**Volume 13470**

Proceedings of SPIE 0277-786X, V. 13470

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Thermosense: Thermal Infrared Applications XLVII*, edited by Giovanni Ferrarini, Peter Spaeth, Fernando López, Proc. of SPIE 13470, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510687295

ISBN: 9781510687301 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## ARTIFICIAL INTELLIGENCE AND NDE4.0 IN IRT I

---

- 13470 02 **Deep-learning-based crack detection and length determination for inductive thermography inspections on Inconel 718 and Haynes 282 TIG welded components** [13470-1]
- 13470 03 **Real-time thermographic monitoring for automated defect detection in welding** [13470-2]
- 13470 04 **Development of AI algorithms for quantifying defects with the step thermography** [13470-3]
- 13470 05 **Comparative evaluation of ResNet50 and MobileNet feature extractors for tomato leaf disease classification using MLP** [13470-4]

---

## MULTISPECTRAL, HYPERSPECTRAL, AND MULTI-IMAGING TECHNIQUES

---

- 13470 06 **Multiwavelength thermometry without a priori emissivity information: from promise to disillusionment (Keynote Paper)** [13470-101]
- 13470 07 **Multispectral fusion-based crack detection using automated laser thermography inspection** [13470-5]
- 13470 08 **Micro-thermoreflectometry applied to in situ monitoring of changes in the optical properties of a MCrAlY coating during high-temperature oxidation (Best Student Paper)** [13470-6]

---

## MANUFACTURING AND PROCESS MONITORING

---

- 13470 0A **Use of frequency-based methods for quantitative evaluation of resistance spot welds** [13470-8]
- 13470 0C **Background radiation measurement and subtraction for improved noncontact infrared temperature measurement** [13470-43]

---

## AEROSPACE AND DRONE APPLICATIONS

---

- 13470 0E **Influence of propeller downwash on drone-based active infrared thermographic inspection** [13470-12]

- 13470 OF **An instrumentation-based methodology to support estimation of aircraft wheel and brake assembly temperature and pressure** [13470-13]
- 13470 OH **Experiences from thermal drone imaging field campaign for developing automated tailing pond monitoring** [13470-15]
- 13470 OI **Empowering UAV EO systems through innovative low-SWaP high-performance IR optical designs** [13470-16]

---

#### NONDESTRUCTIVE TESTING AND EVALUATION I

---

- 13470 OJ **Reconstruction of spatial and time-series 4D imaging of leaked gas distribution using infrared images of multiple optical paths** [13470-17]
- 13470 OK **Damage evaluation with thermal methods of 3D printed notched composite materials** [13470-18]
- 13470 OL **In situ inspection of laser powder bed fusion Ti-6AL-4V additive manufacturing using an infrared sensor** [13470-19]
- 13470 OM **Hybrid image enhancement for thermographic imaging in canine bone cancer detection** [13470-20]

---

#### ARTIFICIAL INTELLIGENCE AND NDE4.0 IN IRT II

---

- 13470 ON **Comparative analysis of traditional thermographic image processing and deep learning models for canine bone cancer detection** [13470-21]
- 13470 OQ **Estimate composite bond line properties in composite structures using variational autoencoder inverse mapper** [13470-24]

---

#### BUILDINGS AND CULTURAL HERITAGE

---

- 13470 OS **IRT method for analyzing moisture diffusion and capillary rising damp in masonry materials** [13470-25]
- 13470 OT **A combined IR imaging and hygrometric approach for preliminary mass transfer evaluation in indirect evaporative cooling systems** [13470-11]

---

#### THERMAL PROPERTIES

---

- 13470 OU **Characterization of horizontal metallic inserts embedded in an insulating matrix using photothermal radiometry: a 1D approximation** [13470-28]
- 13470 OV **Differential imaging of thermal properties for composite materials based on laser-periodic-heating method using lock-in thermography** [13470-29]

- 13470 0W **Nondestructive thermographic evaluation of thermal diffusivity in additively manufactured fiber-reinforced composites using low-cost cooling: an early-stage analysis** [13470-31]

---

#### NONDESTRUCTIVE TESTING AND EVALUATION II

---

- 13470 0Y **Automated thermographic inspection of radioactive waste drums** [13470-38]
- 13470 0Z **Novel structural health monitoring strategies and procedures based on thermal methods for the damage characterization of 3D printed composite materials** [13470-33]
- 13470 10 **Automated damage detection of aeronautical composite materials by multimodal inspection techniques** [13470-34]
- 13470 11 **A first step towards automating nondestructive thermal diffusivity measurement by pulsed laser spot thermography: a numerical approach** [13470-35]
- 13470 12 **Multiscale inspection flying spot thermography for enhanced detection of fatigue cracks in aeronautical components** [13470-37]
- 13470 13 **Single-sided estimates of surface breaking porosity in additive manufacturing using multiple inspection techniques** [13470-36]

---

#### POSTER SESSION

---

- 13470 15 **In-line monitoring of the fused filament fabrication additive manufacturing process for short fibre-reinforced composites** [13470-40]
- 13470 16 **JS divergence Weibull embedding for very early breast cancer diagnosis** [13470-41]
