SPIE

Volume 13473

Proceedings of SPIE 0277-786X, V. 13473

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Artificial Intelligence and Machine Learning for Multi-Domain Operations Applications VII*, edited by Peter J. Schwartz, Myron E. Hohil, Proc. of SPIE 13473, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

LLM APPLICATIONS

13473 02 **Optimizing LLM decision-making and time-series analysis using DSPy** [13473-1]

13473 03 **AI-based replication of human moral judgements: moral proxies for multidomain operations** [13473-2]

13473 04 **Evaluation of different approaches for the function matching problem** [13473-3]

AI/ML APPLICATIONS I

13473 05 **A bibliometric review of machine learning applications in multidomain operations: a decade of progress** [13473-5]

13473 06 **A deep reinforcement learning approach with a parallel training scheme for Kinova manipulator** [13473-6]

13473 07 **Controller area network (CAN) data investigation for the application of battlefield energy awareness** [13473-7]

13473 08 **Resource-efficient, self-adaptive neurosymbolic artificial intelligence for the Internet of Battlefield Things** [13473-31]

HUMAN-AI TEAMING

13473 09 **Beyond human reasoning: bridging the human-machine information gap** [13473-8]

13473 0A **Revolutionizing OV-1 creation: human-machine teaming tools for closed environments** [13473-9]

13473 0B **Development of a cognitive assessment system for evaluating geospatial intelligence analysis** [13473-10]

13473 0C **Testbed for human-autonomy teaming (Testbed4HAT)** [13473-11]

REASONING UNDER UNCERTAINTY

13473 0E **Predicate credibility logic for artificial intelligence** [13473-13]

13473 0F **Detecting and evaluating deception with artificial intelligence assistants** [13473-15]

ADVERSARIAL REASONING

13473 0G **Multidomain evaluation network for threat assessment and tracking (MENTAT)** [13473-16]

13473 0H **Time-series spatial predictions of UAS using hybrid machine learning** [13473-17]

13473 0I **Applying graph neural networks for adversary system analysis** [13473-18]

13473 0J **AD-GAM: anomaly detection in IoT using generative AI models** [13473-52]

DEFENSIVE OPERATIONS

13473 0L **Scalable generative AI-induced disinformation in multilingual platforms** [13473-22]

MISSION PLANNING

13473 0N **AI-assisted flight plan generation and verification** [13473-26]

13473 0O **Integration of a new layer normalization process into federated reinforcement learning for environments with heterogeneous attribute spaces** [13473-27]

AI/ML APPLICATIONS II

13473 0P **Joint ML-based channel prediction and dynamic pairing in NOMA-UAV networks** [13473-39]

13473 0Q **Beam pattern optimization for conformal antennas using reinforcement learning and self-attention mechanism** [13473-40]

13473 0S **Shooter localization using shock waves and deep learning classification networks** [13473-42]

SYNTHETIC DATA GENERATION

13473 0T **Radio frequency signal generation using denoising diffusion implicit models** [13473-32]

COMPUTER VISION

13473 0V **Transform low-resolution, low-quality satellite images into high-resolution, high-quality satellite images** [13473-35]

13473 0X **Detecting electro-optical sensor anomalies in maritime satellite imagery using classification model latent space embeddings** [13473-37]

13473 0Y **Characterizing vision language model use towards zero-shot maritime satellite imagery classification** [13473-38]

POSTER SESSION

13473 10 **Neural operators for surrogate modeling in complex dynamic systems** [13473-43]
