar Concrete Using Thermogravimetric Analysis	3166
561	An Automated Linked Data Approach for Integrating a TGO Embodied Carbon Emissions Material Database with BIM Models.....	3174

Inspection technologies 2

227	Deterioration Assessment of Road Bridge RC Deck Slabs through Measurement of Slab Inclination Angles	3184
137	Optimizing Mix Designs for Enhanced Electrical Conductivity in Self-Sensing Concrete: A Comprehensive Review	3192
295	Subsurface Damage and Pipe Detection of Bridge Decks and Roads by Deep-Learning Based GPR Inversion with Unsupervised Domain Adaptation	3200
21	Bridge Laboratory at Siberian Transport University: 65 Years in the Survey	3208
141	Basic Study on Mechanisms of Disintegration of Concrete in Bridge Slabs by Wheel Load Running Test on Simulated Damaged RC Beams	3216

Construction of buildings

59	Damage detection and monitoring for steel base plate of exposed column through micro-strain measurement.....	3225
343	Material composition for sustainable interior building elements	3233
176	Dynamic Testing and Serviceability Evaluation of Dance Induced Vibration in High Frequency Building Floor Systems	3241
643	Intelligent Detection and Risk Identification of Structural Surface Diseases Based on UAV	3250

SS04: Adaptation, Mitigation, and Resilience to Climate Change

332	Adapting to extreme risk of coastal bridges under typhoons in a life-cycle context.....	3258
85	Technical and Environmental Feasibility of Using CFRP Textile as Stay-In-Place Participating Formwork for Shape Optimised Concrete Beams	3265
209	Durability Deterioration of Reinforced Concrete Structures: A Framework Considering Climate Change Impacts.....	3273
272	Resilience of Coastal Structures Subjected to Wave Loads by Considering Dependency Effects.....	3282

Energy-dissipating devices for design and analysis

403	Energy Dissipation System with Lever Arms Using Steel Slit Damper for Vibration Control of Structures.....	3290
143	Experimental Performance of Shear Panel Dampers using a Built-up Wide Flange Beam	3296
424	Influence of hysteretic models on viscous damping in nonlinear response history analysis of buildings.....	3303
111	Experimental Study of High-Mode Buckling of Flat Steel Core in Buckling-Restrained Braces	3311
646	Neural networks for modeling high-damping rubber (HDR) damper with applications to cable vibration control.....	3319

IABSE Symposium 2025

Environmentally Friendly Technologies and Structures - Focusing on Sustainable Approaches
May 18-21, 2025 | Tokyo, Japan

Performance of Concrete bridges

91	Investigating the Reliability Performance of Concrete Bridges Designed for Normal Traffic Loading in South Africa.....	3327
76	Dynamic Analysis of Precast Modular Concrete Girder Under Various Boundary Conditions.....	3335
419	Forecasting and justification of service life of designed reinforced concrete bridges	3343
556	Investigation on the structural performance of RC beams with severe levels of DEF expansion	3352
371	Experimental and Analytical Study of RC Beams with Combined Steel Mass Loss and Spalling.....	3361

Buckling and bearing capacity

125	Quasi-static crushing behaviour of a novel re-entrant circular star- shaped auxetic honeycomb	3370
225	Heat Exposure Influence on Buckling Strength of Steel Compression Members ..	3377
404	Application of T-shaped steel splice member to brace-end connection of circular hollow section brace.....	3385
217	Investigation of Vertical Bearing Capacity Characteristics of Pile Tip in the Incomplete Plugging State of Open-Ended Steel Pipe Piles	3394
126	Finite Element Analysis on Load-carrying Capacity of Corroded Steel Plates Using GAN-generated Surface Profiles.....	3403
