

# **Airfield and Highway Pavements 2025**

## **Innovation and Sustainability in Highway and Airfield Pavements Technology**

Selected Papers from the International Airfield and Highway  
Pavements Conference 2025

Glendale, Arizona, USA  
8-11 June 2025

### **Editors:**

**Hasan Ozer**  
**Quintin Watkins**

ISBN: 979-8-3313-2185-7

**Printed from e-media with permission by:**

# Contents

## *Innovative Sustainable Methods, Materials, and Recycling*

|                                                                                                                                 |            |
|---------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Sustainable Chip Seals for Climate-Resilient, Reflective Pavements in Urban Heat Mitigation—Work in Progress .....</b>       | <b>1</b>   |
| Khalida Muntasher, Syed Ashik Ali, Arif Sadri, Kenneth R. Hobson, and Musharraf Zaman                                           |            |
| <b>Feasibility Study on Incorporating Waste from Waterproofing Membranes into Asphalt Mixtures.....</b>                         | <b>13</b>  |
| José Neves, Ana Pacheco, Adão Paulo, and Júlio Santos                                                                           |            |
| <b>Opportunities of Using Additive Manufacturing Waste Materials in Asphalt Concrete.....</b>                                   | <b>24</b>  |
| Mohammad I. Hossain, Arshad I. Mohammed, and Mohammed F. K. Qasimi                                                              |            |
| <b>Applications of Quiet Pavements in Reducing Highway Noise .....</b>                                                          | <b>33</b>  |
| Abu Ahmed Sufian, Ahmad Alhasan, and Ohhoon Kwon                                                                                |            |
| <b>Strength Improvement of Aggregate Quarry Byproducts Stabilized with Cement and Metakaolin.....</b>                           | <b>45</b>  |
| Taeyun Kong, Chirayu Kothari, Issam I. A. Qamhia, Erol Tutumluer, and Nishant Garg                                              |            |
| <b>Employing Life Cycle Assessment in Asphalt Mixture Design Using Reclaimed Asphalt Pavement.....</b>                          | <b>54</b>  |
| Aaditya Ojha, Shadi Saadeh, Shams Tanvir, Louay N. Mohammad, Ali Azhar Butt, and John Harvey                                    |            |
| <b>Evaluation of Chemical Compounds and Abrasion Resistance Characteristics across Various Aggregate Sources and Types.....</b> | <b>65</b>  |
| Abdelrahman Ali, Ayman Ali, and Yusuf Mehta                                                                                     |            |
| <b>Greenhouse Gas Emissions during Flexible Pavement Life Cycle—Data Gaps and Remedial Measures.....</b>                        | <b>78</b>  |
| Athar Saeed, Jeb Tingle, and Charles E. Williams Jr.                                                                            |            |
| <b>Producing Sustainable Construction Materials through Carbon Mineralization.....</b>                                          | <b>90</b>  |
| Lidya E. Guteta, Nagababu Andraju, Johannes van der Watt, Daba S. Gedafa, and Bruce Dockter                                     |            |
| <b>Sensitivity to Laboratory Specimen Fabrication Procedures for Asphalt Emulsion Cold In-Place Recycling Mixtures .....</b>    | <b>100</b> |
| Sadie E. Casillas and Andrew F. Braham                                                                                          |            |

|                                                                                                                                       |            |
|---------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Appraising the Synergistic Use of Nano Fly Ash and Cold Bituminous Emulsion Mixes .....</b>                                        | <b>114</b> |
| Mohit Singh Parihar, Pranav Saraswat, Bhupendra Singh, and Rajiv Kumar                                                                |            |
| <b>Field Demo of Waste Plastic, Crumb Rubber, and Plastic-Rubber Hybrid Additives in Kansas City, Missouri.....</b>                   | <b>126</b> |
| Helmut J. Leodarta, Ahmed Ibrahim H. Mohamed, Nandita Gettu, Anneliese J. Owor, Punyaslok Rath, and William G. Buttlar                |            |
| <b>Resilient Modulus Characteristics of Cement-Treated Recycled Concrete Aggregates.....</b>                                          | <b>138</b> |
| Zainul Abedin Khan, Umashankar Balunaini, Susanga Costa, and Nhu H. T. Nguyen                                                         |            |
| <i>Economic, Environmental, and Social Sustainability Assessment of Pavements</i>                                                     |            |
| <b>Case Study: Developing a Methodology to Quantify Benefit-Cost Ratio Associated with a Complete Road Closure.....</b>               | <b>147</b> |
| Promothes Saha                                                                                                                        |            |
| <b>Demonstration of the Federal Aviation Administration Airfield Pavement Life Cycle Assessment Tool.....</b>                         | <b>159</b> |
| Tanoogna Mallarapu, Iyanuoluwa O. Filani, Ali A. Butt, John T. Harvey, and Navneet Garg                                               |            |
| <b>Stochastic Network-Level Pavement Life Cycle Assessment Framework Development.....</b>                                             | <b>169</b> |
| Seyedehzahra Mostatab, Uhde Semiha Yildirim, Egemen Okte, Ester Tseng, Hasan Ozer, and Imad L. Al-Qadi                                |            |
| <b>Pavement Albedo's Impact on Urban Climate: Insights from MIT's Concrete Sustainability Hub and a Case Study of Phoenix .....</b>   | <b>180</b> |
| James W. Mack and Larry Scofield                                                                                                      |            |
| <b>Uncovering Social Hotspots in Asphalt Mixture Production: A Pathway to Sustainable Infrastructure Development.....</b>             | <b>193</b> |
| Rajab Ali Mehraban, Lucia Tsantilis, Pier Paolo Riviera, Eugene A. Amarh, Gerardo W. Flintsch, Sara Russo Garrido, and Ezio Santagata |            |
| <b>Assessing Road Network's Resilience and Recovery Post-Earthquakes in Türkiye.....</b>                                              | <b>203</b> |
| Saed Aker, Hasan Ozer, Serdal Terzi, and Mehmet Saltan                                                                                |            |
| <b>Performance Properties and Carbon Emissions of Cold Mix Cold Laid Asphalt Rubber Mixture .....</b>                                 | <b>210</b> |
| L. Han, F. Li, and J. Yang                                                                                                            |            |

|                                                                                    |            |
|------------------------------------------------------------------------------------|------------|
| <b>Life Cycle Greenhouse Gas Emissions of Concrete Pavements.....</b>              | <b>216</b> |
| Dan King, Evelyn Maddux, Burak Agun, Sunghwan Kim, Halil Ceylan,<br>and Jeb Tingle |            |

*Machine Learning and AI Applications in Pavements*

|                                                                                                            |            |
|------------------------------------------------------------------------------------------------------------|------------|
| <b>Intelligent Pavement Monitoring with Real-Time Geolocated Defect<br/>Detection on Smartphones .....</b> | <b>228</b> |
| Gabriel T. Freitas and Ernesto Nobre Júnior                                                                |            |

|                                                                                                            |            |
|------------------------------------------------------------------------------------------------------------|------------|
| <b>A Method for Preliminary Prediction of Asphalt Mixture Permanent<br/>Deformation Test Results .....</b> | <b>238</b> |
| Wangyu Ma                                                                                                  |            |

|                                                                                   |            |
|-----------------------------------------------------------------------------------|------------|
| <b>A Two-Stage Machine Learning Framework for Pavement Asset Management .....</b> | <b>246</b> |
| Mohammad SafariTaherkhani, Narjes Shayesteh, and Kaveh Farokhi Sadabadi           |            |

|                                                                                                                     |            |
|---------------------------------------------------------------------------------------------------------------------|------------|
| <b>Machine Learning-Based Artificial Neural Networks Faulting Detection<br/>Framework for Rigid Pavements .....</b> | <b>257</b> |
| Tanvir Ahmed, Mayzan Isied, and Mena I. Souliman                                                                    |            |

|                                                                                                                 |            |
|-----------------------------------------------------------------------------------------------------------------|------------|
| <b>Automatic Pavement Maintenance Predictions Using Large Language and<br/>Machine Learning Models .....</b>    | <b>269</b> |
| Kunle Sunday Oguntoye, Halil Ceylan, Sunghwan Kim, Md. Abdullah All Sourav,<br>Berk Gulmezoglu, and Yunjeong Mo |            |

|                                                                                                                                                  |            |
|--------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Artificial Neural Network Model Utilizing Falling Weight Deflectometer<br/>Data for Asphalt Pavement Rutting Performance Prediction .....</b> | <b>281</b> |
| Sayla Prova, Mayzan Isied, and Mena I. Souliman                                                                                                  |            |
