

PROCEEDINGS OF SPIE

High-power, High-energy Lasers, and Ultrafast Optical Technologies II

**Pavel Bakule
Patrick Baer
Joachim Hein
Thomas J. Butcher**
Editors

**8–10 April 2025
Prague, Czech Republic**

Sponsored by
SPIE

Cosponsored by
ELI Beamlines, ELI-ERIC (Czech Republic)
Inprentus, Inc. (United States)
CeramOptec® (Latvia)

Cooperating Organisations
HiLASE (Czech Republic)
AWE (United Kingdom)
Czech and Slovak Optical Society (Czech Republic)

Volume 13532

Proceedings of SPIE 0277-786X, V. 13532

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-power, High-energy Lasers, and Ultrafast Optical Technologies II*, edited by Pavel Bakule, Patrick Baer, Joachim Hein, Thomas J. Butcher, Proc. of SPIE 13532, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OPA/OPCPA

13532 03 **Ultra-high-contrast parametric frontends for 1 μ m high energy lasers** [13532-7]

PULSE COMPRESSION TECHNIQUES

13532 04 **Towards direct nonlinear compression of long-pulse lasers to the femtosecond regime (Invited Paper)** [13532-10]

13532 05 **Post-compression of multiterawatt long-wave infrared pulses** [13532-13]

13532 06 **Compression of a repetition-rate tunable electro-optic laser in the multiGHz regime** [13532-14]

HIGH ENERGY PW SYSTEMS

13532 07 **Laser system design and critical technologies for the NSF OPAL project (Invited Paper)** [13532-19]

ADVANCED TECHNOLOGIES FOR HIGH-POWER LASERS

13532 08 **High-power and high-reliability 808nm VCSEL to replace laser bar and flash lamp for Nd:YAG laser pumping** [13532-24]

13532 09 **AI-enhanced environmental control and energy sustainability in multipetawatt laser facilities** [13532-25]

13532 0A **Comparison and optimization of continuous passively mode-locked Nd, Y:SrF₂ and Nd, Gd:SrF₂ lasers for sub-picosecond pulse generation** [13532-26]

ADVANCES IN HIGH-REPETITION RATE LASER TECHNOLOGY

- 13532 0B **Bonding of single crystal Yb:YAG for aperture scaling of high energy, high-pulse repetition rate lasers (Invited Paper)** [13532-33]
- 13532 0C **Temporal pulse shaped fiber front end for high energy, high-repetition rate nanosecond OPCPA pump laser** [13532-35]

POSTER SESSION

- 13532 0D **Automated optimization of laser pulse temporal shape** [13532-11]
- 13532 0E **Generation of pulsed structured beams with laser seeding techniques** [13532-39]
- 13532 0F **Tm:YAG laser generating Q-switched pulses in the atmospheric window around the wavelength of 2036nm** [13532-41]
- 13532 0G **Compact 19kW/8ns pulse Nd:YAG/V:YAG laser source at 1.32 μ m** [13532-42]
- 13532 0H **High-peak-power, eye-safe, nanosecond diode-pumped Q-switched lasers** [13532-43]
- 13532 0I **Output peak-power optimization of Nd:YAG/Cr:YAG microchip laser** [13532-44]
- 13532 0J **Measurement of fluorescence lifetime in thulium-doped laser active media: minimizing reabsorption effects with the confocal method (Best Student Paper Award)** [13532-45]
- 13532 0K **VIS, UV, and DUV wavelength extension of Yb:YAG diode-pumped thin-disk laser** [13532-46]
