

PROCEEDINGS OF SPIE

Synthetic Data for Artificial Intelligence and Machine Learning: Tools, Techniques, and Applications III

Kimberly E. Manser
Christopher L. Howell
Raghuveer M. Rao
Celso De Melo
Keith F. Prussing
Editors

14–17 April 2025
Orlando, Florida, United States

Sponsored and Published by
SPIE

Volume 13459

Proceedings of SPIE 0277-786X, V. 13459

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Synthetic Data for Artificial Intelligence and Machine Learning: Tools, Techniques, and Applications III*, edited by Kimberly E. Manser, Christopher L. Howell, Raghuveer M. Rao, Celso De Melo, Keith F. Prussing, Proc. of SPIE 13459, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SYNTHETIC DATA FOR AUTONOMOUS NAVIGATION

- 13459 02 **Generating synthetic data for autonomous vehicle applications with the MSU autonomous vehicle simulator** [13459-4]
- 13459 03 **LiDAR data segmentation for autonomous ground vehicles in adverse weather conditions using deep learning** [13459-2]

GENERATIVE AI FOR SYNTHETIC DATA CREATION I

- 13459 05 **Generative AI methods for synthesis of image data to train AI for automated scene understanding in a military context: a review of opportunities** [13459-5]
- 13459 06 **Encoded image latent space analysis** [13459-6]
- 13459 07 **AugEvo: evolving augmentations to close the sim-to-real gap for AI** [13459-7]
- 13459 08 **Generative AI synthetic data for computer vision tasks** [13459-8]

GENERATIVE AI FOR SYNTHETIC DATA CREATION II

- 13459 09 **Weed image augmentation by IP-adapter-based stable diffusion for multiclass weed detection** [13459-10]
- 13459 0A **Generative SAR data generation for deep learning systems training** [13459-11]
- 13459 0B **Detection of ground targets through transfer learning with generative AI-produced synthetic SAR data** [13459-12]

MULTIMODAL AND MULTIDOMAIN SYNTHETIC DATA GENERATION TOOLS

- 13459 0C **A PyTorch-enabled tool for synthetic event camera data generation and algorithm development** [13459-13]
- 13459 0D **Multimodal synthetic image generation of terrestrial scenes with humans for AI/ML with MuSES** [13459-15]

- 13459 OE **Introducing a tool for synthetic defect image data generation: enhancing industrial surface inspection** [13459-17]
- 13459 OF **SIMPL multiaspect MADD: rapidly generating low-cost multiaspect military data for all-domains at scale** [13459-18]
- 13459 OG **LLM-based TypeScript generation and asset management for procedural synthesis of scenes and data for AI** [13459-38]

COUNTER-AI AND SYNTHETIC DATA DETECTION

- 13459 OH **Developing new solutions for data provenance and deepfake detection using physics, hardware, and machine learning (Invited Paper)** [13459-19]

SYNTHETIC DATA TOOLS FOR IMAGE GENERATION

- 13459 OI **Effective dual-region augmentation for reduced reliance on large amounts of labeled data** [13459-54]
- 13459 OJ **Enhanced self-directed training (ESDT): dynamic data balancing in regression models** [13459-58]

SYNTHETIC DATA FOR AERIAL AND SATELLITE APPLICATIONS

- 13459 OM **Rendered.ai and RIT DIRS laboratory: raising the bar in synthetic MSI and HSI data generation** [13459-21]
- 13459 ON **Satellite imagery: synthetic data configuration and post-processing** [13459-22]
- 13459 OO **Leveraging generative AI for cross-regional small object detection in satellite imagery** [13459-24]

SYNTHETIC DATA FOR RADAR APPLICATIONS: JOINT SESSION WITH CONFERENCES 13459 AND 13471

- 13459 OQ **Methods for bridging the distribution gap between simulated and measured data** [13459-25]
- 13459 OR **Advanced EM simulation for synthetic radar imagery** [13459-27]

**SYNTHETIC DATA FOR MULTISPECTRAL AND HYPERSPECTRAL IMAGING: JOINT SESSION WITH
CONFERENCES 13455 AND 13459**

- 13459 OS **Automated multispectral synthetic data generation and model training toolchain for rapid creation of datasets and models for commercial perception systems and defense ATR and situational awareness electro-optical systems** [13459-28]
- 13459 OT **Generating synthetic hyperspectral imagery using open-source tools** [13459-29]

**INFRARED SYNTHETIC DATA FOR AUTOMATIC TARGET RECOGNITION: JOINT SESSION WITH
CONFERENCES 13459 AND 13463**

- 13459 OU **An evaluation of synthetic infrared image generation tools** [13459-30]
- 13459 OV **EO2IR ControlNet: synthetic infrared image generation for automatic target recognition: experimental results in MIST** [13459-31]
- 13459 OW **Analysis of synthetic data features: closing the realism gap** [13459-32]

SYNTHETIC ASSETS AND DATASETS

- 13459 OX **Modern novel view synthesis algorithms: a survey** [13459-33]
- 13459 OY **HiFiAerial: a photorealistic synthetic dataset with ground truth for dense prediction in aerial imagery** [13459-34]
- 13459 OZ **Synthetic data pretraining for runway damage assessment** [13459-35]
- 13459 11 **Feasibility of using synthetic videos to train a YOLOv8 model for UAS detection and classification (Best Paper Award)** [13459-37]

POSTER SESSION

- 13459 12 **Contextual performance metrics: using synthetic data and automated characterization to contextualize deep neural network performance (Best Poster Award)** [13459-40]
