SPIE

Volume 13471

Proceedings of SPIE 0277-786X, V. 13471

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Radar Sensor Technology XXIX*, edited by Abigail S. Hedden, Gregory J. Mazzaro, Proc. of SPIE 13471, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ALGORITHMS AND PROCESSING TECHNIQUES

13471 02 **A comparison of nearest neighbor pixel deconvolution and spatial variant apodization for image enhancement in synthetic aperture radar imagery** [13471-1]

13471 03 **Data-driven ad hoc signal subspace imaging in unknown multipath environments** [13471-2]

13471 04 **3d chirogram: a voxel pursuit approach for frequency modulation signal analysis** [13471-3]

13471 05 **Multitarget OFDM ranging performance in cluttered environments with interference** [13471-23]

13471 06 **Investigating information elasticity in complex trajectory state estimation using particle filters** [13471-24]

PHENOMENOLOGY

13471 07 **Advanced synthetic aperture radar imaging with a 2D electronically steered metasurface antenna** [13471-8]

13471 08 **Electronic implementation of self-modulating chaotic oscillator and its potential for radar systems** [13471-10]

13471 09 **Enhancing snow accumulation prediction in radar sensors with neural operators** [13471-11]

APPLICATIONS AND EXPLOITATION TECHNIQUES

13471 0A **Distributed penetrating UWB radar for inspection of civilian infrastructure: design and analysis** [13471-5]

13471 0B **Passive radar-based target localization through self-mixing processing and binary search minimization** [13471-6]

QUANTUM REMOTE SENSING

13471 0C **Standoff material characterization and thermometry via returning temporal and amplitude statistics originating from entangled photon pairs** [13471-12]

RADAR MICRO-DOPPLER

13471 0D **Micro-Doppler models of drones, birds, and bird-like drones** [13471-15]

13471 0E **Extending radar micro-Doppler analysis to various types of gait abnormalities** [13471-16]

13471 0F **Discriminant analysis of radar micro-Doppler signatures for musculoskeletal injury risk assessment** [13471-17]

MILLIMETER-WAVE SENSING AND IMAGING

13471 0H **Addressing privacy and cost challenges in remote patient monitoring with streamlined 60GHz radar and edge processing** [13471-18]

13471 0I **Assessing permittivity dependence on inhomogeneities in materials (Best Student Paper Award - Second Place)** [13471-20]

13471 0J **Millimeter-wave stepped frequency radar for high-accuracy water level monitoring** [13471-21]

13471 0K **Impact of positioning errors in radar using distributed repeaters (Best Student Paper Award - First Place)** [13471-22]

SYNTHETIC DATA FOR RADAR APPLICATIONS: JOINT SESSION WITH CONFERENCES 13459 AND 13471

13471 0M **Automatic classification of radar and communication waveforms through interpretable deep learning** [13471-28]

POSTER SESSION

13471 0N **mmWave-SAR dataset: large high-resolution heatmap and point cloud dataset for static object detection and other machine learning applications** [13471-30]
