Volume 13410

Proceedings of SPIE, 1605-7422, V. 13410

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Medical Imaging 2025: Clinical and Biomedical Imaging*, edited by Barjor S. Gimi, Andrzej Krol, Proc. of SPIE 13410, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

NOVEL MOLECULAR, FUNCTIONAL, MRI, AND NANOPARTICLE IMAGING TECHNOLOGIES

- 13410 02 **NIR-II fluorescence molecular tomography based on transformer encoder architecture (Invited Paper)** [13410-1]
- 13410 03 **Cognitive change, A β deposition, and glymphatic system dysfunction** [13410-2]
- 13410 04 **Assessing the impact of a pre-processing pipeline on a tumor localization model in prostate MRI within a large multi-institutional dataset (NRG-GU005)** [13410-3]
- 13410 05 **Exploring VivoVistTM for ex vivo micro-CT imaging of mouse vasculature** [13410-4]
- 13410 06 **An analytic approach to orthopositronium lifetime estimation in positronium lifetime imaging** [13410-5]
- 13410 07 **High-resolution micro-CT imaging protocols for studies of intracranial aneurysms in murine models** [13410-6]

OCULAR, OCT, AND OPTICAL IMAGING

- 13410 08 **Wavefront sensing technologies for bioimaging (Invited Paper)** [13410-7]
- 13410 09 **Dynamic retinal blood flow analysis: heartbeat-correlated artery and vein identification in laser speckle flowgraphy** [13410-8]
- 13410 0A **A dual-camera high-resolution hyperspectral imaging system for the retina (All-Conference Best Student Paper Award - Honorable Mention)** [13410-9]

BONE/SKELETAL IMAGING

- 13410 0B **A conditional generative diffusion model of trabecular bone with tunable microstructure (Invited Paper)** [13410-11]
- 13410 0C **Comparison between masked stereolithography and fused deposition modeling 3D-printed synthetic vertebra for surgical training and simulation of pedicle screw fixation** [13410-12]
- 13410 0D **Quantitative comparison of femurs in apolipoprotein E mouse models using high-resolution photon-counting micro-CT** [13410-13]

13410 OE **Landmark prediction in large radiographs using RoI-based label augmentation** [13410-14]

13410 OF **Ultra-low dose CT-based automated volumetric measurement of muscle, fat, and body-composition at the hip** [13410-15]

AI, ML, DEEP LEARNING, NEURAL NETWORKS IN MOLECULAR, STRUCTURAL, FUNCTIONAL IMAGING I

13410 OG **Development of composite clinical-radiological tool to predict functional outcomes after ischemic stroke treatment** [13410-16]

13410 OH **Coronary artery segmentation with dual convolution-transformer U-Net for cardiovascular interventions** [13410-17]

13410 OI **Data harmonization with StyleTransfer-GANs: enhancing non-invasive IDH classification in brain tumors** [13410-18]

13410 OJ **Deep learning super-resolution from normal to ultra-high resolution CT: conditional diffusion model development and performance evaluation in trabecular bone radiomics** [13410-19]

CLINICAL IMAGING

13410 OK **First in vivo demonstration of 1000 fps high speed x-ray angiography in quantifying flow in the carotid artery of live animal models (Invited Paper)** [13410-20]

13410 OL **Accuracy of 3D ultrasound in the measurement of thyroid nodules compared to 2D ultrasound** [13410-21]

13410 OM **Altered hierarchical rank in intrinsic neural time-scales in autism spectrum disorder** [13410-22]

13410 ON **Prior knowledge-based blood vessel reconstruction and thrombus visualization using confocal laser scanning microscopic images** [13410-23]

NEUROIMAGING

13410 OO **Large-scale augmented Granger causality (lsAGC) for enhanced analysis of brain connectivity in autism spectrum disorder (Invited Paper)** [13410-24]

13410 OP **Analysis of brain connectivity in autism spectrum disorder using large-scale non-linear Granger causality (lsNGC)** [13410-25]

13410 OQ **Attention rings for shape analysis and application to MRI quality control** [13410-26]

13410 OR **Investigating effects of air quality and weather on human brain volumes** [13410-27]

13410 OS **Few-shot segmentation and fiber tractography of human vagus nerve using 3D-MUSE imaging** [13410-28]

AI, ML, DEEP LEARNING, NEURAL NETWORKS IN MOLECULAR, STRUCTURAL, FUNCTIONAL IMAGING II

13410 OU **Exploring multimodal data fusion and augmentation strategies for imbalanced datasets for intraoperative aneurysm occlusion prognosis** [13410-29]

13410 OV **Automating spinal alignment analysis with machine learning and PCdare software: focus on idiopathic scoliosis** [13410-30]

13410 OW **BioVLM-T: A temporal framework for radiology report generation using pre-trained vision language foundational models** [13410-31]

13410 OX **Exploring the capabilities of CNNs for 3D angiographic reconstructions from limited projection data using rotational angiography** [13410-32]

CARDIAC AND SOFT TISSUE IMAGING

13410 OY **Multitask affinity learning for quantitative ultrasound imaging (Invited Paper)** [13410-34]

13410 OZ **4D hyperspectral imaging for intraoperative tissue classification** [13410-35]

13410 IO **Left ventricle mesh generation for deformation analysis based on 3D echocardiographic images** [13410-36]

13410 II **Deep learning-enabled, computed-tomography-based race- and sex-specific epicardial adipose tissue thresholds for cardiovascular risk stratification** [13410-37]

IMAGE PROCESSING, DETECTION, SEGMENTATION, ANALYSIS FOR QUANTIFYING/MODELING

13410 IJ **nnU-Net-driven lymph node segmentation and pyradiomics-based feature extraction for automated extranodal extension classification in head and neck cancer (Invited Paper)** [13410-38]

13410 IK **Reconstruction of 3D vascular flow patterns from sparse angiographic data using a 3D convolutional neural network (CNN)** [13410-39]

13410 IL **Real-time video enhancement for narrow-band imaging bronchoscopy** [13410-40]

13410 IM **Automated registration of 3D neurovascular territory atlas to 2D DSA for targeted quantitative angiography analysis in subarachnoid hemorrhage** [13410-41]

- 13410 16 **Anatomically ROI and IOI informed hybrid U-Net model for abdominal object segmentation in CT images** [13410-42]

POSTER SESSION

- 13410 17 **Generation of CT brain perfusion maps via unsupervised learning** [13410-43]
- 13410 18 **Integrated video analysis system for autofluorescence bronchoscopy** [13410-44]
- 13410 19 **Comparing foundation models and nnU-Net for segmentation of primary brain lymphoma on clinical routine post-contrast T1-weighted MRI** [13410-45]
- 13410 1A **Automatic lesion detection in high-definition white-light bronchoscopic video** [13410-46]
- 13410 1B **Exploring injection bias reduction techniques in quantitative angiography using patient-specific phantoms of intracranial aneurysm with diverse morphologies and locations** [13410-47]
- 13410 1C **Comparison between lymph-specific magnetic resonance lymphangiography (MRL) and near-infrared indocyanine green lymphangiography (NIRF-ICGL) for evaluation of lymphedema** [13410-48]
- 13410 1D **1000 fps high-speed angiography (HSA) evaluation of vortex flow characteristics in 3D-printed cerebral vascular aneurysm phantoms** [13410-49]
- 13410 1G **Multispectral image analysis of rat skin flaps with vascular occlusion** [13410-52]
- 13410 1H **Long short-term memory (LSTM) architecture-based neural network encoder model for reducing noise in 1000fps high-speed angiography image sequences** [13410-53]
- 13410 1I **Bundle-wise functional connectivity density and fractional amplitude of low-frequency fluctuations decrease in white matter in preclinical Alzheimer's disease and are associated with A β levels and cognition** [13410-54]
- 13410 1J **Enhanced NIR-II fluorescence molecular imaging with self-supervised denoising diffusion** [13410-55]
- 13410 1K **The medical segmentation decathlon without a doctorate** [13410-57]
- 13410 1L **Improved accuracy and detectability of coronary artery calcium scoring using volume fraction calcium mass at reduced radiation dose levels** [13410-58]
- 13410 1M **Topological data analysis of coronary artery calcifications detected on non-contrast CT calcium score images enhances cardiovascular risk assessment** [13410-59]
- 13410 1N **Personalized risk assessment for heart failure and atherosclerosis in diabetes: radiomic analysis of coronary calcium and epicardial adipose tissue on cardiac CT (Cum Laude Poster Award)** [13410-60]

- 13410 1O **Simulation of facial skin lesions leveraging texture-preserving inpainting and color image decomposition** [13410-61]
- 13410 1P **Enhancing brain tumor detection using optical coherence tomography and variational autoencoders** [13410-62]
- 13410 1Q **Prediction of disease quantification via PET/CT images and auto-segmentation of target objects** [13410-64]
- 13410 1R **Attention variant mechanism for airways segmentation** [13410-65]
- 13410 1S **Prediction of major adverse cardiovascular events (MACE) from disease progression in low-cost (no-cost) screening CT calcium score images** [13410-66]
- 13410 1T **MRI prostate and tumor segmentation with fine-tuned SAM: a path to enhanced treatment planning** [13410-67]
- 13410 1U **Improving cardiovascular risk assessment through comprehensive radiomics analysis of epicardial adipose tissue in screening non-contrast CT calcium score images** [13410-68]
- 13410 1W **Cycle-guided denoising diffusion probability model for 3D cross-modality MRI synthesis** [13410-70]
- 13410 1X **TTT-SEG: a multi-structure segmentation on cardiac MRI using vision testing-time training network** [13410-71]
- 13410 20 **Investigating the impact of kernel harmonization and deformable registration on inspiratory and expiratory chest CT images for people with COPD** [13410-74]
- 13410 21 **Segmentation of ACDC challenge cardiac MRI dataset across diverse neural network architectures** [13410-75]
- 13410 23 **Clustering-based model reduction for glioma graph networks** [13410-77]
- 13410 24 **Synthetic data-driven multi-architecture framework for automated polyp segmentation through integrated detection and mask generation** [13410-78]
- 13410 25 **MultiScalePatch-Net: a hierarchical multiscale patch-based dual-view CNN model for diagnosis of adult elbow fractures in radiographs** [13410-79]
- 13410 26 **Semi-automated segmentation of magnitude images in 4D flow MR scans using segment anything model 2 (SAM 2)** [13410-80]
- 13410 27 **Role of mitral inflow and wall motion in the left ventricular vortices** [13410-81]
- 13410 28 **Determination of the point-of-first-interaction for an ultra-high-performance brain PET system with onion ring geometry** [13410-84]

DIGITAL POSTER SESSION

- 13410 29 **Boundary-refined attention networks for retinal layer segmentation in optical coherence tomography imaging** [13410-10]
