

PROCEEDINGS OF SPIE

Quantum Information Science, Sensing, and Computation XVII

**Michael Hayduk
Michael L. Fanto
Carlos M. Torres Jr.**
Editors

**14–16 April 2025
Orlando, Florida, United States**

Sponsored and Published by
SPIE

Volume 13451

Proceedings of SPIE 0277-786X, V. 13451

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Information Science, Sensing, and Computation XVII*, edited by Michael Hayduk, Michael L. Fanto, Carlos M. Torres Jr., Proc. of SPIE 13451, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

QUANTUM MATERIALS AND SENSORS I

- 13451 02 **Deployment and scalability of the Networked Quantum Magnetometer Array (NQMA) for subterranean detection and perimeter security applications** [13451-2]

QUANTUM MEC

- 13451 03 **Advanced characterization of 795nm VCSELs for atomic clock applications** [13451-7]

QUANTUM COMPUTING I

- 13451 04 **Programming quantum computers with large language models** [13451-8]
- 13451 05 **Optimizing supervised quantum machine learning for pixel classification** [13451-9]
- 13451 06 **Optimization and realization of boson sampling for true random number generation using the Xanadu X8** [13451-10]
- 13451 07 **Hybrid quantum-classical solution for automated labeling and validation** [13451-11]

QUANTUM COMPUTING II

- 13451 08 **Quantum generative adversarial networks (QGANs) using quantum kernel learning for discriminators (Invited Paper)** [13451-12]
- 13451 09 **Comparative analysis of projector-based compression and quantum autoencoders** [13451-26]

QUANTUM NETWORKING II

- 13451 0A **Improving performance of single-photon avalanche diodes for quantum photonics application** [13451-18]
- 13451 0B **Ultra-fast, low-noise, and scalable SPAD-based single photon detectors for quantum imaging and sensing** [13451-19]

- 13451 0C **Integrating post-quantum cryptography (PQC) with quantum key distribution (QKD): performance, security, and practical challenges** [13451-20]
- 13451 0D **Systems combining quantum entanglement, wavefront design, and quantum networks** [13451-21]

POSTER SESSION

- 13451 0E **Quantum-enhanced training of large language models: a hybrid approach** [13451-14]
