# TABLE OF CONTENTS

## **LUNAR, MARS, NEAR-EARTH ASTEROIDS, DEEP SPACE EXPLORATION - SESSION 1**

|                                                                                                                                                                                                                     |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Lunar Polar Exploration (LUPEX) Project: Development Status of the Mission Instruments.....                                                                                                                         | 1  |
| <i>Yoshiaki Ishihara, Ryusuke Nishitani, Jun Nakajima, Mari Aida, Chisako Kanzaki, Hiroyasu Mizuno</i>                                                                                                              |    |
| Space-Grade Miniature Ion Selective Electrode Sensor for Extra-Terrestrial Regolith Composition Analysis.....                                                                                                       | 6  |
| <i>Deepthi L Sivadas, Jayalatha T, Devika Suresh, Rekha Krishnan G, Radhika R., Appala Raju A, Deepa Devapal, Nallaperumal M., Manu S K Pillai</i>                                                                  |    |
| TENACIOUS: Ispace Europe's Contribution to Lunar Exploration .....                                                                                                                                                  | 12 |
| <i>Sophia Casanova, Julien Lamamy, Kate Breach, Dmitri Ivanov</i>                                                                                                                                                   |    |
| Measurement of Temperature and Thermal Conductivity of High Latitude Lunar Regolith by ChaSTE Onboard Chandrayaan 3 Vikram Lander.....                                                                              | 14 |
| <i>Nizy Mathew, Fazil Mohammad, Aasik V, Subhajayan K P, M Ram Prabhu, Kiran John Antony, Kannan K, Pramod P P, Samik Jash, Dinakar Prasad Vajja, Satheesh Chandran, Dona Mathew, V Sathiyamoorthy, Lakshmi V M</i> |    |
| Building the Infrastructure for Future Sustained Lunar Habitation – Observation, Communications and Navigation. ....                                                                                                | 19 |
| <i>Alex Da Silva Curiel, Jonathan Friend, Steve Eckersley, Philip Davies, Ben Hooper, Martin Sweeting</i>                                                                                                           |    |
| Launch Opportunity and Aerobraking Strategies for Venus Mission .....                                                                                                                                               | 26 |
| <i>Gurpreet Singh, Kuldeep Negi, Satyendra Kumar Singh</i>                                                                                                                                                          |    |
| Characterizing Flux Ropes at Mars and Venus During Periods of Comparable Solar Influence.....                                                                                                                       | 30 |
| <i>Aarti Yadav, Jayesh Pabari, Shivam Saxena</i>                                                                                                                                                                    |    |

## **LUNAR, MARS, NEAR-EARTH ASTEROIDS, DEEP SPACE EXPLORATION - SESSION 2**

|                                                                                                                                  |    |
|----------------------------------------------------------------------------------------------------------------------------------|----|
| The Mission, Science and Technology Objectives of the First Turkish Lunar Mission .....                                          | 34 |
| <i>Burak Yaglioglu, Biter Boga Inaltekin, Bulent Avenoglu, Mustafa Mehmet Nefes</i>                                              |    |
| Overview of AROSE Lunar Trailblazer Rover Design.....                                                                            | 47 |
| <i>Siddharth Pandey, Dawn McIntosh</i>                                                                                           |    |
| Learning Based Modeling of Throttleable Engine Dynamics for Lunar Landing Mission .....                                          | 51 |
| <i>Suraj Kumar, Aditya Rallapalli, G. V. P. Bharat Kumar</i>                                                                     |    |
| Astronomy from the Moon: Role of LUT Onboard CE-3 .....                                                                          | 57 |
| <i>Gaurav Singh</i>                                                                                                              |    |
| Impact of CME on Solar Wind: First Results from Plasma Analyser Package for Aditya (PAPA) Payload Onboard Aditya-L1 Mission..... | 62 |
| <i>R Satheesh Thampi</i>                                                                                                         |    |
| Transcending Earthly Architecture: Modernism's Influence on Sustainable Lunar Habitat Design.....                                | 68 |
| <i>Aathira Peedikaparambil Somasundaran</i>                                                                                      |    |

|                                                                         |    |
|-------------------------------------------------------------------------|----|
| Lunar Polar Exploration (LUPEX) Project: Surface Planning Overview..... | 94 |
| <i>Hiroka Inoue, Makiko Ohtake, Shinya Kosaka, Takeshi Hoshino</i>      |    |

### **LUNAR, MARS, NEAR-EARTH ASTEROIDS, DEEP SPACE EXPLORATION - SESSION 3**

|                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------|-----|
| Re-Orbiting Chandrayaan-3 Propulsion Module: An Experimental Journey from Moon to Earth's Orbit .....                          | 100 |
| <i>Satyendra Singh, Kuldeep Negi</i>                                                                                           |     |
| Application of Gravity Assist Maneuvers for Transferring an Asteroid into a Moon-Resonant Earth Satellite Orbit .....          | 105 |
| <i>Olga Chernenko, Natan Eismont</i>                                                                                           |     |
| Conceptual Design and Scheme of Work for Nanosatellites and Balloon Probe for the Deep Exploration of Venus .....              | 115 |
| <i>Michael Vincent Quispe Mendoza, Victor Aleksandrovich Vorontsov</i>                                                         |     |
| Lunar Exospheric Composition as Revealed by CHACE-2 Aboard Chandrayaan-2 Orbiter .....                                         | 121 |
| <i>Dhanya M B</i>                                                                                                              |     |
| Bhartiya Extraterrestrial Expandable Modular Habitat: A Modular Panel Based Architecture .....                                 | 126 |
| <i>Mritunjay Baruah, Amogh Jadhav, Bimalendu Mahapatra, Shubhanshu Shukla, Alope Kumar</i>                                     |     |
| Solar Occultation Experiments (SOE) for Exploring the Venusian Atmosphere: Methodology and New Insights from Simulations ..... | 133 |
| <i>Sunil Kumar Sv, Jayadev Pradeep, Dinakar Prasad Vajja, Varun Nikam</i>                                                      |     |

### **LUNAR, MARS, NEAR-EARTH ASTEROIDS, DEEP SPACE EXPLORATION - SESSION 4**

|                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Miniaturised French Instruments for In-Situ Missions.....                                                                                                                 | 140 |
| <i>Pierre W. Bousquet, Gabriel Pont, Guillaume Rioland, Cedric Virmontois, Charles Yana</i>                                                                               |     |
| Chandrayaan-3:Landing Site Selection Near South Pole Region and Reaching to Shiva-Shakti Point .....                                                                      | 149 |
| <i>Naga Manjusha Jammula, Ritu Karidhal, Amitabh Amitabh, Suresh Suresh K</i>                                                                                             |     |
| Russian Lunar Science Program: Missions, Experiments and Cooperation Opportunities .....                                                                                  | 154 |
| <i>Anatoli Petrukovich, Lev Zelenyi, Igor Mitrofanov, Vladislav Tretyakov, Dmitry Zarubin, Konstantin Anufreichik</i>                                                     |     |
| Exploration of Lunar Plasma Environment Using RAMBHA-LP Onboard Chandrayaan-3 Lander .....                                                                                | 158 |
| <i>G Manju, Tarun Kumar Pant, N Mridula, Ambili Kailasam Madathil, Mosaraff Hossain, Pradeepkumar P, Johns Paul, Sreelatha P, Satheesh Thampi, Rosmy John, Aneesh A N</i> |     |
| EUROHAB: A Lunar Secondary Habitat Platform for Space Analogue Mission .....                                                                                              | 163 |
| <i>Nisheet Singh, Peter Weiss, Mohamed Makthoum Peer Mohamed, Thibaut Pouget, Katherine Mulry, Nathan Licha</i>                                                           |     |
| Super Resolution on Chandrayan-2 TMC Data Using Generative Adversarial Network Approach.....                                                                              | 173 |
| <i>Jai Singla, Hinal Patel, Amitabh Amitabh, Nitant Dube</i>                                                                                                              |     |

## **LUNAR, MARS, NEAR-EARTH ASTEROIDS, DEEP SPACE EXPLORATION - SESSION 5**

|                                                                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Lunar Polar Exploration (LUPEX) Project: Development Status of the Rover System.....                                                                                               | 184 |
| <i>Masataku Sutoh, Sachiko Wakabayashi, Jun Shimada, Ryo Hirasawa, Natsu Fujioka, Lisa Katoh, Masatsugu Otsuki, Naoki Kiyono, Tomohiro Oya, Ryusuke Nishitani, Takeshi Hoshino</i> |     |
| Rutherford's Extended Formula and Its Application in the Interplanetary Mission Design Using Multiple Gravity Assist Maneuvers.....                                                | 190 |
| <i>Alexey Grushevskii, Yury Golubev, Andrey Tuchin, Denis Tuchin, Victor Koryanov</i>                                                                                              |     |
| Landing Site Selection Around Shackleton Crater on South Pole of Lunar Surface: Opportunities and Challenges .....                                                                 | 194 |
| <i>Amitabh Amitabh, Suresh Suresh K, Abdullah Suhail, Ajay K Prashar, Nitant Dube</i>                                                                                              |     |
| ILOA 7 Moon Missions -- 2025 Update: Flagship / Backup, 3 Precursors, Human Service Mission, First Women on the Moon .....                                                         | 200 |
| <i>Steve Durst</i>                                                                                                                                                                 |     |

## **LUNAR, MARS, NEAR-EARTH ASTEROIDS, DEEP SPACE EXPLORATION - IP SESSION**

|                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Comparative Study of Radiation and Seismic Environments on the Lunar Nearside and Farside .....                                                 | 205 |
| <i>Sarath Raj Nadarajan Syamala, Ayush Harish Kumar, Yash Pradeep Dhake</i>                                                                       |     |
| Advancing Mars Ariel Exploration: Preliminary Design, Analysis and Optimization of a Bio-Inspired Martian UAV .....                               | 218 |
| <i>Prisha Asher</i>                                                                                                                               |     |
| Real Time Powered Descent Guidance for Mars Using a Multi-Level Optimization Algorithm .....                                                      | 223 |
| <i>Shriram Swaminathan, Sunanda Lona C</i>                                                                                                        |     |
| System Level Ground Experimental Simulation Tests on MOM Propulsion System .....                                                                  | 237 |
| <i>Venkata Reddy</i>                                                                                                                              |     |
| Establishing a Moon Village Using In-Situ Resources and Nuclear Energy .....                                                                      | 244 |
| <i>Ugur Guven, Rajesh Yadav, Ena Goel, Gurunadh Velidi, Aman Kumar Panda</i>                                                                      |     |
| Phthalonitrile -Cyanate Ester Interpenetrating Network (IPN) as Matrix for Light Weight TPS Composites; Thermal and Ablative Characteristics..... | 248 |
| <i>Satheesh Chandran, Niranjana Sreelal, Sunitha K, Santhosh Kumar K S</i>                                                                        |     |
| Cultural Imaginaries of Contemporary Space Exploration Missions in India, United States, New Zealand and Antarctica: A Comparative Analysis ..... | 261 |
| <i>Anna Szolucha, Rashmi M</i>                                                                                                                    |     |
| Ascendence on Ares: An Integrated Dual-Lander System for Fuel Transfer and Crew Operations on Mars.....                                           | 272 |
| <i>Aagam Jain, Shubharun Das</i>                                                                                                                  |     |
| Single-Step High Pressure Electrochemical Oxygen and Hydrogen Generation System for Sustainable Space Habitation .....                            | 281 |
| <i>Surajeet Mohanty, Vinay Mohan Bhardwaj, Arjun Raj Murugan, Nandikesn P, Samrat Deb Choudhury, Shaneeth M</i>                                   |     |
| Comparative Analysis of Traditional Vs. Electromagnetic Docking Methods for Small Satellites.....                                                 | 287 |
| <i>Gagana Y, Rishika Banerjee</i>                                                                                                                 |     |

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| Relevance and the Scope of the Development of Physics Based Models for the Planetary Atmosphere/Ionosphere.....      | 290 |
| <i>Ambili Kailasam Madathil, Raj Kumar Choudhary, Arya Ashok</i>                                                     |     |
| The Concept of Ballistic Missions to Redirect Spacecraft from Libration Points to near-Earth Asteroids.....          | 297 |
| <i>Maxim Pupkov, Natan Eismont, Olga Starinova, Konstantin Fedyaev, Olga Chernenko</i>                               |     |
| Dynamical Characteristics of the Venusian Atmosphere: Insights for Future in Situ Exploratory Missions to Venus..... | 301 |
| <i>Jayadev Pradeep, Sunil Kumar Sv, Varun Nikam</i>                                                                  |     |
| Aerothermodynamic Design & Characterization for a Typical Lunar Sample Return Module.....                            | 312 |
| <i>Mayank Kumar, Vinod Kumar, Sharan Rai, Gopalsamy Muthiah, Vidya G, Malakarjun Mahadeo Patil</i>                   |     |
| Exploring the Moon with Hopping Robots: Enabling Efficient, Dynamic Mobility for Lunar Surface Exploration.....      | 317 |
| <i>Nidhi Nidhi, Sandeep R, Biju Prasad B</i>                                                                         |     |
| Lunar Polar Exploration (LUPEX) Project: Latest Status of the Project.....                                           | 325 |
| <i>Dai Asoh, Hiroka Inoue, Masataku Sutoh, Yoshiaki Ishihara, Takeshi Hoshino</i>                                    |     |
| A Study on the Exploration of the Solar System Beyond Jupiter's Orbit by Using Small Satellites .....                | 330 |
| <i>Vladislav Zubko, Andrey Belyaev, Olga Chernenko</i>                                                               |     |
| Market Analysis and Strategies for High-Performance Lunar Observation Data.....                                      | 338 |
| <i>Kangsan Kim, Gagana Y, Pranjal Mhatre</i>                                                                         |     |
| Enabling Swarm Bots Sustainability: Wireless Charging for Exploring Lunar Lava Tubes .....                           | 348 |
| <i>Gagana Y, Rishika Banerjee, Kangsan Kim</i>                                                                       |     |
