SPIE

Volume 13461

Proceedings of SPIE 0277-786X, V. 13461

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Geospatial Informatics XV*, edited by Kannappan Palaniappan, Gunasekaran Seetharaman, John M. Irvine, Proc. of SPIE 13461, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

GEOSPATIAL METHODS AND APPLICATIONS

- 13461 02 **Identification of unprepared landing sites for helicopters using geospatial data** [13461-3]
13461 05 **Optimizing short-term data association for multiple object tracking** [13461-30]

GEOSPATIAL ANALYSIS OF MAN AND THE ENVIRONMENT

- 13461 07 **Evaluating broad area search and classification of heavy construction activity from multisource, multitemporal satellite image sequences** [13461-11]
13461 09 **Computer vision-based rock-bolt detection in orthomosaic imagery obtained in GPS-denied environments for mining safety assessments** [13461-12]

UAS, AUTONOMY, AND APPLICATIONS

- 13461 0A **Explainable LLM-based drone autonomy derived from partially observable geospatial data** [13461-14]
13461 0B **3D semantic segmentation network for post-disaster assessment with unmanned aerial vehicles** [13461-16]
13461 0C **Deep-feature-based visual localization with Google Street View** [13461-17]
13461 0D **Aerial visual localization through novel applications of Weisfeiler-Lehman graph embeddings** [13461-19]
13461 0E **Bag-of-graph-attributes and sparse graph structures for efficient UAV localization in complex environments** [13461-18]

POSTER SESSION

- 13461 0J **Change vector analysis based on an optimal threshold with a postprocessing for flood detection in bitemporal satellite images** [13461-2]

DIGITAL POSTER SESSION

- 13461 OM **Automation of AI/ML detection model pipeline using scene complexity** [13461-7]
- 13461 OO **Analysis of African elephants using commercial remote sensing data** [13461-10]
