SPIE

Volume 13479

Proceedings of SPIE 0277-786X, V. 13479

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Signal Processing, Sensor/Information Fusion, and Target Recognition XXXIV*, edited by Ivan Kadar, Erik P. Blasch, Lynne L. Grewe, Proc. of SPIE 13479, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

MULTISENSOR FUSION, MULTITARGET TRACKING, AND RESOURCE MANAGEMENT I

13479 02 **Deep distributed Kalman filter: an adaptive deep learning framework for distributed Kalman filtering** [13479-1]

13479 03 **Derivation and adaptive enhancement of the sliding sigmoid filter** [13479-2]

13479 05 **Locating and tracking an object across multiple video feeds using zero-shot object detection** [13479-4]

13479 06 **System identification and state estimation for magnetorheological dampers** [13479-5]

13479 07 **Improved distance estimation in dynamic environments under sensor noise and missed detections through EKF-based multisensor fusion** [13479-6]

MULTISENSOR FUSION, MULTITARGET TRACKING, AND RESOURCE MANAGEMENT II

13479 08 **A model-based transformer approach for multitarget state estimation with a large number of sensors** [13479-7]

13479 09 **Bayesian deep learning with particle flow using the exponential family of probability densities** [13479-8]

INFORMATION FUSION METHODOLOGIES AND APPLICATIONS I

13479 0B **Vision-integrated EKF approach for accelerometer bias compensation in UAVs** [13479-10]

13479 0C **Deep learning-based flight path prediction for optical UAV tracking** [13479-12]

13479 0D **Sequential evidential decision making for real-time drone anomaly detection: a Sim2Real VBS approach** [13479-13]

INFORMATION FUSION METHODOLOGIES AND APPLICATIONS II

13479 0F **Edge-based computing challenges and opportunities for sensor fusion: panel review** [13479-16]

13479 0G **Information systems with a deep VAULT** [13479-17]

13479 0H **A novel formula to compute the hypotheses for a reliable sensor fusion system using dependency** [13479-19]

INFORMATION FUSION METHODOLOGIES AND APPLICATIONS III

13479 0I **Statemental credibility logic for intelligent information processing** [13479-20]

13479 0J **Leveraging hierarchical methods for multisensor fusion** [13479-21]

13479 0K **Cognitive warfare execution: harnessing strategic playbooks and influence frameworks** [13479-67]

SIGNAL AND IMAGE PROCESSING, AND INFORMATION FUSION APPLICATIONS I

13479 0L **FashionBody and SmartFashion: innovative components for a fashion recommendation system** [13479-23]

13479 0M **Multi-output and single-output regression models for body fitness analysis in FitnessBody** [13479-24]

13479 0O **Enhancement of remote photoplethysmography (rPPG) performance in low-light environments through illumination map estimation** [13479-26]

13479 0P **Remote respiratory rate monitoring using an LWIR camera** [13479-27]

SIGNAL AND IMAGE PROCESSING, AND INFORMATION FUSION APPLICATIONS II

13479 0R **End-to-end underwater object recognition using multipolarization image fusion with single-photon LiDAR** [13479-29]

SIGNAL AND IMAGE PROCESSING, AND INFORMATION FUSION APPLICATIONS III

13479 0T **Assessing image quality as a driver of object detection performance using a pseudophysical parametric image chain** [13479-33]

13479 0U **Deep learning for MPC extraction and false detection** [13479-34]

13479 0V **Fusion of eddy current testing data and scanning acoustic microscopy data for microtexture region characterization** [13479-36]

SIGNAL AND IMAGE PROCESSING, AND INFORMATION FUSION APPLICATIONS IV

13479 0W **Rank reduction of LSTM models for online vibration signal compensation on edge computing devices** [13479-37]

13479 0X **Radar target recognition based on extracted scattering features** [13479-39]

13479 0Y **Diverse MIMO radar waveform design for high-resolution image formation incorporating machine learning** [13479-40]

13479 10 **Connecting disparate modeling and simulation studies through design of experiments, surrogate modeling, and Bayesian networks** [13479-42]

POSTER SESSION

13479 12 **IR absorption spectra for explosives using density functional theory** [13479-44]

13479 14 **A comparison of physical models with Kalman filtering to deep learning models for complex system state estimation and prediction** [13479-47]

13479 15 **Experimental setup and compensation method to improve the accuracy of TES-based direct emissivity estimation using LWIR hyperspectral cameras** [13479-48]

13479 16 **Enhancing drone surveillance using pattern notches: experimental direction finding results** [13479-50]

13479 19 **Robust interbattery factor analysis by uniform sample contributions** [13479-54]

13479 1A **Maximum likelihood identification of an inertial sensor error model combining GM1, WP, and WN** [13479-55]

DIGITAL POSTER SESSION

13479 1C **An evaluation of Chernoff fusion with Fibonacci points** [13479-22]
