SPIE

Volume 13433

Proceedings of SPIE 0277-786X, V. 13433

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multifunctional Materials and Structures*, edited by Mariantonieta Gutierrez Soto, Russell W. Mailen, Fulvio Pinto, Proc. of SPIE 13433, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

COMPLIANT MECHANISMS AND METAMATERIALS I

- 13433 02 **U.S. interstate and air traffic maps: creating a multilayered lattice material as a component within nonlinear structures (Keynote Paper)** [13433-1]
- 13433 03 **Design optimization of flexible kerf structures under quasi-static loading (Invited Paper)** [13433-2]
- 13433 04 **Inflatable bistable Kresling structures as deployable towers** [13433-3]
- 13433 05 **Experiments and modeling of a shape memory alloy tension spring heat engine** [13433-9]

MATERIALS ADDRESSING SOCIETAL ISSUES I

- 13433 06 **Macroscale characterization of dielectrophoresis effect on particulate-based ferroelectric composites** [13433-5]
- 13433 07 **Pushing the boundaries of green composites: a novel robust inspection system for damage identification and classification in NFRPs** [13433-7]
- 13433 08 **Development of high-performance miniaturized UV-activated sensors for real-time nitrate detection in water and soil** [13433-8]
- 13433 09 **Indentation-driven machine learning approach for estimating rate-dependency in cohesive-frictional materials** [13433-10]

FABRICATION AND MANUFACTURING OF MULTIFUNCTIONAL MATERIALS AND STRUCTURES I

- 13433 0A **Printable ink formulation of piezoelectric ceramic on glass substrates for haptic feedback** [13433-12]

FABRICATION AND MANUFACTURING OF MULTIFUNCTIONAL MATERIALS AND STRUCTURES II

- 13433 0D **A novel method to incorporate particles into endless fiber-reinforced polymers with process evaluation and analysis of the filler distribution** [13433-15]
- 13433 0E **Deep learning-based microstructure reconstruction for characterizing the electromechanical property of nanomaterial networks** [13433-16]

MATERIALS ADDRESSING SOCIETAL ISSUES II

- 13433 OK **Wave attenuation and tunability of a diatomic metamaterial** [13433-21]

MATERIALS ADDRESSING SOCIETAL ISSUES III

- 13433 OL **Increasing access to smart materials and structures through undergraduate research** [13433-22]
- 13433 ON **Modulus tunability in hierarchical architectures: a machine learning-enabled approach** [13433-25]

SMART MATERIAL CHARACTERIZATION I

- 13433 OO **Development and implementation of screen printed flexible piezoelectric sensor-based PI/PZT composite for high temperature** [13433-27]
- 13433 OP **Structural-acoustic coupled modeling of a tunable membrane-type acoustic metamaterial with experimental validation** [13433-28]
- 13433 OQ **Temperature-induced variations in magneto-viscoelastic behavior of magnetorheological elastomers: an experimental study** [13433-29]

COMPLIANT MECHANISMS AND METAMATERIALS II

- 13433 OS **Strain amplifying mechano-luminescent mechanical metamaterials** [13433-30]
- 13433 OT **Conjugated polymeric nanostructures of air-brushed mechano-optoelectronic poly (3-hexylthiophene)-based thin films** [13433-32]
- 13433 OU **Analysis of the multilayer microperforated panel for enhanced noise absorption using numerical and experimental approaches** [13433-33]

SMART MATERIAL CHARACTERIZATION II

- 13433 OV **Influence of 3D printing process parameters on the anisotropic viscoelastic behavior of thermoplastic polyurethane (TPU)** [13433-34]
- 13433 OW **Visco-hyperelastic computational model for injection-molded thermoplastic polyurethane** [13433-35]
- 13433 OX **Temperature-dependent modeling of magnetorheological elastomers: a continuum approach using modified strain energy functions** [13433-36]

- 13433 0Y **Study on the coupling effect of a plate-type piezoelectric vibrator and a polymer-based rod array** [13433-37]
- 13433 0Z **Regional activation of a composite plate using selective actuation from multiple piezoelectric actuators** [13433-38]
