2024 20th International Conference on Mobility, Sensing and Networking (MSN) **MSN 2024**

Table of Contents

Message from the General Chairs	xxxii
Message from the Technical Program Chairs	xxxiii
Organizing Committee	xxxv
Technical Program Committee	xxxvii
Keynotes	xlili
Sponsors	xlvi

Part I: MSN 2024 Main Conference

Track 1: Mobile & Wireless Sensing and Networking

Session 1: Cloud Network & Data Center

Resource Allocation in UCAN: A Multi-Objective Optimization Method Based on Heterogeneous Graph Decision Space	1
<i>Tian Fan (Beijing University of Posts and Telecommunications, China), Bo Hu (Beijing University of Posts and Telecommunications, China), Jida Song (Beijing University of Posts and Telecommunications, China), Yuan Zhou (Beijing University of Posts and Telecommunications, China), and Shanzhi Chen (China Information and Communication Technology (CICT), China)</i>	
Effective Routing for Hybrid Service Flow in TSN: A Multi-Objective Optimization Approach	8
<i>Mengjie Guo (Nanjing University of Aeronautics and Astronautics, China), Qiang Wu (Nanjing University of Aeronautics and Astronautics, China), Ran Wang (Nanjing University of Aeronautics and Astronautics, China), Rixin Wu (Nanjing University of Aeronautics and Astronautics, China), and Hongke Zhang (Beijing Jiaotong University, China)</i>	
Zygos: A Reward Correction Mechanism for Reinforcement Learning-Based Congestion Control	16
<i>Yuchen Liu (Beijing University of Posts and Telecommunications, China), Yu Fan (Beijing University of Posts and Telecommunications, China), Jiale Ren (Beijing University of Posts and Telecommunications, China), Pengjin Xie (Beijing University of Posts and Telecommunications, China), Liang Liu (Beijing University of Posts and Telecommunications, China), and Huadong Ma (Beijing University of Posts and Telecommunications, China)</i>	

Mobile Crowd Sensing Online Quality Awareness Incentive Mechanism Based on Taxation and Data Aggregation	24
<i>Wenhao Zhao (Qufu Normal University, China), Wenshuo Ma (Zibo Vocational Institute Zibo, China), Chunmei Yang (Qufu Normal University, China), Kan Yu (Beijing University of Posts and Telecommunications, China), Chuanwen Luo (Beijing Forestry University, China), and Guangsheng Feng (Harbin Engineering University, China)</i>	
An Opportunistic Networks Load Distribution Model Based on Forwarding Assistance	32
<i>Xing Wang (Inner Mongolia University, China), Yuan Cheng (Inner Mongolia University, China), Winston K.G. Seah (Victoria University of Wellington, New Zealand), Xiaodong Xu (Inner Mongolia University, China), and Gang Xu (Inner Mongolia University, China)</i>	
A Measurement Study of DNS Query Protocols in Mobile Networks: Efficiency, Reliability and Choice	40
<i>Liangyi Gong (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Sai Wang (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Lanqi Yang (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Chun Long (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiaochen Fan (Tsinghua University, China; Tsinghua University, China), Daibo Liu (Hunan University, China), and Changhua Pei (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	

Session 2: Wireless Sensing & Localization

Proto-CSNet: A Prototype Network Model Integrating CNN and Self-Attention for Enhanced Human Activity Recognition	48
<i>Siyu Hu (Beijing Jiaotong University, China), Jiqiang Liu (Beijing Jiaotong University, China), Chenxi Zhang (Beijing Jiaotong University, China), Xiaoqiang Zhu (Beijing Jiaotong University, China), and Lingkun Li (Beijing Jiaotong University, China)</i>	
mmHAT: 3D Human Arm Tracking with Joint Learning Using Dynamic mmWave Point Cloud	57
<i>Ruili Shi (Southeast University, China), Shuai Wang (Southeast University, China), Ruofeng Liu (Michigan State University, United States), Wenchao Jiang (Singapore University of Technology and Design, Singapore), and Shuai Wang (Southeast University, China)</i>	
EchoLive: Acoustic-Based 3D Dynamic Face Authentication	65
<i>Zheng Zheng (Wuhan University, Hubei), Jianyu Wu (Wuhan University, Hubei), Siyang Zhu (Wuhan University, Hubei), Cong Wang (City University of Hong Kong, China), Yue Zhao (National Key Laboratory of Security Communication, China), and Qian Wang (Wuhan University, Hubei)</i>	
WiViD: Leveraging Wi-Fi and Vision for Depth Estimation via Multimodal Diffusion	73
<i>Shijie Cheng (Tsinghua University, China), Yuchong Gao (Tsinghua University, China), Zheng Yang (Tsinghua University, China), Guoxuan Chi (Tsinghua University, China), and Tony Xiao Han (Wireless Technology Lab, Huawei Technology Co., Ltd., China)</i>	

WiSR: Sparse Recovery for Wi-Fi Signal via Generative Adversarial Network	81
<i>Mingzhu Yang (University of Science and Technology of China, China), Dawei Yan (University of Science and Technology of China, China), Shang Gao (University of Science and Technology of China, China), Fei Shang (University of Science and Technology of China, China), and Yubo Yan (University of Science and Technology of China, China)</i>	
Scan-Then-Localize UAV Trajectory Design for Wireless Sensor Localization	89
<i>Luo Gege (Shenzhen University, China), Che Yueling (Shenzhen University, China), Luo Sheng (Shenzhen University, China), Yao Junmei (Shenzhen University, China), and Wu Kaishun (DSA&IoT thrust, information hub, HKUST(GZ), China)</i>	

Session 3: AI & Machine Learning

Modified Counter: A Fast and Dynamic Structure for Locating High-Frequency Items in Data Streams	97
<i>Lu Cao (Harbin Institute of Technology, Pengcheng Laboratory, China), Lin Yao (Dalian University of Technology, China), Weizhe Zhang (Harbin Institute of Technology, Pengcheng Laboratory, China), and Yao Wang (Harbin Institute of Technology, China)</i>	
BAIR: A Fine-Grained Real-Time Multi-Modal Ranging System on Smartphones	106
<i>Xiao Li (University of Science and Technology of China, China), Feiyu Han (University of Science and Technology of China, China), Fei Shang (University of Science and Technology of China, China), Shicheng Zheng (University of Science and Technology of China, China), Chunyu He (University of Science and Technology of China, China), Haohua Du (Beihang University, China; Deqing Alpha Innovation Institute, China), and Xiang-Yang Li (University of Science and Technology of China, China)</i>	
DBLG: An Innovative Deep-Broad Learning and GAN Framework for CSI Fingerprint Database Refinement	114
<i>Mingbo Zhang (Beijing Jiaotong University, China), Lingyun Lu (Beijing Jiaotong University, China), Xiaoqiang Zhu (Beijing Jiaotong University, China), Lingkun Li (Beijing Jiaotong University, China), and Ruipeng Gao (Beijing Jiaotong University, China)</i>	
FedMoE-DA: Federated Mixture of Experts via Domain Aware Fine-Grained Aggregation	122
<i>Ziwei Zhan (Sun Yat-Sen University, China), Wenkuan Zhao (Sun Yat-Sen University, China), Yuanqing Li (Sun Yat-Sen University, China), Weijie Liu (The University of Hong Kong, Hong Kong), Xiaoxi Zhang (Sun Yat-Sen University, China), Chee Wei Tan (Nanyang Technological University, Singapore), Chuan Wu (The University of Hong Kong, Hong Kong), Deke Guo (National University of Defense Technology, China), and Xu Chen (Sun Yat-Sen University, China)</i>	
Lightweight Federated Unlearning for IoT Sensing Systems	130
<i>Muhammad Ameen (Dalian University of Technology, China; Ministry of Education, China) and Pengfei Wang (Dalian University of Technology, China; Ministry of Education, China)</i>	

Session 4: IoT & Wireless Communication & UAV

An Image Recovery Method for Non-Retransmission Backscatter Communication	138
<i>Qinmeng Du (University of Science and Technology of China, China), Shanyue Wang (University of Science and Technology of China, China), Xiang Cui (University of Science and Technology of China, China), Yachen Mao (University of Science and Technology of China, China), and Xiangyang Li (University of Science and Technology of China, China)</i>	
Optimize Aggregation Latency of Battery-Free Sensor Network: Constructing the BF/BP Hybrid Network	146
<i>Wencheng Gao (Faculty of Computing, Harbin Institute of Technology, China) and Hong Gao (Faculty of Computing, Harbin Institute of Technology, China)</i>	
Iterative Doppler Tracking Based on Kalman Filter for Underwater Acoustic FH-FSK Communication in High Mobility	154
<i>Yuyang Hu (Xiamen University, China), Lei Wan (Xiamen University, China), Yinfan Zhao (Xiamen University, China), Jun Liu (Beihang University, China), Yougan Chen (Xiamen University, China), and En Cheng (Xiamen University, China)</i>	
Collecting LoRa Data with An Energy-Budgeted UAV: A Bi-Criteria Approximate Solution	164
<i>Haotian Zhang (Beijing Forestry University, China), Dantong Li (Beijing Forestry University, China), Chuanwen Luo (Beijing Forestry University, China), and Guodong Sun (Beijing Forestry University, China)</i>	
An Optimized Scheduling Scheme for UAV-USV Cooperative Search via Multi-Agent Reinforcement Learning Approach	172
<i>Pengyan Dong (Shandong University of Science and Technology, China), Jiahong Liu (Shandong University of Science and Technology, China), Hang Tao (Shandong University of Science and Technology, China), Rukhsana Ruby (Shenzhen University, China), Muwei Jian (Shandong University of Finance and Economics, China), and Hanjiang Luo (Shandong University of Science and Technology, China)</i>	
Distributed Auction-Based Network Selection for Decentralized Wireless Community Network	180
<i>Tat Woo Tan (Tsinghua University, China), Sungmin Choi (Tsinghua University, China), Zhuochen Xie (Tsinghua University, China), Xin Chang (Tsinghua University, China), and Xingjun Wang (Tsinghua University, China)</i>	

Session 5: Satellite Network

A Low Overhead Positioning Framework for Satellite-Based IoT Devices	188
<i>Jiale Lei (Shanghai Jiao Tong University, China), Shuai Pan (Shanghai Jiao Tong University, China), Linghe Kong (Shanghai Jiao Tong University, China), Guihai Chen (Shanghai Jiao Tong University, China), and Jiaying Song (The Chinese Institute of Electronics, China)</i>	

An Efficient Area-Division Based Handover Scheme in LEO Satellite Networks	196
<i>Yuhong Xiang (Beijing Jiaotong University, China), Bo Lei (Research Institute China Telecom, China), Shuai Gao (Beijing Jiaotong University, China), Cheng Chi (China Academy of Information and Communications Technology, China), and Hongchao Wang (Beijing Jiaotong University, China)</i>	
A Two-Stage Optimization Model for Satellite Tracking with Noncooperative Ground-Based Equipment in NGSO Constellations	204
<i>Xiaoyu Zhang (University of Chinese Academy of Sciences, China; Chinese Academy of Sciences, China), Meng Zhang (University of Chinese Academy of Sciences, China; Chinese Academy of Sciences, China), Wen Wang (University of Chinese Academy of Sciences, China; Chinese Academy of Sciences, China), and Huadong Guo (University of Chinese Academy of Sciences, China; Chinese Academy of Sciences, China)</i>	
Handover-Aware Cache Replacement Strategy in Non-Terrestrial Network: A Deep Reinforcement Learning Approach	212
<i>Chuxing Fang (Beijing University of Posts and Telecommunications, China), Han Xiao (Beijing University of Posts and Telecommunications, China), Zitong Li (Beijing University of Posts and Telecommunications, China), Zhenhui Yuan (Northumbria University, U.K), and Changqiao Xu (Beijing University of Posts and Telecommunications, China)</i>	
Empowering Satellite-UAV MEC Networks via Matching-Aided Multi-Agent Deep Reinforcement Learning	220
<i>Shuo Gao (Jilin University, China), Hui Kang (Jilin University, China), Geng Sun (Jilin University, China; Nanyang Technological University, Singapore), Jiahui Li (Jilin University, China), Xue Wang (Jilin University, China), Jiacheng Wang (Nanyang Technological University, Singapore), and Dusit Niyato (Nanyang Technological University, Singapore)</i>	

Track 2: Edge Computing, IoT and Digital Twins

Session 1: Edge Computing

Dynamic Pre-Warm Strategies for Reducing Cold-Start Latency in Serverless Edge Computing	228
<i>Yicong Song (Nanjing University), Baoliu Ye (Nanjing University), Yue Zeng (Nanjing University of Science and Technology), and Xindong Wang (n/a)</i>	
Container Scheduling with Dynamic Computing Resource for Microservice Deployment in Edge Computing	236
<i>Jingxi Lu (Department of Computer Science, BNU-HKBU United International College, China), Wenhao Li (Department of Computer Science, BNU-HKBU United International College, China), Jianxiong Guo (Beijing Normal University, China; Department of Computer Science, BNU-HKBU United International College, China), Xingjian Ding (Beijing University of Technology, China), Zhiqing Tang (Beijing Normal University, China), and Tian Wang (Beijing Normal University, China)</i>	

LRScheduler: A Layer-Aware and Resource-Adaptive Container Scheduler in Edge Computing	244
<i>Zhiqing Tang (Beijing Normal University, China), Wentao Peng (BNU-HKBU United International College, China), Jianxiong Guo (Beijing Normal University, China; BNU-HKBU United International College, China), Jiong Lou (Shanghai Jiao Tong University, China), Hanshuai Cui (Beijing Normal University, China), Tian Wang (Beijing Normal University, China), Yuan Wu (University of Macau, China), and Weijia Jia (Beijing Normal University, China; BNU-HKBU United International College, China)</i>	
Docker-Based Heterogeneous Resource Configuration and Task Allocation Mechanism	252
<i>Yongmin Zhang (Central South University, China), Shikang Liu (Central South University, China), and Wei Wang (Central South University, China)</i>	
An Online Two-Phase Workload Management Scheme for Collaborative Edge Computing System	258
<i>Jingyu Zhang (Changsha University of Science and Technology, China; National University of Defense Technology, China), Zhennan Zhang (Changsha University of Science and Technology, China; National University of Defense Technology, China), Yimin Luo (Changsha University of Science and Technology, China), Shi Zhu (State Grid Hunan Electric Power Information and Communication Corporation, China), Fangliao Yang (State Grid Hunan Electric Power Information and Communication Corporation, China), and Lailong Luo (National University of Defense Technology, China)</i>	
Bi-Level Reinforcement Learning-Based Task Offloading for Delay Optimization in Wireless Powered Mobile Edge Computing	266
<i>Siteng Liao (Shanghai University, China), Yangguang Cui (Shanghai University, China), Tong Liu (Shanghai University, China), and Yanmin Zhu (Shanghai Jiao Tong University, China)</i>	

Session 2: IoT and UAV Networks

Enable Online LoRa Decoding under Partially Overlapping Interference	274
<i>Yuhao Ma (Beijing University of Posts and Telecommunications, P. R. China), Fu Yu (Beijing University of Posts and Telecommunications, P. R. China), Xiaolong Zheng (Beijing University of Posts and Telecommunications, P. R. China), Liang Liu (Beijing University of Posts and Telecommunications, P. R. China), and Huadong Ma (Beijing University of Posts and Telecommunications, P. R. China)</i>	
Optimizing Multi-Cell Selection Handover in Cellular Networks: A Deep Reinforcement Learning Approach	282
<i>Renwei Ou (Sun Yat-sen University, China), Yitong Liu (University of Waterloo, Canada), Yi Xie (Sun Yat-sen University, China), Xingcheng Liu (Sun Yat-sen University, China; Guangzhou Xinhua University, China), Peiran Wu (Sun Yat-sen University, China), Tie Qiu (Tianjin University, China), and Guangjie Han (Hohai University, China)</i>	

Hybrid Heuristic Optimization for Joint Routing and Scheduling in Time-Sensitive Networking	290
<i>Huajian Zhou (Zhejiang University), Miao Guo (Zhejiang University), Xiuzhen Guo (Zhejiang University), Shibo He (Zhejiang University), Chaojie Gu (Zhejiang University), and Jiming Chen (Zhejiang University; Hangzhou Dianzi University)</i>	
IRS-Assisted UAV Secure Communications via Joint Collaborative and Passive Beamforming	298
<i>Lai Wei (Jilin University, China), Hui Kang (Jilin University, China), Geng Sun (Jilin University, China; Nanyang Technological University, Singapore), Jiahui Li (Jilin University, China), Jiacheng Wang (Nanyang Technological University, Singapore), and Dusit Niyato (Nanyang Technological University, Singapore)</i>	
MAWI:Metasurface Aided WiFi Imaging	306
<i>Leiyang Xu (Beijing University of Posts and Telecommunications), Xiaolong Zheng (Beijing University of Posts and Telecommunications), Huiming Yao (Beijing University of Posts and Telecommunications), and Liang Liu (Beijing University of Posts and Telecommunications)</i>	
Computing-Aware Routing for LEO Satellite Networks Based on Multi-Step DQN	314
<i>Yafei Li (Harbin Engineering University, China), Huiqiang Wang (Harbin Engineering University, China), Zhibo Zhang (AVIC (Chengdu) UAS Co., Ltd., China), Hongwu Lv (Harbin Engineering University, China), Junyu Lin (Fudan University, China), and Guangsheng Feng (Harbin Engineering University, China)</i>	

Session 3: IoT Security and Edge Collaboration

Improving the Stability of Networks Anomaly Detection in Internet of Things	322
<i>Baokang Zhao (National University of Defense Technology, China), Zengri Zeng (Hunan University of Humanities, Science and Technology, China), and Xiaoheng Deng (Central South University, China)</i>	
Apollo: Permissioned Blockchain Network Auto-Tuning Based on DRL Against Eclipse Attack	328
<i>Yuying Zhang (Sun Yat-Sen University, China) and Wuhui Chen (Sun Yat-Sen University, China)</i>	
Adaptive Time Window Enabled Model Pool for Online Deep Anomaly Detection in IIoT	336
<i>Shuxin Ma (Tianjin University, China), Weixu Wang (Tianjin University, China), Xiaobo Zhou (Tianjin University, China), and Keqiu Li (Tianjin University, China)</i>	
Verifiable Data Sharing Based on Autonomous Path Proxy Re-Encryption for Industrial Internet of Things	344
<i>Jie Cui (Anhui University, China), Xiaoxi Sun (Anhui University, China), Qingyang Zhang (Anhui University, China), Fengqun Wang (Anhui University, China), and Hong Zhong (Anhui University, China)</i>	

Deep Reinforcement Learning for Hybrid Task Scheduling in Collaborative Vehicular Edge Computing	353
<i>Xumin Huang (Guangdong University of Technology, China), Ruiyang Zou (Guangdong University of Technology, China), Weifeng Zhong (Guangdong University of Technology, China), Jiawen Kang (Guangdong University of Technology, China), Yuanhang Qi (University of Electronic Science and Technology of China), and Min Hao (Singapore University of Technology and Design, Singapore)</i>	

Session 4: Digital Twin and Edge AI

Facade-Manager: Digital Twin Manage System for Glass Facade Leveraging Multimodal Large Model	359
<i>Junxiang Ji (Xiamen University, China), Changzhen Liu (Xiamen University, China), Jiedong Yan (Xiamen University, China), Yongyi Wu (Xiamen University, China), Guofeng Luo (Xiamen University, China), Jiaru Wang (Xiamen University, China), Yufei Wang (Xiamen University, China), Qingxian Tang (Xiamen University, China), Cheng Wang (Xiamen University, China), and Longbiao Chen (Xiamen University, China)</i>	
Design and Optimization of SMT Reflow Soldering Curves Driven by Digital Twins	367
<i>Erjun Yu (Northwestern Polytechnical University, China), Zhiwen Yu (Northwestern Polytechnical University, China), Linping Hu (Northwestern Polytechnical University, China), Mingliang Hu (Aeronautics Computing Technique Research Institute, China), Yitong Lu (Aeronautics Computing Technique Research Institute, China), Wen Gao (Northwestern Polytechnical University, China), Jian Li (Northwestern Polytechnical University, China), and Jiayu Liu (Aeronautics Computing Technique Research Institute, China)</i>	
Social-Aware DT-Assisted Service Provisioning in Serverless Edge Computing	374
<i>Jing Li (City University of Hong Kong, P. R. China), Jianping Wang (City University of Hong Kong, P. R. China), Weifa Liang (City University of Hong Kong, P. R. China), Jie Wu (Temple University, USA), Quan Chen (Guangdong University of Technology, P. R. China), and Zichuan Xu (Dalian University of Technology, P. R. China)</i>	
MIX3D: A Mixed Representation for Communication-Efficient Distributed 3DGS Training	382
<i>Ke Luo (Sun Yat-sen University, China), Kongyange Zhao (Sun Yat-sen University, China), Shengyuan Ye (Sun Yat-sen University, China), Tao Ouyang (Sun Yat-sen University, China), and Xu Chen (Sun Yat-sen University, China)</i>	
DNN Tasks Offloading and Bandwidth Optimization for Satellite-Terrestrial Collaborative Intelligence	390
<i>Haochun Lei (Nanjing University of Aeronautics and Astronautics, China), Yuben Qu (Nanjing University of Aeronautics and Astronautics, China), Lei Zhang (Nanjing University of Aeronautics and Astronautics, China), Lingyuan Zhao (Nanjing University of Aeronautics and Astronautics, China), Yu Li (Nanjing University of Aeronautics and Astronautics, China), Jian Cheng (Nanjing University of Aeronautics and Astronautics, China), Guangxia Li (Nanjing University of Aeronautics and Astronautics, China), and Qihui Wu (Nanjing University of Aeronautics and Astronautics, China)</i>	

Integrating Graph Neural Networks with Multi-Agent Deep Reinforcement Learning for Dynamic V2X Communication	398
<i>Bingkun Zheng (Sun Yat-sen University, China), Haoyu Liang (Sun Yat-sen University, China), Jiahao Ling (Sun Yat-sen University, China), Shimin Gong (Sun Yat-sen University, China; Guangdong Provincial Key Laboratory of Fire Science and Intelligent Emergency Technology, China), and Bo Gu (Sun Yat-sen University, China; Guangdong Provincial Key Laboratory of Fire Science and Intelligent Emergency Technology, China)</i>	

Track 3: Security, Privacy, Trust and Blockchain

Session 1: Blockchain

HoneyRank: A Low-Cost Discovering Method of 0-Day Ethereum Smart Contract Honey pots	406
<i>Jiaying Song (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Zhen Li (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Gaopeng Gou (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Bingxu Wang (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Gang Xiong (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Yingchao Qin (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	
PIR-TEE: Powering Privacy and Performance for Lightweight Blockchain Clients	415
<i>Xiangyi Meng (City University of Hong Kong, Hong Kong; City University of Hong Kong Shenzhen Research Institute, China), Yuefeng Du (Hong Kong; City University of Hong Kong Shenzhen Research Institute, China), and Cong Wang (Hong Kong; City University of Hong Kong Shenzhen Research Institute, China)</i>	
Enabling Partitionable and Combinable Object Tracking on Blockchain	423
<i>Ao Zhu (Xidian University, China), Qingsong Yao (Xidian University, China), Xuan Ding (Tsinghua University, China), Aocheng Duan (Xidian University, China), Delun Wu (Xidian University, China), and Xu Wang (Tsinghua University, China)</i>	
ML-AGNN: Smart Contract Vulnerability Detection Method Based on a Multi-Level Attention Graph Neural Network	431
<i>Haochen Li (Hainan University, China), Chunjie Cao (Hainan University, China), Mengnan Wang (Hainan University, China), Zhi Li (Hainan University, China), Qi Zhang (City University of Macau, China), and Jingzhang Sun (Hainan University, China)</i>	
A Hybrid Blockchain Privacy Evaluation and Recommendation Method for Web3 Data Services ...	439
<i>Chunge Zhu (Beijing University of Posts and Telecommunications, China), Jingguo Bi (Beijing University of Posts and Telecommunications, China), and Chengsheng Zhou (Institute of Security, The China Academy of Information and Communications Technology, China)</i>	

Session 2: Anomaly Detection and Defense

X-EDF: An Efficient Defensive Deception Framework Against Reconnaissance Attacks	445
<i>Zhihang Zhang (National University of Defense Technology, China), Chenlin Huang (National University of Defense Technology, China), Yan Ding (National University of Defense Technology, China), Jinzhu Kong (KylinSoft Corporation, China), Qing Liao (Harbin Institute of Technology, China), Pan Dong (National University of Defense Technology, China), and Haifang Zhou (National University of Defense Technology, China)</i>	
CLGuard: Presentation Attack Detection Model using Clean Labels for Copyright Protection	453
<i>Chengsheng Yuan (Nanjing University of Information Science and Technology, China), Shasha Zhang (Nanjing University of Information Science and Technology, China), Zhili Zhou (Guangzhou University, China), Xinting Li (National University of Defense Technology, China), and Zhangjie Fu (Nanjing University of Information Science and Technology, China)</i>	
PPTFI: Patch Presence Test for Function-Irrelevant Patches	461
<i>Daojing He (Harbin Institute of Technology, P.R. China), Juzheng Zhang (Jiangxi University of Science and Technology, P.R. China), Hongyi Li (East China Normal University, P.R. China), Sencun Zhu (Pennsylvania State University, United States), and Sammy Chan (City University of Hong Kong, Hong Kong)</i>	
TAD-LLM: API Traffic Anomaly Detection Based on Large Language Model	469
<i>Yue Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Baoxu Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jingqiang Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Fangjiao Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Yuling Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Qixu Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)</i>	
SSAD: State Space-Based Anomaly Detection in Industrial Control Systems	479
<i>Ziqi Wei (University of Chinese Academy of Sciences, China; Chinese Academy of Sciences, China), Fei Lv (Chinese Academy of Sciences, China), Xiao Lu (Chinese Academy of Sciences, China), Xin Chen (Chinese Academy of Sciences, China), Shichao Lv (University of Chinese Academy of Sciences, China; Chinese Academy of Sciences, China), and Limin Sun (University of Chinese Academy of Sciences, China; Chinese Academy of Sciences, China)</i>	

Session 3: Machine Learning Security and Privacy

DifGuard: A Privacy Protection Mechanism for Neural Network Classifiers	487
<i>Zhao Jiang (South China Normal University, China), Ping Li (South China Normal University, China), Mingwei Liang (South China Normal University, China), and Jingjing Li (South China Normal University, China)</i>	
A Deep Reinforcement Learning Approach for Adaptive GPS Spoofing Against Multi-Sensor Fusion Localization System	496
<i>Linqing Hu (University of Science and Technology of China, China), Junqi Zhang (University of Science and Technology of China, China), Shaoyin Cheng (University of Science and Technology of China, China), Weiming Zhang (University of Science and Technology of China, China), and Nenghai Yu (University of Science and Technology of China, China)</i>	
Efficient Short Video Identification Attack for Scenarios with Hybrid Transmission Modes and Preloading Mechanism	504
<i>Jingwen Quan (Southeast University, China), Jiajia Du (Southeast University, China), Hua Wu (Southeast University, China; Key Laboratory of Computer Network and Information Integration, Ministry of Education, Jiangsu Nanjing), Guang Cheng (Southeast University, China; Key Laboratory of Computer Network and Information Integration, Ministry of Education, Jiangsu Nanjing), and Xiaoyan Hu (Southeast University, China; Key Laboratory of Computer Network and Information Integration, Ministry of Education, Jiangsu Nanjing)</i>	
PDLG: Prevent Deep Leakage from Gradients Based on Dataset Condensation in Federated Meta-Learning	512
<i>Yingzhi Zhang (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Fundamental Research Center for Computer Science, China), Wenhong Bian (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Fundamental Research Center for Computer Science, China), Feng Wu (University of Technology Sydney, Australia), Lei Cui (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Fundamental Research Center for Computer Science, China), Shouyue Sun (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Fundamental Research Center for Computer Science, China), and Longxiang Gao (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Fundamental Research Center for Computer Science, China)</i>	

MalBET: A Multiclass Malware Detection Method Using Improved Bidirectional Encoders from Transformers	521
<i>Yetao Jia (Institute of Systems Engineering, Academy of Military Sciences, China), Yangyang Meng (Institute of Systems Engineering, Academy of Military Sciences, China), Yuting Zhang (Institute of Systems Engineering, Academy of Military Sciences, China), Yibiao Wu (Institute of Systems Engineering, Academy of Military Sciences, China), and Honglin Zhuang (National Key Laboratory of Science and Technology on Information System Security, China)</i>	

Session 4: Network Security

Hybrid-Based Timing Attack for Path Inference in Named Data Networking	529
<i>Yi Tian (Harbin Engineering University, China), Dapeng Man (Harbin Engineering University, China), Hanbo Wang (Harbin Engineering University, China), Huanran Wang (Harbin Engineering University, China), and Wu Yang (Harbin Engineering University, China)</i>	
LEO Satellite-Enabled Networks: A Privacy-Preserving Framework for Spectrum Pricing and Power Control Optimization	538
<i>Bowen Shen (Nanyang Technological University, Singapore), Kwok-Yan Lam (Nanyang Technological University, Singapore), Wenzhuo Yang (Nanyang Technological University, Singapore), Ziyao Liu (Nanyang Technological University, Singapore), and Feng Li (Nanyang Technological University, Singapore; Zhejiang Gongshang University, China)</i>	
Inferring Activities and Profiles of Users Based on Trajectory Leakage in Mobile Ad Network	545
<i>Zhiyong Liu (Shanghai Jiao Tong University, China), Le Yu (Shanghai Maritime University, China), Tian Dong (Shanghai Jiao Tong University, China), Yan Meng (Shanghai Jiao Tong University, China), Shaofeng Li (Southeast University, China), Guoxing Chen (Shanghai Jiao Tong University, China), and Haojin Zhu (Shanghai Jiao Tong University, China)</i>	
Building Trust: Security Analysis in IoT Pairing Stages	553
<i>Yingjie Hu (Central South University, China), Weiping Wang (Central South University, China), Shigeng Zhang (Central South University, China), and Hong Song (Central South University, China)</i>	
RDFMark: Robust Dual-Functional Video Watermarking for Tamper Localization in Social Network Transmissions	561
<i>Ling Yang (Sichuan University, China), Hongxia Wang (Sichuan University, China), Fei Zhang (Sichuan University, China), and Jinhe Li (Sichuan University, China)</i>	

Session 5: Data Security

SecPack: Secure Data Access for Encrypted Key-Value Stores Using Data-Packing	569
<i>Qiuyu Hu (Wuhan University, China), Qin Liu (Wuhan University, China), Zhenyu Chai (Wuhan University, China), and Peng Li (Wuhan University of Science and Technology, China)</i>	

Towards Efficient Decoding Algorithm of q-Ary Codes from Lattice	577
<i>Xiaojun Zhang (Nanjing University of Science and Technology, China), Wei Zhao (National Key Laboratory of Security Communication, China), Lei Xu (Nanjing University of Science and Technology, China), Yanzhang Ding (Nanjing University of Science and Technology, China), Jianghua Liu (Nanjing University of Science and Technology, China), and Chungeng Xu (Nanjing University of Science and Technology, China)</i>	
Secure Undirected-Graph Computation Towards Efficiency and Scalability	585
<i>Jialiang Wang (University of Science and Technology of China, China), Lan Zhang (University of Science and Technology of China, China), Jiandong Liu (University of Science and Technology of China, China), and Feng Han (University of Science and Technology of China, China; Alibaba Group, China)</i>	
Privacy-Enhanced Efficient Image Reconstruction: When Compressed Sensing Meets Meta-Learning	593
<i>Di Xiao (Chongqing University, China), Lian Wang (Chongqing University, China), and Maolan Zhang (Chongqing University, China)</i>	
A Logarithmic-Size Certificateless Traceable Ring Signature Based on SM2-DualRing and Its Application in Data Sharing	601
<i>Shumei Liu (Jinan University, China), Anjia Yang (Jinan University, China), and Junhua Zheng (Information Center Department, Branch of China National Tobacco Corporation, China)</i>	

Track 4: Big Data and AI

Session 1: Distributed AI

HBIPFL: Hypernetwork and Backdoor Isolation Personalized Federated Learning	609
<i>Jiankang Chen (Beijing Normal University, China), Haipeng Jiang (Beijing Normal University, China), Yuxin Xi (Beijing Normal University, China), Shiyuan Xu (The University of Hong Kong, China), and Jing Wang (Beijing Normal University, China)</i>	
FedUIG: User Importance-Guided Federated Learning with Noisy and Heterogeneous Clients	617
<i>Minghao Song (University of Science and Technology of China, China), Yulin Fu (University of Science and Technology of China, China), and Yong Liao (University of Science and Technology of China, China)</i>	
A Distributional Reinforcement Learning-Based Strategy for Pod Scheduling in Satellite Clusters	625
<i>Kehan Li (Wuhan University, China), Kehua Su (Wuhan University, China), Wei Liu (Institute of Telecommunication and Navigation Satellites, China Academy of Space Technology, China), and Ying Tao (Institute of Telecommunication and Navigation Satellites, China Academy of Space Technology, China; State Key Laboratory of Space-Earth Integrated Information Technology, China)</i>	

FedDE: A Data Augmentation Strategy to Combat the Non-IID Issue in Federated Learning	634
<i>Guopeng Hao (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), Liting Geng (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), Feng Li (Shandong University, China), Chunxiao Wang (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China), and Zhigang Zhao (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computing Power Internet and Service Computing, Shandong Fundamental Research Center for Computer Science, China)</i>	
Federated Hypothesis Transfer for Decentralized Multi-Source Domain Adaptation	642
<i>Yun Zhang (Guangdong Ocean University, China) and Lei Song (Guangdong Ocean University, China)</i>	

Session 2: Pattern Recognition

AnchorMine: An Efficient Graph Pattern Matching System for Specific Vertex Matching	650
<i>Dongyang Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Jianhuan Zhuo (Tencent, China), Mingzhe Xing (Zhongguancun Laboratory, China), Yinliang Yue (Zhongguancun Laboratory, China), Peng Fu (Institute of Information Engineering, Chinese Academy of Sciences, China), and Weiping Wang (Institute of Information Engineering, Chinese Academy of Sciences, China)</i>	
HAPE:Hybrid Attention and Prototype Extracting for Few-Shot Object Detection	658
<i>Li Yao (Donghua University, China), Yang An (Donghua University, China), and Yan Wan (Donghua University, China)</i>	
DSS-DocRE: A DenseNet-Based Semantic Segmentation Model for Document-Level Relation Extraction	665
<i>Gang Liu (Harbin Engineering University, China), Dongze Zhang (Harbin Engineering University, China), Jinlong He (Harbin Engineering University, China), Tongli Wang (Harbin Engineering University, China), and Shenjun Zhong (Monash Biomedical Imaging, Australia; National Imaging Facility, Australia)</i>	
BT-YOLO: Improved YOLOv5 Based on BiFormer Structure and Task-Specific Decoupled Head for Photovoltaic Infrared Defect Detection on UAV Scenarios	673
<i>Weipeng Jing (Northeast Forestry University, China), Baihong Guo (Northeast Forestry University, China), Zhen Li (Northeast Forestry University, China), Peilun Kang (Northeast Forestry University, China), Wei Jiang (DaQing Huanghe Solar and Energy Storage Empirical Research Co., Ltd., China), Mahmoud Emam (Menoufia University, Egypt), and Chao Li (Northeast Forestry University, China)</i>	

ViRED: Prediction of Visual Relations in Engineering Drawings	681
<i>Chao Gu (University of Science and Technology of China, China), Ke Lin (Tsinghua University, China), Yiyang Luo (Nanyang Technological University, Singapore), Jiahui Hou (University of Science and Technology of China, China), and Xiangyang Li (University of Science and Technology of China, China)</i>	
Towards Efficient Video Inpainting Based on Implicit Neural Representation	689
<i>Shuxuan Fu (North China Electric Power University, China), Yuxin Xi (Beijing Normal University, China), Fangming Jing (Data Asset Department, Information Center of the Ministry of Civil Affairs, China), and Jing Wang (Beijing Normal University, China)</i>	

Session 3: Deep Learning

A Meta-Pattern-Enhanced Generative Few-Shot Attribute Extraction Framework for Open-World Sparse Corpora	698
<i>Xiyu Liu (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiaobo Guo (Institute of Information Engineering, Chinese Academy of Sciences, China), Xin Wang (Institute of Information Engineering, Chinese Academy of Sciences, China), Zeyi Liu (Institute of Information Engineering, Chinese Academy of Sciences, China), Nan Mu (Institute of Information Engineering, Chinese Academy of Sciences, China), Tianshu Fu (Institute of Information Engineering, Chinese Academy of Sciences, China), and Ji Xiang (Institute of Information Engineering, Chinese Academy of Sciences, China)</i>	
An Bi-Directional Sequence Inference Framework for Multi-Agent Reinforcement Learning	706
<i>Wujun Xu (Southeast University), Kaiwen Xia (Southeast University; Department of Technology and Data Intelligence, JD Logistics), Shuai Wang (Southeast University), Xiaolei Zhou (National University of Defense Technology), Tian He (Department of Technology and Data Intelligence, JD Logistics), and Li Lin (Southeast University)</i>	
End-to-End Graph Learning Approach for Cognitive Diagnosis of Student Tutorial	714
<i>Fulai Yang (Chongqing University of Posts and Telecommunications, China), Di Wu (Southwest University, China), Yi He (School of Data Science, William & Mary, USA), Li Tao (Southwest University, China), and Xin Luo (Southwest University, China)</i>	
DOME: Dynamic Optimization of GPU Memory for Training DNN Models with Limited Resources ...	722
<i>Zijun Ma (National University of Defense Technology, China), Songlei Jian (National University of Defense Technology, China), and Yusong Tan (National University of Defense Technology, China)</i>	
Spatio-Temporal Graph Convolutional Networks for Traffic Prediction Considering Multiple Spatio-Temporal Information	730
<i>Jianuo Ji (Harbin Engineering University, China) and Hongbin Dong (Harbin Engineering University, China)</i>	

A Multimodal Fake News Detection Model Based on Cross-Image Semantic Fusion	738
<i>Huanran Wang (CETC Big Data Research Institute Co., Ltd, China), Yongxin Yang (CETC Big Data Research Institute Co., Ltd, China), Shuai Han (Harbin Engineering University, China), Zhenyuan He (Harbin Engineering University, China), and Wu Yang (Harbin Engineering University, China)</i>	

Session 4: AI Security and Privacy

Three-Party and Multi-Strategy Evolutionary Game in Mobile Crowdsourcing	746
<i>Xi Yin (Shanghai Marine Equipment Research Institute, China), Fuxing Li (Yantai University, China), Zhen Yang (Shanghai Marine Equipment Research Institute, China), Kaili Zhou (Shanghai Marine Equipment Research Institute, China), and Linzhi Shan (Yantai University, China)</i>	
FlexiGuard: Self-Adaptive and Dynamic Context-Based Access Control for Cross-Domain Data Sharing	754
<i>Zhe Feng (Northwestern Polytechnical University, China), Yaxing Chen (Northwestern Polytechnical University, China), Bo Zhang (Northwestern Polytechnical University, China), Feifei Bu (State Grid Henan Electric Power Company Economic and Technological Research Institute, China), Shiqian Wang (State Grid Henan Electric Power Company Economic and Technological Research Institute, China), Zhipeng Shao (Global Energy Interconnection Research Institute Co.ltd., China), and Zhiwen Yu (Northwestern Polytechnical University, China)</i>	
VEUGM: Verifiable, Efficient and Universal GPU Performance Measurement in the Cloud	762
<i>Chenhan Yan (Zhejiang University of Technology), Zhicheng Xu (Zhejiang University of Technology), Xiaoli Zhang (University of Science and Technology Beijing), Chengkai Chen (Zhejiang University of Technology), and Hongbing Cheng (Zhejiang University of Technology)</i>	
DPoSt: Dynamic Proof of Storage-Time	770
<i>Qingyuan Xie (City University of Hong Kong, China), Chengjun Cai (City University of Hong Kong (Dongguan), China), Zhi-An Huang (City University of Hong Kong (Dongguan), China), Mingyue Wang (City University of Hong Kong, China), and Xiaohua Jia (City University of Hong Kong, China)</i>	
ELEMTC: An Efficient Multi-Task Model with Pre-Trained Transformer for Encrypted Traffic Classification	778
<i>Yuanrui Liu (Nanjing University of Aeronautics and Astronautics, China; Beijing Shenzhou Aerospace Software Technology Co., LTD, China), Guobiao Sang (Beijing Shenzhou Aerospace Software Technology Co., LTD, China), Bohan Li (Nanjing University of Aeronautics and Astronautics, China), Tiexin Wang (Nanjing University of Aeronautics and Astronautics, China), and Wenlong Wu (Nanjing University of Aeronautics and Astronautics, China)</i>	

Track 5: Smart Cities, Metaverse and Applications

Session 1: Smart City

The Impacts of Dynamic Prices on Passenger Destination Prediction in Ride-on-Demand Services: A Conditional BiLSTM-Attention Model	786
<i>Weilin Liu (Jinan University, China), Suiming Guo (Jinan University, China), and Chao Chen (Chongqing University, China)</i>	
A Model-Based Approach for Indoor Localization Leveraging Single Mobile Sensor	794
<i>Yaoxin Duan (Key Laboratory of Industrial Internet of Things & Networked Control, Ministry of Education, China; Chongqing University of Posts and Telecommunications, China), Rongbin Hu (Chongqing University of Posts and Telecommunications, China), Zexing Liu (Chongqing University of Posts and Telecommunications, China), Yuanyi Zhang (Chongqing University of Posts and Telecommunications, China), Wendi Nie (Key Laboratory of Industrial Internet of Things & Networked Control, Ministry of Education, China; Chongqing University of Posts and Telecommunications, China), Kam-Yiu Lam (City University of Hong Kong, PRC), Chun Jason Xue (City University of Hong Kong, PRC), Yongli Song (Beijing Institute of Computer Technology and Applications, China), and Guan Gui (Nanjing University of Posts and Telecommunications, China)</i>	
Spatio-Temporal Heterogeneous Tree Convolutional Networks for Traffic Flow Prediction	802
<i>Fengqian Xia (Qingdao University, China), Zhiqiang Lv (Qingdao University, China), Zhaobin Ma (Qingdao University, China), and Jianbo Li (Qingdao University, China)</i>	
Template Inversion Attack Against Face Recognition Systems in Smart Cities with a Tiny Dataset	810
<i>Shengyang Qin (Chongqing University, China; Michigan Technological University, USA), Xinyu Lei (Michigan Technological University, USA), Hongyu Huang (Chongqing University, China), Xu Zhou (Michigan Technological University, USA), Cong Yang (Zhengzhou University, China), and Nankun Mu (Chongqing University, China)</i>	
NDA-CoMBS: Network Demand-Aware Autonomous Cooperative Decision-Making for Mobile Base Stations	818
<i>Yongyi Wu (Xiamen University, China), Ruixiang Luo (Xiamen University, China), Junxiang Ji (Xiamen University, China), Guofeng Luo (Xiamen University, China), Dingqi Yang (University of Macau, China), Cheng Wang (Xiamen University, China), and Longbiao Chen (Xiamen University, China)</i>	

Spatial Optimization of Coverage-Type 3-D Heterogeneous Visual Sensor Networks for Urban Security	826
<i>Yaxuan Liu (School of Automation, Beijing Institute of Technology, China; National Key Lab of Autonomous Intelligent Unmanned Systems, China), Tongyu Wu (School of Automation, Beijing Institute of Technology, China; National Key Lab of Autonomous Intelligent Unmanned Systems, China), Chen Chen (School of Automation, Beijing Institute of Technology, China; National Key Lab of Autonomous Intelligent Unmanned Systems, China), and Yuntian Zhang (School of Automation, Beijing Institute of Technology, China; National Key Lab of Autonomous Intelligent Unmanned Systems, China)</i>	

Session 2: Advanced Applications

MobileHAR: A Lightweight and Efficient Human Activity Recognition Model Based on Inverted Residual Inception Block	834
<i>Ping Wang (Chongqing University, China), Fangming Guo (Chongqing University, China), Fuqiang Gu (Chongqing University, China), Mingyan Li (Chongqing University, China), and Xianlei Long (Chongqing University, China)</i>	
Cooperative Perception with Deep Reinforcement Learning in Vehicular Networks	842
<i>Chen Chen (Fuzhou University, China), Fan Xu (Fuzhou University, China), Jiayuan Lin (Fuzhou University, China), Xinxin Feng (Fuzhou University, China), and Haifeng Zheng (Fuzhou University, China)</i>	
STErrorCopilot: A Visualization and Diagnosis Copilot on Traffic Forecasting Models	850
<i>Xiuhuai Xie (Xiamen University, China), Yayao Hong (Xiamen University, China), Jiangyi Fang (Peking University, China), Liyue Chen (Peking University, China), Leye Wang (Peking University, China), Zhengquan Li (Xiamen University, China), Guofeng Luo (Xiamen University, China), Cheng Wang (Xiamen University, China), and Longbiao Chen (Xiamen University, China)</i>	
CCFPMF: A Channel Model Migration Approach for C-V2X Channel Modeling	858
<i>Lingqiu Zeng (Chongqing University, China; School of Microelectronics and Communication Engineering, China), Jiaxuan Jin (Chongqing University, China; School of Microelectronics and Communication Engineering, China), Qingwen Han (Chongqing University, China; School of Microelectronics and Communication Engineering, China), Han Hu (Chongqing University, China; School of Microelectronics and Communication Engineering, China), Lei Ye (Chongqing University, China; School of Microelectronics and Communication Engineering, China), and Jianzhong Li (Chongqing University, China; School of Microelectronics and Communication Engineering, China)</i>	
Adaptive Multicasting for MEC-Assisted 360-Degree Video Streaming	866
<i>Zhuolin Liu (University of Science and Technology of China, China), Xiaobin Tan (University of Science and Technology of China, China; Hefei Comprehensive National Science Center, China), Shunyi Wang (University of Science and Technology of China, China), Yaying Pan (University of Science and Technology of China, China), Zhiwei Tai (University of Science and Technology of China, China), and Peng Xie (University of Science and Technology of China, China)</i>	

Session 3: Federated Learning and Optimization

Federated Subgraph Learning Over Spatio-Temporal Graphs for Traffic Prediction	874
<i>Haibing Jin (Xiamen University, China), Zihui Wang (Xiamen University, China), Jianzhong Qi (University of Melbourne, Australia), Cheng Wang (Xiamen University, China), and Xiaoliang Fan (Xiamen University, China)</i>	
HfedPES: Hierarchical Personalized Federated Learning with Edge Selection	884
<i>Kunhong He (Chongqing University, China), Pengzhan Zhou (Chongqing University, China), Yijun Zhai (Chongqing University, China), Yuepeng He (Chongqing University, China), Lin Tan (Chongqing University, China), Dewen Qiao (Chongqing University, China), and Songtao Guo (Chongqing University, China)</i>	
FedRAV: Hierarchically Federated Region-Learning for Traffic Object Classification of Autonomous Vehicles	892
<i>Yijun Zhai (Chongqing University, China), Pengzhan Zhou (Chongqing University, China), Yuepeng He (Chongqing University, China), Fang Qu (Chongqing University, China), Zhida Qin (School of Computer Science and Technology, Beijing Institute of Technology, China), Xianlong Jiao (Chongqing University, China), Guiyan Liu (Chongqing University, China), and Songtao Guo (Chongqing University, China)</i>	
Reliability-Aware SFC Scheduling in Container Environment via Priority-Based Node Selection	900
<i>Longzhi Dai (Chongqing University, China), Songtao Guo (Chongqing University, China), Guiyan Liu (Chongqing University, China; Tongji University, China), and Dewen Qiao (Chongqing University, China)</i>	
Genetic Algorithm-Based Joint Task Offloading and Resource Allocation in UAV-Enabled Vehicular Edge Computing	908
<i>Ke Xiao (Chongqing Normal University, China), Aoife Dong (Chongqing Normal University, China), Zhixin Mei (Chongqing Normal University, China), and Kuiyuan Feng (Chongqing Normal University, China)</i>	

Track 6: AIoT, Crowd Sensing & Computing

Session 1: Mobile Computing and AIoT

InOut: Lightweight Transferable Multimodal Indoor-Outdoor Detection System with Smartphones	916
<i>Yiyu Xin (University of Science and Technology of China; Deqing Alpha Innovation Institute, China), Chuanzi Zhang (University of Science and Technology of China; Deqing Alpha Innovation Institute, China), Kaiwen Guo (University of Science and Technology of China; Deqing Alpha Innovation Institute, China), Yichao Gao (University of Science and Technology of China; Deqing Alpha Innovation Institute, China), Haohua Du (Beihang University, China), and Xiang-Yang Li (University of Science and Technology of China; Deqing Alpha Innovation Institute, China)</i>	

VRPU: An Efficient Robust Optimization Approach for the Vehicle Routing Problem with Uncertain Travel Times and Demands	924
<i>Benbei Xing (Chang'an University, China), Lei Tang (Chang'an University, China), and Junchi Ma (Chang'an University, China)</i>	
A Novel Algorithm For Thermal Imaging Fault Detection in Photovoltaic Panels	933
<i>Chen Ting (Chang'an University, China), Chen Yuxiu (Chang'an University, China), Zhao Quanzhao (The 39th Research Institute, China Electronics Technology Corporation, China), Gao Tao (Chang'an University, China), Xu Lulu (Chang'an University, China), and Zhao Peng (Chang'an University, China)</i>	
An Algorithm for Constructing Virtual Backbone Network Under Routing Cost Constraint for Heterogeneous Wireless Sensor Networks	939
<i>Yuetao Wang (Nanjing University of Aeronautics and Astronautics, China), Chunyan Liu (Nanjing University of Aeronautics and Astronautics, China), Yunlong Zhao (Nanjing University of Aeronautics and Astronautics, China), and Yang Li (Nanjing University of Aeronautics and Astronautics, China)</i>	
WowSense: A High-Accuracy Real-Time Grip-State Sensing on Commodity Smartphones	948
<i>Yichao Gao (University of Science and Technology of China; Deqing Alpha Innovation Institute, China), Kaiwen Guo (University of Science and Technology of China; Deqing Alpha Innovation Institute, China), Chuanzi Zhang (University of Science and Technology of China; Deqing Alpha Innovation Institute, China), Yiyu Xin (University of Science and Technology of China; Deqing Alpha Innovation Institute, China), Feiyu Han (University of Science and Technology of China; Deqing Alpha Innovation Institute, China), Haohua Du (Beihang University, China), and Xiang-Yang Li (University of Science and Technology of China; Deqing Alpha Innovation Institute, China)</i>	

Session 2: Crowd Sensing & Computing

PRBTD: Data Quality Enhancement for Mobile Crowdsensing without Ground Truth	956
<i>Jiajie Li (Sun Yat-sen University, China), Jinai Li (Sun Yat-sen University, China), Shimin Gong (Sun Yat-sen University, China; Guangdong Provincial Key Laboratory of Fire Science and Intelligent Emergency Technology, China), and Bo Gu (Sun Yat-sen University, China; Guangdong Provincial Key Laboratory of Fire Science and Intelligent Emergency Technology, China)</i>	
Multi-Task Assignment in Sparse Crowdsensing Using Intra-Task and Inter-Task Data Correlations	964
<i>Lele Zhao (Northwestern Polytechnical University, China), Zhiwen Yu (Northwestern Polytechnical University, China), Jiangyan Xu (Northwestern Polytechnical University, China), Ziyue Yu (Northwestern Polytechnical University, China), and Bin Guo (Northwestern Polytechnical University, China)</i>	

Contrastive Learning Based Dynamic Redundancy Detection for Visual Crowdsensing Data	972
<i>Ziyue Yu (Northwestern Polytechnical University, China), Zhiwen Yu (Northwestern Polytechnical University, China), Zhaoxiang Huang (Northwestern Polytechnical University, China), Jiangyan Xu (Northwestern Polytechnical University, China), Lele Zhao (Northwestern Polytechnical University, China), and Bin Guo (Northwestern Polytechnical University, China)</i>	
SSRL: A Multipath Scheduler Switching Framework on Dynamic Environment	980
<i>Tianning Cui (Beijing University of Posts and Telecommunications, P.R. China), Pengjin Xie (Beijing University of Posts and Telecommunications, P.R. China), Liang Liu (Beijing University of Posts and Telecommunications, P.R. China), and Huadong Ma (Beijing University of Posts and Telecommunications, P.R. China)</i>	
Enhancing Membership Inference Attacks in Federated Learning Based on Overfitting Property	989
<i>Xiaoyan Yin (Northwest University, China), Yangyang Li (Academy of Cyber, China), Congrui Bai (Northwest University, China), Qingjie Han (Glodon Software Co., Ltd, China), and Yanjiao Chen (Zhejiang University, China)</i>	

Part II: MSN 2024 Co-Located Workshops

The Fifth International Workshop on Artificial Intelligence Applications in Internet of Things (AI2OT 2024)

Optimizing Bus Priority Signal Control Considering Queue Length and Average Passenger Delay	997
<i>Xin Zhang (Chang'an University, China), Yong Liu (Chang'an University, China), and Chen Mu (Chang'an University, China)</i>	
Adaptive Multi-Agent Trajectory Prediction with Hierarchical Graph-Based Environment Fusion	1003
<i>Shihan Tian (Henan University, China; International Joint Research Laboratory for Cooperative Vehicular Networks of Henan, China), Nianwen Ning (Henan University, China; International Joint Research Laboratory for Cooperative Vehicular Networks of Henan, China), Wei Li (Henan University, China; International Joint Research Laboratory for Cooperative Vehicular Networks of Henan, China), Lin Chen (Henan University, China; International Joint Research Laboratory for Cooperative Vehicular Networks of Henan, China), Yanyu Zhang (Henan University, China; International Joint Research Laboratory for Cooperative Vehicular Networks of Henan, China), and Yi Zhou (Henan University, China; International Joint Research Laboratory for Cooperative Vehicular Networks of Henan, China)</i>	
Dynamic Caching for Multi-Job and Real-Time IoT Data Analytics	1009
<i>Fei Xia (State Grid Jiangsu Electric Power Co. Ltd., China), Yingcheng Gu (State Grid Jiangsu Electric Power Co. Ltd., China), Meizhao Liu (State Grid Jiangsu Electric Power Co. Ltd., China), Kai Liu (State Grid Jiangsu Electric Power Co. Ltd., China), Yu Song (State Grid Jiangsu Electric Power Co. Ltd., China), and Liu Wei (State Grid Jiangsu Electric Power Co. Ltd., China)</i>	

Facial Recognition using an mmWave Radar	1015
<i>Huimin Chen (Zhejiang University, China), Jiahe Cao (Zhejiang University, China), Chaojie Gu (Zhejiang University, China), Yong Wang (Zhejiang University, China), Shibo He (Zhejiang University, China), and Zhiguo Shi (Zhejiang University, China)</i>	
ConvMixed-ViT Architecture Based on LoRA for Compressive Sense in 6G-AIoT at Resource Constrained Environment	1022
<i>Yufeng Zhou (Zhejiang Normal University, China), Chenjun He (Zhejiang Normal University, China), Hui Wang (Zhejiang Normal University, China), Yi Zhen (Zhejiang Normal University, China), and Haohua Wang (Zhejiang Normal University, China)</i>	
Partitioning Intelligent Applications Based Inception Networks in Mobile Edge Computing	1029
<i>Juan Fang (Beijing University of Technology, China), Yaxin An (Beijing University of Technology, China), Ziyi Teng (Beijing University of technology, China), and Shen Wu (Beijing University of Technology, China)</i>	
Air-Coupled Lamb Wave for Ultrasonic Communication Based on Adaptive-BPSK in Plate Structures	1035
<i>Tao Zou (Southwest University, China), Yubin Tang (Southwest University, China), Yangchen Liu (Southwest University, China), and Zichuan Fan (Southwest University, China)</i>	
Multi-Vehicle Platooning Strategy for Ramp Merging in Mixed Traffic Environments	1041
<i>Jinfeng Guo (Chang'an University, China), Kun Li (Chang'an University, China), and Chen Mu (Chang'an University, China)</i>	
ProLoRA: Ressource-Efficient Personalized Federated Learning for Sensor Based Human Activity Recognition	1047
<i>Abdoul Fatakhou Ba (Hohai University, China), Yingchi Mao (Hohai University, China), Hamza Djigal (Wenzhou-Kean University, China), and Abdullahi Uwaisu Muhammad (Federal University Dutse, Nigeria)</i>	
TPRGraphMM: Graph-Based Vehicle Map Matching by Travel Pattern Recognition	1055
<i>Yixuan Fei (Chang'an University, China), Ying Li (Chang'an University, China), Yang Liu (Tsinghua University, China), and Mingbo Niu (Chang'an University, China)</i>	

The Second International Workshop on Distributed and Integrated Communication, Sensing, and Computing in Space-Air-Ground Integrated Networks for 6G (DICSC 2024)

Urban Taxi Dispatching Optimization: A Reinforcement Learning-Based Approach	1061
<i>Yue Yu (Tsinghua University, China), Kai Zhang (Tsinghua University, China), and Guowei Zhu (China Academy of Industrial Internet, China)</i>	
A Spatial-Temporal Neural Network for Short-Term Traffic Flow Prediction	1067
<i>Kai Zhang (Tsinghua University, China), Shuaiyu Wang (Tsinghua University, China), Chang Yan (Tsinghua University, China), Buliao Jia (Tsinghua University, China), and Guowei Zhu (China Academy of Industrial Internet, China)</i>	

Anomaly Detection for Coal-Fired Boiler via Adversarial VAE Based Method	1074
<i>Guowei Zhu (China Academy of Industrial Internet, China), Hexiao Zhou (China Academy of Industrial Internet, China), Xinyuan Wang (Monash University, China), and Qingchun Wang (China Academy of Industrial Internet, Harbin Institute of Technology, China)</i>	
A Study of Virtual Concept Drift in Federated Data Stream Learning	1082
<i>Xiaoting Chen (Yunnan University, China), Tengsen Zhang (Yunnan University, China), Guanhui Yang (Yunnan University, China), and Shuo Wang (The University of Birmingham, UK)</i>	
Optimized Resource Scheduling for UAVs in Cell-Free Massive MIMO Systems with Wireless Power Transfer	1088
<i>Yuxuan Zhang (Nanjing University of Posts and Telecommunications, China), Wenxue Sun (Nanjing University of Posts and Telecommunications, China), Siyang Wang (Nanjing University of Posts and Telecommunications, China), Ying Liu (Nanjing University of Posts and Telecommunications, China), Luohan Ning (Nanjing University of Posts and Telecommunications, China), Qin Wang (Nanjing University of Posts and Telecommunications, China), and Haitao Zhao (Nanjing University of Posts and Telecommunications, China)</i>	
Potential Game Based Task Offloading in Aerial-Aided Edge Computing	1094
<i>XuHui Weng (Zhejiang Sci-Tech University, China), Shuyun Luo (Zhejiang Sci-Tech University, China), Zhiyi Luo (Zhejiang Sci-Tech University, China), Dan Liu (Zhejiang Sci-Tech University, China), and Weiqiang Xu (Zhejiang Sci-Tech University, China)</i>	

The First International Workshop on Distributed Machine Learning and Unlearning for Sensor-Cloud Systems (DLS2 2024)

Predicting Superconductor Critical Temperatures with Graph Convolutional Network	1100
<i>Jiahao Kang (Dalian University of Technology, China), Liang Yang (Dalian University of Technology, China), Jingjie Zeng (Dalian University of Technology, China), Zhi Sun (Dalian University of Technology, China), Hongfei Lin (Dalian University of Technology, China), and Junpeng Li (Sino-Platinum Metals CO., LTD., China)</i>	
A Multi-Model Approach for Handling Concept Drifting Data in Federated Learning	1107
<i>Guanhui Yang (Yunnan University, China), Xiaoting Chen (Yunnan University, China), Tengsen Zhang (Yunnan University, China), and Shuo Wang (The University of Birmingham, UK)</i>	
Cross-Lingual Material Property Discovery using Graph Neural Networks and Language Models	1113
<i>Zekun Wang (Dalian University of Technology, China), Jiahao Kang (Dalian University of Technology, China), Huayang Li (Dalian University of Technology, China), Jingjie Zeng (Dalian University of Technology, China), Qi Yang (Dalian University of Technology, China), Liang Yang (Dalian University of Technology, China), Zhi Sun (Dalian University of Technology, China), and Junpeng Li (Sino-Platinum Metals CO., LTD., China)</i>	

The Sixth International Workshop on Network Meets Intelligent Computations (NMIC 2024)

Adaptive Cross-Camera Video Analytics on Edge Device	1120
<i>Yaying Pan (University of Science and Technology of China, China), Xiaobin Tan (University of Science and Technology of China, China; Hefei Comprehensive National Science Center, China), Shunyi Wang (University of Science and Technology of China, China), Ouyang Li (University of Science and Technology of China, China), Mei Du (University of Science and Technology of China, China), and Mingyu Sun (University of Science and Technology of China, China)</i>	
CRNG-PBFT: An Efficient PBFT Algorithm Based on Comprehensive Reputation and Node Grouping for Data Sharing in Digital Twins	1126
<i>Qihua Hu (Fuzhou University, China), Hongju Cheng (Fuzhou University, China), Yang Yang (Singapore Management University, Singapore), Jiale Zhang (Fuzhou University, China), and Longfei Guo (Fuzhou University, China)</i>	
Analysis of Typical Security Threats in the Internet of Things Supply Chain	1132
<i>Shu Feng Tan (Guangdong Power Grid Corporation Limited, China), Jian Wang (Southern Power Grid Digital Power Grid Research Institute, China), Yang Chen (Southern Power Grid Digital Power Grid Research Institute, China), and Ying Fan (Southern Power Grid Digital Power Grid Research Institute, China)</i>	
High Reliability Scheduling for DAG Based Service Function Chains	1138
<i>Shizhan Lan (South China University of Technology, China; China Mobile Group Guangxi branch Co., Ltd, China), Junzhong Jia (South China University of Technology, China), Hao Guo (South China University of Technology, China), and Zhenyu Wang (South China University of Technology, China)</i>	
Incremental Sampling for Class Imbalanced Data Streams in Federated Learning	1144
<i>Tengsen Zhang (Yunnan University, China), Xiaoting Chen (Yunnan University, China), Guanhui Yang (Yunnan University, China), and Shuo Wang (The University of Birmingham, UK)</i>	

The Eighth International Workshop on Network Softwarization Techniques for IoT Application (SoftIoT 2024)

A Novel Method for Multi-Vehicle Cooperative Positioning Based on TDOA/FDOA	1150
<i>Yuxin Song (Nanjing University of Posts and Telecommunications), Hui Zhang (Nanjing University of Posts and Telecommunications), Pingping Tang (Anhui Normal University), Qin Wang (Nanjing University of Posts and Telecommunications), and Hongbo Zhu (Nanjing University of Posts and Telecommunications)</i>	
A Federated Transfer Learning Framework with Multi-Scale Aggregation for Surface Defect Classification in IIoT	1156
<i>Pengcheng Xia (Nanjing University of Science and Technology, China), Shun Yao Wang (Nanjing University of Science and Technology, China), Yiyang Ni (Jiangsu Second Normal University, China), Zhen Mei (Nanjing University of Science and Technology, China), and Jun Li (Nanjing University of Science and Technology, China)</i>	

Integrating K-Anonymity with Meta-Heuristic Algorithms for Enhanced Data Privacy and Security	1162
<i>Abdulaziz Alshammari (Imam Mohammad Ibn Saud Islamic University (IMSIU), Saudi Arabia)</i>	
Research on the Compatibility and Adaptability of IoT Products Based on the IPv6 Protocol Testing	1170
<i>Ke Lu (Nanjing Vocational Institute of Mechatronic Technology, China), Wenjun Yuan (Dahua Technology Co., Ltd., China), Shuyi Wang (NanHang JinCheng College, China), and Yunxiao Huang (Electronic Information System Co., LTD., China)</i>	
A Communication Protocol Recognition Method Based on AlexNet Deep Learning for Internet of Things	1176
<i>Jiawei Li (Anhui University, China), Hui Zhi (Anhui University, China), Zhiwei Zheng (Anhui University, China), Kui Tie (Zhongdian Kesiyi Technology (Anhui) Co., Ltd, China), and Xianpeng Wang (Zhongdian Kesiyi Technology (Anhui) Co., Ltd, China)</i>	

Part III: MSN 2024 Posters

Software-Defined Satellite-Terrestrial Integrated Networks with Open-Source Simulation Platforms	1182
<i>Haoyu Han (Beijing University of Posts and Telecommunications, China), Weiwei Jiang (Beijing University of Posts and Telecommunications, China), Yang Zhang (Beijing University of Posts and Telecommunications, China), and Jianbin Mu (Zhejiang University of Technology, China)</i>	
Learning Automatic Team Coordination in Human-Machine Partnerships	1184
<i>Hui Wang (Northwestern Polytechnical University, China), Youcheng Zhang (Northwestern Polytechnical University, China), Zhiwen Yu (Northwestern Polytechnical University, China; Harbin Engineering University, China), Yao Zhang (Northwestern Polytechnical University, China), Jiaqi Liu (Northwestern Polytechnical University, China), and Bin Guo (Northwestern Polytechnical University, China)</i>	
Adversarial Sample Optimization in Multi-Domains	1186
<i>Heng Chen (Harbin Engineering University, China), Yalong Zhu (Harbin Engineering University, China), and Liguozhang (Harbin Engineering University, China)</i>	
Efficient Caching in Cyber-Physical-Social Systems Based on Social-Aware and Popularity Prediction	1188
<i>Wei Zhang (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Xukun Sun (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China; Quan Cheng laboratory, China), Hao Hao (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), and Huiling Shi (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China)</i>	

Towards Efficient Edge Caching: A Federated Reinforcement Learning Approach in Cloud-Edge-End Networks	1190
<i>Zheng Su (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Huiling Shi (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Hao Hao (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), and Wei Zhang (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China)</i>	
A Dual Convolution Hybrid Multi-Model for Code Vulnerability Detection	1192
<i>Yifei Sun (Harbin Engineering University, China) and Wenqi Zheng (Harbin Engineering University, China)</i>	
A Routing Algorithm for Ensuring the Schedulability of Time-Sensitive Flows	1194
<i>Yiwei Zhang (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Xiaolong Wang (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Wei Zhang (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Cheng Wang (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), and Huiling Shi (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China)</i>	
Multimodal Data Generation for Audio and Video Interaction	1196
<i>Yitong Zhang (Harbin Engineering University, China), Yalong Zhu (Harbin Engineering University, China), and Liguang Zhang (Harbin Engineering University, China)</i>	
Intrusion Detection Method of Unmanned Aerial Vehicles Based on Lightweight Transformer	1198
<i>Peng Wang (Air Force Engineering University, China), Xiaodan Wang (Air Force Engineering University, China), Yafei Song (Air Force Engineering University, China), and Deyang Tian (Air Force Engineering University, China)</i>	
Stackelberg Game-Based Optimization of Resource Allocation for IoV Edge-Cloud Cooperation ..	1200
<i>Zhuocheng Du (Jiangnan University, China) and Yuanzhi Ni (Jiangnan University, China)</i>	
Poster Abstract: Leveraging Phase Offset for Stealthy Backdoor Attacks	1202
<i>Yu Xia (Jiangsu Ocean University, China), Yan Ren (Dalian University of Technology, China), Linkang Du (Xi'an Jiaotong University, China), and Heng Zhang (Jiangsu Ocean University, China)</i>	
GazeMotif: A Gaze Speed Motif Based Learning Behaviour Analysis Framework for Video Learning	1204
<i>Huicong Li (Guangdong University of Technology, China), Zhuo Yang (Guangdong University of Technology, China), Yaqi Xie (South China Normal University, China), Su Mu (South China Normal University, China), and Wenqi Zheng (Harbin Engineering University, China)</i>	

SSPT: A Self Supervised Network Traffic Anomaly Detection Method	1206
<i>Xuan Wu (Air Force Engineering University, China), Xiaodan Wang (Air Force Engineering University, China), Yafei Song (Air Force Engineering University, China), and Peng Ding (Air Force Engineering University, China)</i>	
Enabling Privacy-Preserving Incentives for Blockchain-Based Mobile Crowdsensing	1208
<i>Yuanhang Zhou (Southeast University, China), Chunming Kong (Southeast University, China), and Fei Tong (Southeast University, China; Purple Mountain Laboratories, China)</i>	
Task Offloading Optimization Design for Delay-Sensitive and Energy-Constrained Applications in Fog Computing	1210
<i>Xiaochuan Guo (Nanchang University, China), Wufei Wu (Nanchang University, China), Lei Li (Nanchang University, China), Sai Xiao (Nanchang University, China), Yong Xie (Nanning University of Posts and Telecommunications, China), and Keqin Li (State University of New York, USA)</i>	
Poster: A Social Media Pre-Training Framework for Rumor Detection Utilizing User Feedback	1212
<i>Haolai Zhang (Harbin Engineering University), Wei Wang (Harbin Engineering University), Pengfei Gao (Unicom Industrial Internet Co., Ltd), Songqian Li (Harbin Engineering University), Yi Tian (Harbin Engineering University), and Qizheng Pan (Harbin Engineering University)</i>	
Poster: Automatic Detection of Minimal Repeated Patterns in Printed Fabrics of Ethnic Minority Costumes	1214
<i>Li Ding (Jiangsu Ocean University, China), Qiyan Zang (Jiangsu Ocean University, China), Zihao Luo (Jiangsu Ocean University, China), Yu Wang (Jiangsu Ocean University, China), Huizhu Teng (Jiangsu Ocean University, China), Jian Zhang (Jiangsu Ocean University, China), and Heng Zhang (Jiangsu Ocean University, China)</i>	
Parallel Correlation Attention Modules are used for Feature Extraction and Fusion to Achieve Accurate Target Segmentation	1216
<i>Mingze Xia (Harbin Engineering University, China), Liguang Zhang (Harbin Engineering University, China), Guisheng Yin (Harbin Engineering University, China), and Yuxin Dong (Harbin Engineering University, China)</i>	
Design and Implementation of a Highway Accident Rescue Simulation System	1218
<i>Guanghui Wang (Henan University, China), Yongde Huang (Henan University, China), and Bin Xu (Henan University, China)</i>	
Poster Abstract: Intrusion Detection for In-Vehicle Networks Based on Parc-Net Architecture	1220
<i>Mingming Tan (Jiangsu Ocean University, China), Heng Zhang (Jiangsu Ocean University, China), Xin Wang (Qilu University of Technology, China), Ming Li (Jiangsu Ocean University, China), Meng Huang (Jiangsu Ocean University, China), and Jian Zhang (Jiangsu Ocean University, China)</i>
