SPIE

Volume 13457

Proceedings of SPIE 0277-786X, V. 13457

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multimodal Image Exploitation and Learning 2025*, edited by Sos S. Agaian, Vijayan K. Asari, Stephen P. DelMarco, Proc. of SPIE 13457, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

IMAGE AND VISION PROCESSING

- 13457 02 **Mathematical modeling of search probability for attitude recovery in vision aided navigation systems** [13457-1]
- 13457 03 **Dual excitation-switchable attention for deep video compression** [13457-2]
- 13457 04 **Smart thresholding in color reduction encoding: optimizing information density with PCA-based data retention** [13457-3]
- 13457 05 **New effective methods of preparation of states of quantum image representation (Best Student Paper Award)** [13457-4]
- 13457 06 **Multimodal zero-shot classification for AI applications in cybersecurity (Best Paper Award)** [13457-28]

INNOVATIVE IMAGING TECHNIQUES

- 13457 08 **A study of the spectral-cutoff imaging method of multiple scattering in isotropic point-like discrete random media (Invited Paper)** [13457-7]
- 13457 09 **Blind image quality assessment via multiscale gradient-based features** [13457-8]
- 13457 0A **New method of computing the quantum cosine transforms** [13457-9]
- 13457 0B **Improving single-image super-resolution through hyperparameter tuning** [13457-10]

MACHINE LEARNING I

- 13457 0D **Enhancing zero-shot classification in chest x-rays via cross-modal representation and attention alignment** [13457-12]
- 13457 0F **AI-based tools for efficient event network communication: transformation and potentials** [13457-14]

MACHINE LEARNING II

- 13457 OG **Segmenting Arctic regions: a spiking U-Net approach for pixel-wise classification of open water, snow, and meltponds** [13457-15]
- 13457 OH **Enhancing situational awareness through hybrid learning: fusing supervised and unsupervised techniques for defense applications** [13457-17]
- 13457 OI **Transformer-based image captioning as a framework for defense applications** [13457-18]
- 13457 OJ **Sawza-LL network: a lightweight deep learning architecture for efficient low-light image enhancement** [13457-19]
- 13457 OK **Retinex-based low-light image enhancement with logarithmic color correction** [13457-21]

POSTER SESSION

- 13457 OM **Adaptive AI-driven brain tumor classification: scalable solutions for enhanced precision in medical imaging** [13457-22]
- 13457 ON **A novel approach to image enhancement using a 2×2 processing model for color-to-grayscale mapping** [13457-23]
- 13457 OO **Q-KAN: enhancing robustness of weather removal: preprocessing-based defense against adversarial attacks** [13457-24]
- 13457 OQ **Web app security: methodology for evaluating web application penetration testing tools** [13457-26]
- 13457 OS **Assessing dataset quality in TorchGeo: ensuring reliability for machine learning in remote sensing applications** [13457-31]
- 13457 OT **Medical image segmentation via shape-dependent anisotropic gradient** [13457-29]
- 13457 OU **Surveillance image enhancement through fusion based on nonsubsampled contourlet transform** [13457-30]
