Volume 13463

Proceedings of SPIE 0277-786X, V. 13463

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Automatic Target Recognition XXXV*, edited by Kenny Chen, Riad I. Hammoud, Timothy L. Overman, Proc. of SPIE 13463, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

AUTOMATIC TARGET RECOGNITION

- 13463 02 **Class-incremental SAR ATR in noisy and adversarial environments** [13463-1]
- 13463 03 **SAR ATR performance evaluation on spatially perturbed synthetically generated signatures (Best Student Paper Award)** [13463-7]
- 13463 04 **An iterative feedback mechanism for improving natural language class descriptions in open-vocabulary object detection** [13463-5]
- 13463 05 **Enhancing neuromorphic-based ATR using digital twin-generated synthetic data** [13463-23]

DEEP LEARNING AND PERFORMANCE I

- 13463 08 **A new similarity evaluation method that reflects the characteristics of SAR images based on statistical quality measurement** [13463-13]
- 13463 09 **Simultaneous classification of objects and unknown rejection (SCOUR) for infrared target recognition** [13463-26]

IMAGE AND DATA PROCESSING FOR AUTOMATIC TARGET RECOGNITION I

- 13463 0A **Fusing color imagery with unstable AI-derived depth estimates for object detection** [13463-8]
- 13463 0B **Radar target recognition using graph-based features and GNN** [13463-10]
- 13463 0C **A robust fake SAR image generation method in terms of similarity for time-sensitive emergency targets** [13463-14]

DEEP LEARNING AND PERFORMANCE II

- 13463 0D **Towards a large language-vision question answering model for MSTAR automatic target recognition** [13463-18]
- 13463 0E **Analysis of deep learning in automatic target recognition: evolution and emerging trends** [13463-19]

13463 OF **Automatic object detection in atmospheric turbulence-affected environments** [13463-20]

13463 OG **Adaptive self-supervised vision transformers for multisensor automatic target recognition**
[13463-25]

IMAGE AND DATA PROCESSING FOR AUTOMATIC TARGET RECOGNITION II

13463 OH **Deep embedded multiview object clustering using aerial images in the wild** [13463-15]

13463 OI **Spatial and spectral combined graph diffusion evolution for extreme point detection**
[13463-21]

**INFRARED SYNTHETIC DATA FOR AUTOMATIC TARGET RECOGNITION: JOINT SESSION WITH
CONFERENCES 13459 AND 13463**

13463 OK **Synthetic data-seeded active learning for automated ATR data labeling
(Best Paper Award)** [13463-17]

**MACHINE LEARNING FOR INFRARED SENSING: JOINT SESSION WITH CONFERENCES 13463
AND 13469**

13463 OL **Comparing methods of UAV detection and tracking based on low-cost 3D LiDAR** [13463-6]

13463 OM **Real-time uniform identification in video rate snapshot hyperspectral imaging** [13463-16]
