Volume 13427

Proceedings of SPIE 0277-786X, V. 13427

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Novel Patterning Technologies 2025*, edited by Ricardo Ruiz, Richard A. Farrell, Proc. of SPIE 13427, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SCANNING PROBE AND TIP-BASED LITHOGRAPHY

- 13427 02 **High-precision tip-based nanofabrication and nanometrology in extended macroscopic working areas (Invited Paper)** [13427-1]
- 13427 03 **Advanced electrical and thermal scanning probe lithography for next-generation nanodevice fabrication (Invited Paper)** [13427-2]

TWO-PHOTON, MULTICOLOR AND DIRECT WRITE LITHOGRAPHY

- 13427 04 **Progress of optical direct write technology for fine patterning (Invited Paper)** [13427-7]

ELECTRON MULTIBEAM MASK WRITER

- 13427 05 **Full reticle curvilinear inline linearity correction including variable bias with zero turnaround time (Invited Paper)** [13427-13]
- 13427 06 **Multi-beam mask writer MBM-4000 for high-NA EUV era (Invited Paper)** [13427-14]

NANOIMPRINT LITHOGRAPHY I

- 13427 07 **Nanoimprint technology issue and outlook (Invited Paper)** [13427-17]
- 13427 08 **Development of UV-NIL resist for semiconductor device manufacturing (Invited Paper)** [13427-18]
- 13427 09 **Enhanced nanoimprint lithography productivity using solvent-based resists (Invited Paper)** [13427-19]
- 13427 0A **Optimization of NIL and associated processes for the fabrication of advanced devices (Invited Paper)** [13427-20]
- 13427 0B **Investigation of particle induced template damage and proposal of mitigation (Invited Paper)** [13427-21]

NANOIMPRINT LITHOGRAPHY II

- 13427 OC **Nanoimprint process optimization for high volume semiconductor device manufacturing (Invited Paper)** [13427-24]

DIRECTED SELF-ASSEMBLY I

- 13427 OD **Enabling chemically amplified resists towards tight pitch EUV patterning by directed self-assembly (Invited Paper)** [13427-25]
- 13427 OE **Improvement of EUV contact hole pattern rectification using novel directed self-assembly materials** [13427-27]
- 13427 OF **Roughness improvements with new high-chi block copolymers for EUV rectification directed self-assembly (Invited Paper)** [13427-29]

DIRECTED SELF-ASSEMBLY II

- 13427 OG **Directed self-assembly of medium-chi and high-chi block copolymers for DRAM C/H patterning** [13427-31]

JOINT SESSION WITH 13427 AND 13429: HETEROGENEOUS INTEGRATION AND ADVANCED PACKAGING

- 13427 OH **Patterning and repair of transparent conductive oxide films with capillary printing (Invited Paper)** [13427-38]
- 13427 OI **Digital lithography technology for advanced packaging manufacturing** [13427-39]
- 13427 OJ **High resolution patterning of positive resist for semi-additive process** [13427-40]
- 13427 OK **Ultra-fast correlative chemical-mechanical-polishing (CMP) metrology: integrating phase shifting interferometry with active-probe scanning probe microscopy (Invited Paper)** [13427-41]

NOVEL PATTERNING

- 13427 OL **IR resist patterning by maskless exposure for high-performance applications** [13427-44]

DIRECTED SELF-ASSEMBLY III

- 13427 OM **Nanometer-precise DSA with DNA (Invited Paper)** [13427-46]

POSTER SESSION

- 13427 OO **Highly efficient optical filters based on quasi-3D nanostructures for spectral infrared imaging** [13427-51]
- 13427 OP **Combination of thermal scanning probe lithography and directed self-assembly of block copolymers (Novel Patterning Technologies Student Award)** [13427-52]
- 13427 OQ **Improving 28nm pitch line and space EUV patterns by the directed self-assembly of block copolymers** [13427-54]
- 13427 OR **Simultaneous multi-point glass processing using diffractive optical element and KrF excimer laser** [13427-55]
- 13427 OS **Challenges of photolithography processing on glass wafers within a 300mm CMOS wafer fab** [13427-56]
- 13427 OT **Study on modeling of resist heating effect correction in multi-beam mask writers** [13427-57]
- 13427 OU **Arbitrary point displacement on B-spline curve** [13427-58]
- 13427 OV **Complex L/S and via patterning for damascene interconnects using nanoimprint lithography** [13427-60]
- 13427 OW **Enhancing lithographic process latitude: a powerful approach using inverse lithography technology for depth of focus improvement** [13427-63]
- 13427 OX **Photolithography and nanoimprint lithography-based SiN_x membrane filters applied to the isolation of bovine milk exosomes via electrophoretic oscillation** [13427-64]
- 13427 OY **Optimizing EUV OPC runtime and pattern fidelity in DRAM manufacturing using memory OPC flow** [13427-66]
- 13427 OZ **Precise 3D CNT array catalyst patterning using two-photon lithography for enhanced liftoff and scalability** [13427-67]
- 13427 IO **The fabrication of nano-scale fin LEDs using nanoimprinting lithography** [13427-68]
- 13427 I1 **Immersion interference lithography for realizing a large slant angle beyond the limit** [13427-69]
- 13427 I2 **Improving throughput of two-beam interference lithography using narrow-bandwidth nanosecond pulsed laser** [13427-70]
- 13427 I3 **Fabrication of periodic fringe pattern of high spatial frequency for visible light lithography using dual aperture compact holographic lens system** [13427-72]
