2025 IEEE/ACM 47th International Conference on Software Engineering: Companion Proceedings (ICSE-Companion)

ICSE-Companion 2025

Table of Contents

Message from the ICSE 2025 General Co-Chairs ..... **xii**
ICSE Demonstrations Committees ..... **xvi**
Doctoral Symposium Committees ..... **xvii**
Industry Challenge Committees ..... **xix**
ACM Student Research Competition (SRC) Committees ..... **xx**

Demonstrations

GUIDE: LLM-Driven GUI Generation Decomposition for Automated Prototyping 1
Kristian Kolthoff (Clausthal University of Technology, Germany), Felix Kretzer (Human-Centered Systems Lab, Karlsruhe Institute of Technology, Germany), Christian Bartelt (Clausthal University of Technology, Germany), Alexander Maedche (Human-Centered Systems Lab, Karlsruhe Institute of Technology, Germany), and Simone Paolo Ponzetto (University of Mannheim, Germany)

A-COBREX : A Tool for Identifying Business Rules in COBOL Programs 5
Samveg Shah (Indian Institute of Technology, India), Shivali Agarwal (IBM Research, India), Saravanan Krishnan (IBM Research, India), Vini Kanvar (IBM Research, India), and Sridhar Chimalakonda (Indian Institute of Technology, India)

VReqST: A Requirement Specification Tool for Virtual Reality Software Products 9
Sai Anirudh Karre (IIIT Hyderabad, India), Amogha A Halhalli (IIIT Hyderabad, India), and Raghu Reddy Y (IIIT Hyderabad, India)

SIT: An Accurate, Compliant SBOM Generator with Incremental Construction 13
Changguo Jia (Peking University, China; Key Laboratory of High Confidence Software Technologies, China; Zhongguancun Laboratory, China), Nianyu Li (Zhongguancun Laboratory, China), Kai Yang (Zhongguancun Laboratory, China), and Minghui Zhou (Peking University, China; Key Laboratory of High Confidence Software Technologies, China)

The Software Librarian: Python Package Insights for Copilot 17
Jasmine Latendresse (Concordia University, Canada), Nawres Day (ISSAT Soute, Tunisia), SayedHassan Khatoonabadi (Concordia University, Canada), and Emad Shihab (Concordia University, Canada)

AutoRestTest: A Tool for Automated REST API Testing Using LLMs and MARL 21
Tyler Stennett (Georgia Institute of Technology, USA), Myeongsoo Kim (Georgia Institute of Technology, USA), Saurabh Sinha (IBM Research, USA), and Alessandro Orso (Georgia Institute of Technology, USA)

FairLay-ML: Intuitive Debugging of Fairness in Data-Driven Social-Critical Software 25
Normen Yu (Pennsylvania State University), Luciana Carreon (University of Texas at El Paso), Gang Tan (Pennsylvania State University), and Saeid Tizpaz-Niari (University of Texas at El Paso)

Closing the Gap Between Sensor Inputs and Driving Properties: A Scene Graph Generator for CARLA 29
Trey Woodlief (University of Virginia, USA), Felipe Toledo (University of Virginia, USA), Sebastian Elbaum (University of Virginia, USA), and Matthew B. Dwyer (University of Virginia, USA)

LEGOS-SLEEC: Tool for Formalizing and Analyzing Normative Requirements 33
Kevin Kolyakov (University of Toronto, Canada), Lina Marsso (University of Toronto, Canada), Nick Feng (University of Toronto, Canada), Junwei Quan (University of Toronto, Canada), and Marsha Chechik (University of Toronto, Canada)

IFSE: Taming Closed-box Functions in Symbolic Execution via Fuzz Solving 37
Qichang Wang (East China Normal University, China), Chuyang Chen (Ohio State University, USA), Ruiyang Xu (East China Normal University, China), Haiying Sun (East China Normal University, China), Chengcheng Wan (East China Normal University, China), Ting Su (East China Normal University, China), Yueling Zhang (East China Normal University, China), and Geguang Pu (East China Normal University, China)

GeMTest: A General Metamorphic Testing Framework 41
Simon Speth (Technical University of Munich, Germany) and Alexander Pretschner (Technical University of Munich, Germany)

OptCD: Optimizing Continuous Development 45
Talank Baral (George Mason University), Emirhan Oğul (Middle East Technical University), Shanto Rahman (University of Texas at Austin), August Shi (University of Texas at Austin), and Wing Lam (George Mason University)

Poster

HyperCRX 2.0: A Comprehensive and Automated Tool for Empowering GitHub Insights 49
Yantong Wang (East China Normal University, China), Wei Wang (East China Normal University, China), Xiaoya Xia (Open Source Program Office, Ant Group, China), Yenan Tang (Alibaba Group, China), Fenglin Bi (East China Normal University, China), Fanyu Han (East China Normal University, China), Jiaheng Peng (East China Normal University, China), Shengyu Zhao (Tongji University, China), and Lan You (Hubei University, China)

Doctoral Symposium

Session 1: Security & Miscellaneous

Advancing Secure and Standard Source Code Generation Techniques 53
Mohammed Latif Siddiq (University of Notre Dame, USA)

Towards Secure and Interactive Smart Contract Code from Formal SYMBOLEO Specifications 58
Sofana Alfuhaid (University of Ottawa, Canada)

Empirically-Informed Approaches to Shift Vulnerability Detection to the Left 63
Paschal C. Amusuo (Purdue University, USA)

A BizDevOps-Aligned Framework for Integrating Security Practices in Agile Software Development 68
Alejandra Selva-Mora (University of Costa Rica, Costa Rica)

Towards Realistic, Applicable and Feasible Configuration-Aware Performance Modeling 71
Yuanjie Xia (University of Waterloo, Canada)

Session 2: Human aspects

Decoding Diversity: Understanding its Impact on Team Performance in Software Teams 76
Kezia Devathasan (University of Victoria, Canada)

Diverse Participation and Newcomer Risk Perception in Open Source Software Communities 81
Hana Frluckaj (University of Texas-Austin)

A Framework for Supporting Transparency in Software Ecosystems Portals from the Point of View of Developer Experience 87
Rodrigo Oliveira Zacarias (Federal University of the State of Rio de Janeiro (UNIRIO), Brazil)

Studying and Improving Code Understandability Through Atoms of Confusion 92
Guoshuai Shi (University of Waterloo, Canada)

Understanding and Improving Code Review of Changes in Build Systems 97
Mahtab Nejati (University of Waterloo, Canada)

Session 3: Maintenance

Concern-based Management of Software Design Complexity 102
Jason Lefever (Drexel University)

Mitigating Waste That Tacitly Accrues in Continuous Integration Pipelines 107
Nimmi Rashinika Weeraddana (University of Waterloo, Canada)

Automated Detection and Refactoring of Mock Clones in Java Projects 112
Gengwu Zhao (Stevens Institute of Technology, USA)

Practical Preprocessing of Logs at Scale 117
Jianchen Zhao (University of Waterloo, Canada)

Session 4: Testing

TestifAI: Probabilistic Context-Aware Testing For Safe Deep Learning Models 122
Arooj Arif (Northeastern University)

Foundation Models for Automatic Issue Labeling 127
Giuseppe Colavito (University of Bari, Italy)

Automatically Generating Single-Responsibility Unit Tests 132
Geraldine Galindo-Gutierrez (Universidad Católica Boliviana)

Automatic Test Case Generation for Smart Human-Centric Ecosystems 135
Alind Xhyra (Università della Svizzera Italiana (USI), Switzerland)

A Framework for On the Fly Input Refinement for Deep Learning Models 140
Ravishka Rathnasuriya (University of Texas at Dallas, USA)

Posters

Build and Runtime Integrity for Java 145
Aman Sharma (KTH Royal Institute of Technology, Sweden)

Interactions with Generative AI: Wearables to Measure Developer Experience and Productivity Objectively 148
Charlotte Brandebusemeyer (University of Potsdam, Germany)

Understanding and Supporting the ML Supply Chain Through ML Bill of Materials 151
Trevor Stalnaker (William & Mary, USA)

Rethinking Software Development Considering Collaboration with AI Assistants 154
Benedetta Donato (University of Milano-Bicocca, Italy)

Exploring GenAI-Driven Innovation in Game Development 157
Xiang Chen (University of Waterloo, Canada)

Towards Fully-Traceable Human-Centred Design 160
Christopher William Schankula (McMaster University, Canada)

User Perceptions of Ethical Issues in Software 163
Tom Patrick Humbert (Vrije Universiteit Amsterdam)

Advancing Cognitive Inclusivity in Software Engineering Tools and Practices 166
Faith Culas (University of Auckland, New Zealand)

Human-Centric Requirements Engineering for Digital Health Software for Ageing People 169
Yuqing Xiao (Monash University, Australia)

Improving Software Team Communication Through Social Interventions in Project Management Tools 172
April Clarke (University of Canterbury, New Zealand)

Decoding the Impostor Phenomenon: Unveiling Factors and Mitigation Strategies for Software Professionals 175
Paloma Guenes (Pontifical Catholic University of Rio de Janeiro, Brazil)

Customer Validation, Feedback and Collaboration in Large-Scale Continuous Software Development 178
David Molamphy (Dell Technologies & University of Limerick, Ireland), Brian Fitzgerald (University of Limerick, Ireland), and Kieran Conboy (University of Limerick, Ireland)

Addressing Recurring Bugs and Workflow Challenges in Quantum Software Engineering 181
Jake Zappin (William & Mary, USA)

Distilling Reference Architectures from Open Source Repositories 184
Thi Dinh Tran (Gran Sasso Science Institute, Italy)

Towards Quality Assurance of Natural Language in Code 187
Renyi Zhong (The Chinese University of Hong Kong, China)

Semantic-Aware Replicated Data Types for Improved Conflict Resolution in Near-Synchronous Code Collaboration 190
Leon Freudenthaler (FH Campus Wien/TU Wien, Austria)

Energy Efficiency Through Architectural Tactics for Self-Adaptive Cloud Systems 193
Henrique Medeiros (Télécom SudParis, Institut Polytechnique de Paris, France)

Augmenting the Generality and Performance of Large Language Models for Software Engineering 196
Fabian C. Peña (University of Passau, Germany)

Automated Repair of Cyber-Physical Systems 199
Pablo Valle (Mondragon University, Spain)

Structured State Space Exploration of Dash+ Models 202
Aditya Shankar Narayanan (University of Waterloo, Canada)

Intelligent Automation for Accelerating the Repair of Software Build Failures 205
Gengyi Sun (University of Waterloo, Canada)

Trustworthiness of Large Language Models for Code 208
Dipin Khati (William & Mary, USA)

SRC - ACM Student Research Competition

Automatic Fuzz Drivers for JavaScript with Type Distributions 211
Mayant Mukul (University of British Columbia)

CASS: Context-Aware Slice Summarization for Debugging Regression Failures 213
Sahar Badihi (The University of British Columbia, Canada)

Characterising Algorithm Debt in Machine and Deep Learning Systems 216
Emmanuel Iko-Ojo Simon (Australian National University, Australia)

Consistent Graph Model Generation with Large Language Models 218
Boqi Chen (McGill University, Canada)

Enhancing OSS Remediation with Patch Backporting 220
Lyuye Zhang (Nanyang Technological University, Singapore)

Identifying Performance-Sensitive Configurations in Software Systems with LLM-Driven Agents 222
Zehao Wang (Concordia University, Canada)

Improving Formal Methods Visualizations 224
Avinash Palliyil (Georgia Institute of Technology, USA)

MUARF: Leveraging Multi-Agent Workflows for Automated Code Refactoring 226
Yisen Xu (Concordia University, Canada)

On the Automation of Code Review Tasks Through Cross-Task Knowledge Distillation 228
Oussama Ben Sghaier (Université de Montréal, Canada)

On the Fly Input Refinement for Code Language Models 230
Ravishka Rathnasuriya (The University of Texas at Dallas, USA)

Program Feature-Based Fuzzing Benchmarking 232
Miao Miao (University of Texas at Dallas, USA)

Revisiting SWE-Bench: On the Importance of Data Quality for LLM-Based Code Models 235
Reem Aleithan (York University, Canada)

The Balancing Act of Policies in Developing Machine Learning Explanations 237
Jacob Tjaden (Colby College, U.S.A.)

To Mock or Not to Mock: Divergence in Mocking Practices Between LLM and Developers 239
Hanbin Qin (Stevens Institute of Technology, USA)

Towards Compatibly Mitigating Technical Lag in Maven Projects 241
Rui Lu (Software Engineering Institute East China Normal University Shanghai, China)

Industry Challenge

CKGFuzzer: LLM-Based Fuzz Driver Generation Enhanced By Code Knowledge Graph 243
Hanxiang Xu (Huazhong University of Science and Technology, China), Wei Ma (Singapore Management University, Singapore), Ting Zhou (Huazhong University of Science and Technology, China), Yanjie Zhao (Huazhong University of Science and Technology, China), Kai Chen (Huazhong University of Science and Technology, China), Qiang Hu (The University of Tokyo, Japan), Yang Liu (Nanyang Technological University, Singapore), and Haoyu Wang (Huazhong University of Science and Technology, China)

ClauseBench: Enhancing Software License Analysis with Clause-Level Benchmarking 255
Qiang Ke (Huazhong University of Science and Technology, China), Xinyi Hou (Huazhong University of Science and Technology, China), Yanjie Zhao (Huazhong University of Science and Technology, China), and Haoyu Wang (Huazhong University of Science and Technology, China)

CodeMorph: Mitigating Data Leakage in Large Language Model Assessment 267
Hongzhou Rao (Huazhong University of Science and Technology, China), Yanjie Zhao (Huazhong University of Science and Technology, China), Wenjie Zhu (Huazhong University of Science and Technology, China), Ling Xiao (Huazhong University of Science and Technology, China), Meizhen Wang (Huazhong University of Science and Technology, China), and Haoyu Wang (Huazhong University of Science and Technology, China)

CommitShield: Tracking Vulnerability Introduction and Fix in Version Control Systems 279
Zhaonan Wu (Huazhong University of Science and Technology, China), Yanjie Zhao (Huazhong University of Science and Technology, China), Chen Wei (MYbank, Ant Group, China), Zirui Wan (Huazhong University of Science and Technology, China), Yue Liu (Monash University, Australia), and Haoyu Wang (Huazhong University of Science and Technology, China)

Exploring Large Language Models for Analyzing Open Source License Conflicts: How Far Are We? 291
Xing Cui (Institute of Software Chinese Academy of Sciences; University of Chinese Academy of Sciences), Jingzheng Wu (Institute of Software Chinese Academy of Sciences; Key Laboratory of System Software (Chinese Academy of Sciences); Institute of Software Chinese Academy of Sciences), Xiang Ling (Institute of Software Chinese Academy of Sciences; Key Laboratory of System Software (Chinese Academy of Sciences); Institute of Software Chinese Academy of Sciences), Tianyue Luo (Institute of Software Chinese Academy of Sciences), Mutian Yang (Beijing ZhongKeWeiLan Technology Co., Ltd.), and Wenxiang Ou (Institute of Software Chinese Academy of Sciences)

OSS-LCAF: Open-Source Software License Conflict Analysis Framework 303
Aditya Kahol (TCS Research, India), Anka Chandrahas Tummepalli (TCS Research, India), and Preethu Rose Anish (TCS Research, India)

Author Index **315**
