SPIE

Volume 13464

Proceedings of SPIE 0277-786X, V. 13464

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Pattern Recognition and Prediction XXXVI*, edited by Mohammad S. Alam, Vijayan K. Asari, Proc. of SPIE 13464, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510687172

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NOVEL PATTERN RECOGNITION TECHNIQUES

- 13464 02 **Locate and extend: a geometric deep learning strategy for predicting polar ice layer structures using graph neural networks** [13464-2]
- 13464 03 **SPLAT: superpoint labeling by adjacency traversal** [13464-3]
- 13464 04 **Enhancing security measures: leveraging fuzzy logic integration for prohibited item detection in dual-energy x-ray security inspection** [13464-4]

MACHINE LEARNING BASED RECOGNITION

- 13464 07 **Utilizing V-JEPA for action recognition on the lunar surface: advancing human-robot collaboration** [13464-8]
- 13464 08 **Synthetic data augmentation with generative models for improved classification of mine tailings impoundments** [13464-10]

NOVEL IMAGING BASED RECOGNITION

- 13464 09 **Addressing data size challenges of hyperspectral imaging through event-based sensing (Invited Paper)** [13464-11]
- 13464 0A **A robust roof segmentation using noise-resilient convolutional neural network** [13464-13]
- 13464 0B **Secure data collection for keystroke dynamics** [13464-31]

GENERATIVE ALGORITHM BASED RECOGNITION

- 13464 0D **Image quality-based collaborative learning for diabetic retinopathy detection** [13464-16]
- 13464 0E **Efficient Arctic data generation using a separable convolutional diffusion model** [13464-17]
- 13464 0F **Triplet loss-based deep learning frameworks for off-angle iris recognition** [13464-18]

RECOGNITION AND DATA ANALYTICS

- 13464 OG **Generic object detection via image style transfer technique for x-ray baggage scanning devices** [13464-19]
- 13464 OH **A systematic framework for design of experiments in system design: establishing order and relevance in first-order analysis** [13464-20]
- 13464 OJ **Enhancing point cloud labeling: a scalable superpoint-based approach for efficient data annotation and analysis** [13464-22]
- 13464 OK **Data-driven approaches for gallery editing in face recognition** [13464-23]
- 13464 OL **Enhancing object detection in x-ray baggage screening using Kolmogorov-Arnold networks** [13464-24]

DEEP LEARNING

- 13464 ON **Ultralight VisionMamba UNet: a segmentation architecture for meltpond region localization** [13464-26]
- 13464 OQ **Leveraging Segment Anything Model 2 (SAM 2) to optimize segmentation for synthetic data quality in high-clutter baggage** [13464-213]

POSTER SESSION

- 13464 OR **On the sample complexity of pattern recognition and agnostic PAC learning** [13464-60]
- 13464 OS **Semantic information refinement network for more precise crowd counting** [13464-32]
- 13464 OT **Class-agnostic object counting network with cross-channel interaction and similarity-aware** [13464-33]
- 13464 OX **Scaling and adapting: a multifaceted approach to enhance crowd counting** [13464-40]

DIGITAL POSTER SESSION

- 13464 OY **Learning-based material preserving dual energy x-ray image super resolution** [13464-5]
- 13464 OZ **No-reference image quality measure for noisy x-ray images** [13464-9]
