

PROCEEDINGS OF SPIE

Autonomous Systems: Sensors, Processing, and Security for Ground, Air, Sea, and Space Vehicles and Infrastructure 2025

**Michael C. Dudzik
Stephen M. Jameson
Theresa J. Axenson**
Editors

**14–15 April 2025
Orlando, Florida, United States**

Sponsored and Published by
SPIE

Volume 13474

Proceedings of SPIE 0277-786X, V. 13474

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Autonomous Systems: Sensors, Processing, and Security for Ground, Air, Sea, and Space Vehicles and Infrastructure 2025*, edited by Michael C. Dudzik, Stephen M. Jameson, Theresa J. Axenson, Proc. of SPIE 13474, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SENSING, PROCESSING, AND SAFETY FOR UNMANNED GROUND VEHICLES I

- 13474 02 **Robust traffic light, road sign, and lane marking recognition including flashing red and yellow lights using deep learning techniques for intersection navigation** [13474-1]
- 13474 03 **New tendencies in LiDAR technology for autonomous vehicles and other applications** [13474-2]
- 13474 05 **CAVS semantic segmentation dataset for off-road autonomous vehicles** [13474-4]

SECURE OPERATION OF AUTONOMOUS SYSTEMS

- 13474 06 **V2I communication of autonomous vehicles with traffic light infrastructures of multiple intersections to optimize vehicle speed** [13474-6]
- 13474 07 **A virtual cyber-physical test range for evaluating the cybersecurity of autonomous systems** [13474-7]
- 13474 08 **Leveraging software-defined radio and adversarial learning to circumvent specific emitter identification-based security** [13474-9]

SENSING, PROCESSING, AND SAFETY FOR UNMANNED GROUND VEHICLES II

- 13474 09 **National advanced mobility consortium (NAMC): advancing defense technology through collaboration and innovation (Invited Paper)** [13474-200]
- 13474 0A **Using V2V to implement cooperative-adaptive cruise control and testing in MIL and HIL environment** [13474-5]

NOVEL ALGORITHMIC TECHNIQUES FOR CONTROL OF AUTONOMOUS SYSTEMS

- 13474 0B **Earthling logic for autonomous systems** [13474-11]

NOVEL SENSOR PROCESSING TECHNIQUES FOR AUTONOMOUS SYSTEMS

- 13474 0C **Proactive prevention of bad data propagation in autonomous systems** [13474-15]
- 13474 0D **Evaluation of 3D ROS-based simultaneous localization and mapping under noisy conditions for uncrewed surface vessels navigation** [13474-16]
- 13474 0E **Phased array acoustic sensing for sound localization using beamforming and principal component analysis** [13474-18]
- 13474 0F **Towards UAV navigation for stream data collection through tree canopies using dynamic motion primitives** [13474-19]
- 13474 0G **Pretraining AI models for autonomous detection of subsurface ferrous objects in magnetometry surveys** [13474-20]

POSTER SESSION

- 13474 0I **An adaptive Monte Carlo method for evaluating reliability with guaranteed accuracy and confidence** [13474-22]
