

PROCEEDINGS OF SPIE

Machine Learning from Challenging Data 2025

**Panagiotis Markopoulos
Bing Ouyang
George Sklivanitis**
Editors

**14–15 April 2025
Orlando, Florida, United States**

Sponsored and Published by
SPIE

Volume 13460

Proceedings of SPIE 0277-786X, V. 13460

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Machine Learning from Challenging Data 2025*, edited by Panagiotis (. Markopoulos, Bing Ouyang, George Sklivanitis, Proc. of SPIE 13460, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ROBUST METHODS

- 13460 02 **AI/ML curation of AI/ML training datasets** [13460-1]
- 13460 03 **Dataset profiling for outlier removal** [13460-2]
- 13460 04 **From noise to insight: smartizing training data for robust AI performance in challenging data environments** [13460-4]

COMMUNICATIONS AND ARRAY PROCESSING

- 13460 06 **Data-driven direction finding with distributed sparse arrays under calibration errors** [13460-6]
- 13460 07 **Quantifying narrowband interference using deep learning models with explainable AI integration** [13460-7]

KEY APPLICATIONS

- 13460 08 **Integrating Bi-LSTM and physics constraint models for improved biomass and water quality prediction in the aquaculture systems** [13460-10]
- 13460 09 **BVI-Mamba: video enhancement using a visual state-space model for low-light and underwater environments** [13460-12]
- 13460 0A **Enhancing low-light instance segmentation through feature-level denoising** [13460-13]

COMPRESSION AND AUGMENTATION

- 13460 0B **Optimal illumination pattern for satellite compressive LiDAR using generative AI** [13460-15]
- 13460 0C **LPTNet for partial ensemble compressive sensing: an unfolded formalism** [13460-16]

COMPUTER VISION AND REMOTE SENSING

13460 0F **Improved fish tracking in underwater images for marine biodiversity monitoring** [13460-19]

POSTER SESSION

13460 0I **Fourier feature neural networks (FFNN) for modeling terahertz plasma wave oscillations in TeraFETs using hydrodynamic charge transport model** [13460-11]
