

PROCEEDINGS OF SPIE

Unmanned Systems Technology XXVII

**Paul L. Muench
Robert Diltz
Raja Suresh**
Editors

**15–16 April 2025
Orlando, Florida, United States**

Sponsored and Published by
SPIE

Volume 13477

Proceedings of SPIE 0277-786X, V. 13477

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Unmanned Systems Technology XXVII*, edited by Paul L. Muench, Robert Diltz, Raja Suresh, Proc. of SPIE 13477, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PHILOSOPHY AND ROBOTS

- 13477 02 **Improving robot legged locomotion through mechanics-aware design and control (Plenary Paper)** [13477-1]
- 13477 03 **Exploring trust and autonomy: how information affects human-agent teaming performance** [13477-2]
- 13477 04 **Contradictions of fuzzy logic to human intuition** [13477-3]
- 13477 05 **Predicting vegetation override forces for path planning in offroad terrain** [13477-4]

AIRFIELD ROBOTICS

- 13477 06 **Metric-semantic reasoning, tool calling, and NLP interfaces: using LLMs at the edge for human-robot teaming** [13477-6]
- 13477 07 **Open architecture experimentation telemetry system** [13477-8]

UP IN THE SKY, DOWN IN THE CULVERTS

- 13477 08 **Beyond visual line of sight drone simulator with user-defined risk layers** [13477-9]
- 13477 09 **Uncrewed system localization using deliberate thermal features** [13477-10]
- 13477 0A **Experimental studies of multirobot leader-follower tasks using contraction metric learning** [13477-11]
- 13477 0C **Flexible mission planning and dynamic reactive autonomy for heterogeneous unmanned vehicles operating in teams** [13477-13]

POSTER SESSION

- 13477 OD **Deviation of fuzzy logic from earthling logic** [13477-14]
- 13477 OE **Extending UAV flight duration in emergency situations: optimizing power splitting for wireless energy and data transfer** [13477-15]
- 13477 OF **Improved culvert inspection with the hydraulic inspection vehicle explorer 3.0** [13477-16]
