PROCEEDINGS OF SPIE

Digital Twins, AI, and NDE for Industry Applications and Energy Systems 2025

Christopher Niezrecki
Saman Farhangdoust
Editors

17–20 March 2025
Vancouver, B.C., Canada

Sponsored and Published by
SPIE

Volume 13438

Proceedings of SPIE 0277-786X, V. 13438

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Digital Twins, AI, and NDE for Industry Applications and Energy Systems 2025*, edited by Christopher Niezrecki, Saman Farhangdoust, Proc. of SPIE 13438, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

TUESDAY KEYNOTE

13438 02 **Physics-based and data-driven digital twinning of offshore wind turbines using sensor measurements (Keynote Paper)** [13438-27]

DIGITAL TWINS, AI, AND MACHINE LEARNING FOR ENERGY SYSTEMS

13438 04 **Inspection of concrete structures in the nuclear industry: an AI perspective** [13438-2]

13438 06 **Harvesting current power for under ice monitoring** [13438-4]

DIGITAL TWINS: NDE 4.0, MODELING, AND PROGNOSTICS I

13438 07 **Assessing semantic similarity in automated civil engineering image descriptions: evaluation of pretrained vision language models** [13438-5]

13438 08 **Creating schematic representation of corrosion using CGAN and ultrasonic imaging** [13438-6]

13438 09 **LeakGPT: detecting water pipe leaks using vision language models** [13438-7]

13438 0A **A digital twin platform for robotic nondestructive evaluation of reinforced concrete** [13438-8]

DIGITAL TWINS: NDE 4.0, MODELING, AND PROGNOSTICS II

13438 0B **Digital twin framework for a plate bonded with transducer for structural health monitoring using guided waves** [13438-9]

13438 0C **Digital twin modelling for 3D-printed composite structures manufactured by fused filament fabrication method: mesoscale geometry simulation** [13438-10]

13438 0E **Prognosis and predictive modeling of hand movements in industrial tasks using StretchSense glove and digital twin simulations** [13438-14]

AI AND MACHINE LEARNING FOR NDE/SHM-IMAGING

13438 0F **Optical coherence tomography as NDE method for quality control in additive manufacturing** [13438-16]

13438 0H **The analysis of factors influencing defect detection in PVC materials using thermal imaging** [13438-18]

13438 0I **Importance of contrast-to-noise ratio sensitivity function in nondestructive evaluation** [13438-28]

AI AND MACHINE LEARNING FOR INDUSTRY APPLICATIONS OF NDE/SHM

13438 0J **Federated two-stage machine learning model for ultrasonic guided wave structural health monitoring of composite structures** [13438-19]

13438 0K **Characterization and classification of flaws in PAUT using a convolutional neural network** [13438-20]

13438 0L **A study of online melt pool, plume, and spatter tracking in laser powder bed fusion using DBSCAN** [13438-21]

13438 0M **Lite transformer for ultrasonic signal processing** [13438-24]

13438 0P **Towards prescriptive maintenance with digital triplet** [13438-13]
