**Volume 13409**

Proceedings of SPIE, 1605-7422, V. 13409

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Medical Imaging 2025: Image Perception, Observer Performance, and Technology Assessment*, edited by Mark A. Anastasio, Jovan G. Brankov, Proc. of SPIE 13409, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii Conference Committee

---

## OBSERVER PERFORMANCE

---

- 13409 03 **Observer performance and eye tracking variations as a function of AI output format (Invited Paper)** [13409-1]
- 13409 04 **Mitigating visual hindsight bias in radiology: can education alter perceptual decision making?** [13409-3]
- 13409 05 **Capturing eye movements during ultrasound-guided embryo transfer: first insights** [13409-4]

---

## BREAST

---

- 13409 06 **The relationship between eye tracking features and transfer learning in modeling decision prediction of radiologists reading mammograms (Invited Paper, All-Conference Best Student Paper Award - Finalist)** [13409-5]
- 13409 07 **Performance of tomosynthesis vs. mammography in women with a family history of breast cancer** [13409-6]
- 13409 08 **Interrogating expert observer performance in a BreastScreen Australia radiology cohort** [13409-7]
- 13409 09 **Adaptation effects on breast density judgements with blended stimuli** [13409-8]
- 13409 0A **AI performance in screening mammograms may improve through multiresolution data augmentation** [13409-9]

---

## MODEL OBSERVERS

---

- 13409 0B **Anatomical texture impacts model observer detection performance: an inkjet-printed phantom study** [13409-10]
- 13409 0C **Using gradient of Lagrangian function to compute efficient channels for the ideal observer** [13409-11]
- 13409 0D **Effects of feature selection and internal noise levels for a search-capable model observer** [13409-12]
- 13409 0E **Combining image texture and morphological features in low-resource perception models for signal detection tasks** [13409-13]

13409 OF **Perceived color contrast metrics for clinical images** [13409-14]

13409 OG **Assessment of cell nuclei AI foundation models in kidney pathology** [13409-15]

---

**CAD AND PERCEPTION: JOINT SESSION WITH CONFERENCES 13407 AND 13409**

---

13409 OH **Does concurrent reading with AI lead to more false negative errors for cancers that are not marked by AI? (Invited Paper)** [13409-16]

13409 OI **Dual roles of calcification features in the Mirai mammographic breast cancer risk prediction model: early microcalcification detection and identification of high-risk calcifications** [13409-17]

13409 OJ **Automated multi-lesion annotation in chest x-rays: annotating over 450,000 images from public datasets using the AI-based smart imagery framing and truthing (SIFT) system** [13409-18]

---

**TECHNOLOGY ASSESSMENT**

---

13409 OK **A kernel analysis of network denoisers for CT imaging (Invited Paper)** [13409-19]

13409 OL **On the clinical usefulness of cone beam CT short scans and super-short scans for detection of fractures in the extremities** [13409-20]

13409 OM **Learning stochastic object models using ambient adversarial diffusion models** [13409-21]

13409 ON **A tool for visual quality assessment of display devices used in digital pathology** [13409-22]

---

**TASK-INFORMED COMPUTED IMAGING**

---

13409 OO **Estimating task-based performance bounds for accelerated MRI image reconstruction methods by use of learned ideal observers (Invited Paper)** [13409-23]

13409 OP **Task-based regularization in penalized least squares for binary signal detection tasks in medical image denoising** [13409-24]

13409 OQ **Investigating the impact of data consistency in task-informed learned image reconstruction method** [13409-25]

13409 OR **Direct optimization of signal detection metrics in learning-based CT image restoration** [13409-26]

13409 OS **Investigating usable information for assessing the impact of medical image processing** [13409-27]

---

#### DATA ISSUES FOR AI ASSESSMENT

---

- 13409 OT **Ambient denoising diffusion generative adversarial networks for establishing stochastic object models from noisy image data (Invited Paper)** [13409-28]
- 13409 OU **Comparative analysis of data representativeness across medical image datasets using multidimensional similarity measures** [13409-29]
- 13409 OV **Dataset distillation in medical imaging: a feasibility study (All-Conference Best Student Paper Award - Finalist)** [13409-30]
- 13409 OW **Enhancing radiological assessment of dust diseases: evaluating the impact of online self-assessment educational modules and feedback interventions** [13409-31]
- 13409 OX **Evaluating machine learning models: insights from the Medical Imaging and Data Resource Center mastermind challenge on pneumonia severity** [13409-32]
- 13409 OY **Sequestration of imaging studies in MIDRC: controlling for ingenuous and disingenuous use of sequestered data** [13409-33]

---

#### POSTER SESSION

---

- 13409 OZ **Assessment of an alpha version of Ommo tracking system in a surgical environment: a preliminary study** [13409-34]
- 13409 10 **Realtime dual camera localization and orientation tracking for calibrating magnetically navigated capsule endoscopy** [13409-35]
- 13409 11 **Weighted circle fusion: ensembling circle representation from different object detection results** [13409-36]
- 13409 12 **Task-focused knowledge transfer from natural images for CT image quality assessment** [13409-37]
- 13409 13 **Enhancing breast arterial calcification segmentation: a comparative study of AI and human reader variability (Honorable Mention Poster Award)** [13409-38]
- 13409 14 **Quantifying uncertainty in lung cancer segmentation with foundation models applied to mixed domain datasets (Cum Laude Poster Award)** [13409-39]
- 13409 15 **Improvement in breast lesion classification utilizing deep learning and treatment response assessment maps (TRAMs)** [13409-40]
