

PROCEEDINGS OF SPIE

International Conference on Computer Graphics, Artificial Intelligence, and Data Processing (ICCAID 2024)

**Xin Xu
Azlan bin Mohd Zain**
Editors

**13–15 December 2024
Nanchang, China**

Organized by
Visual Artificial Intelligence Lab (China)
Wuhan University of Science and Technology (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13560

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13560

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Computer Graphics, Artificial Intelligence, and Data Processing (ICCAID 2024)*, edited by Xin Xu, Azlan bin Mohd Zain, Proc. of SPIE 13560, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*

Part One

INTELLIGENT IMAGE AND DATA PROCESSING TECHNOLOGY

- 13560 02 **A matching-score-based template reconstruction attack** [13560-132]
- 13560 03 **Feature enhancement module for HD fusion map** [13560-13]
- 13560 04 **A 3D point cloud instance segmentation method for strawberry based on SGC** [13560-92]
- 13560 05 **SDA-YOLOv8s: an improved YOLOv8s for object detection based on UAV aerial images**
[13560-31]
- 13560 06 **Research on remote sensing image object detection system for river and lake Four Chaos
based on virtual electronic fence** [13560-36]
- 13560 07 **Research on high-dimensional biological data classification model based on self-trained
semi-supervised support vector machine** [13560-96]
- 13560 08 **Spatiotemporal characteristics and carbon emission estimation of comprehensive logistics
activities in container ports based on AIS data** [13560-121]
- 13560 09 **Radiation field rendering for traffic accident scene reconstruction** [13560-164]
- 13560 0A **An improved YOLOv8n-based small target detection algorithm for drone images** [13560-5]
- 13560 0B **A multifeature fusion approach for electroencephalogram personality analysis** [13560-43]
- 13560 0C **Fast image dehazing algorithm based on multiscale module with multilevel receptive field**
[13560-25]
- 13560 0D **A real-time image dehazing method based on image restoration and enhancement
techniques** [13560-133]
- 13560 0E **Research on multitarget tracking method based on LiDAR and camera information**
[13560-93]
- 13560 0F **Voronoi subdivision reconstruction of point clouds under optimal transport** [13560-171]
- 13560 0G **Feature extraction method with efficient edge information enhancement for detecting
dangerous objects in security x-ray images** [13560-50]

- 13560 OH **Topological relationship patterns for inductive link prediction in knowledge graphs**
[13560-85]
- 13560 OI **Investigation of electroencephalogram-based emotion recognition and channel importance analysis for dual-induction patterns** [13560-47]
- 13560 OJ **High-precision oracle image detection network** [13560-117]
- 13560 OK **A method for generating datasets of skimming floating garbage trajectories based on segmentation** [13560-157]
- 13560 OL **Research on weld defect detection method based on 2D and 3D** [13560-94]
- 13560 OM **Diffusion model for generating corresponding game scenes based on conditional labels**
[13560-86]
- 13560 ON **Enhancing small sample vehicle type classification accuracy through background-free data augmentation** [13560-130]
- 13560 OO **A study on the redesign of lantern patterns based on expandable semantics and shape grammar** [13560-52]
- 13560 OP **A multiview scene modeling method for indoor landscape considering adjacent region fusion** [13560-120]
- 13560 OQ **A cascade framework with weighted total variation model for OCT image denoising and attenuation compensation** [13560-107]
- 13560 OR **Canny filter embedding-based attention network for landslides from remote sensing images** [13560-68]
- 13560 OS **Temporal knowledge graph reasoning enhanced by temporal-aware relational graph attention and adaptive information control** [13560-8]
- 13560 OT **A scene classification supported coastline extraction method on high-resolution remote sensing image** [13560-172]
- 13560 OU **Cherry tree segmentation in UAV remote sensing images based on improved DeepLabV3+ model** [13560-79]
- 13560 OV **Electroencephalogram-based dynamic continuous emotion recognition method**
[13560-101]
- 13560 OW **Graph collaborative filtering recommendation method based on representation disentanglement** [13560-40]
- 13560 OX **Research on instance segmentation of agricultural greenhouses in remote sensing images with a modified Mask_RCNN algorithm** [13560-39]

- 13560 0Y **Research on automatic generation algorithm for logo images** [13560-134]
- 13560 0Z **3D human mesh recovery with learned gradient** [13560-78]
- 13560 10 **Knowledge graph-based model for mining associative relationships in patent data**
[13560-160]

EXPLORATION ON INTELLIGENT RECOGNITION TECHNOLOGY AND APPLICATION

- 13560 11 **A multiregion face expression recognition method based on transformer** [13560-116]
- 13560 12 **PINER: a few-shot named entity recognition method based on prompt learning and information fusion** [13560-10]
- 13560 13 **Research on aspect-based sentiment analysis of homestay online comments based on BERT-BiLSTM-multi-head attention** [13560-122]
- 13560 14 **Autonomous and controllable status assessment of aerospace components using a PCA-CNN approach** [13560-140]
- 13560 15 **Forest fire segmentation on U-net using data augmentation and attention mechanisms**
[13560-20]
- 13560 16 **The application of Chinese herbal medicine recognition with integrated attention mechanism** [13560-135]
- 13560 17 **Action recognition for Tai Chi with STGCN-MambaFormer** [13560-12]
- 13560 18 **Drawing annotation detection and recognition based on spatial transformer network**
[13560-89]
- 13560 19 **Near infrared face recognition based on YOLOv8 improvement** [13560-105]
- 13560 1A **Applying quantum genetic algorithm to optimize triple-glazed window thickness to minimize UV incidence** [13560-143]
- 13560 1B **Recognition method of students' abnormal behaviors in class based on Inception V3**
[13560-125]
- 13560 1C **Multisource heterogeneous data clustering method based on similarity relationships**
[13560-44]
- 13560 1D **A point cloud semantic segmentation method based on fused multi-scale context**
[13560-63]
- 13560 1E **Landslide detection and identification based on YOLOv11 network model** [13560-141]

- 13560 1F **A healthy corn seedling identification method based on improved YOLOv5s** [13560-145]
- 13560 1G **Research on rule extraction methods based on picture2 tuple linguistic sets** [13560-156]
- 13560 1H **Lithology identification of glutenite reservoir based on whale optimized radial basis function (WOA-RBF) neural network** [13560-72]
- 13560 1I **Lightweight fine-grained apple leaf disease identification network based on attention mechanism** [13560-6]
- 13560 1J **MSFormer: material segmentation in collapsed building scenes for unmanned rescue** [13560-37]
- 13560 1K **Lightweight human action recognition system based on LSTM and deformable convolution** [13560-4]
- 13560 1L **Research on road traffic sign recognition method based on HOG features and SVM** [13560-113]
- 13560 1M **Named entity recognition for archives based on radial basis function network** [13560-161]
- 13560 1N **Based on BERT-WWM's microblog sentiment analysis** [13560-97]
- 13560 1O **Tooth semantic segmentation method based on DPC algorithm** [13560-54]
- 13560 1P **Optimizing YOLOv8-IC network for industrial scene recognition under camera surveillance** [13560-30]
- 13560 1Q **Visible-infrared vehicle re-identification via cross-modality attributes learning** [13560-119]
- 13560 1R **A facial expression recognition method based on the combination of LBP operator and layer normalized ResNet model** [13560-16]
- 13560 1S **UMAP-based estimation of fuel consumption intervals for a small sample of aeroplanes** [13560-151]
- 13560 1T **An improved YOLOv8n for tunnel lining disease ground-penetrating radar detection identification** [13560-176]
- 13560 1U **Open-set algorithm for defect recognition of welded ceramic backing based on probability transformation** [13560-148]
- 13560 1V **Detection and recognition of aircraft tire characters based on 3D vision** [13560-95]
- 13560 1W **Multi-source heterogeneous logs-based correlation analysis for device trustworthiness evaluation** [13560-173]
- 13560 1X **G² continuity interpolation method based on triangular domains** [13560-23]

- 13560 1Y **A study of Gestalt psychology's application of visual language in human-computer interaction** [13560-159]

INTELLIGENT DETECTION AND PREDICTION TECHNOLOGY RESEARCH

- 13560 1Z **PCB defect detection method based on improved YOLOv8s** [13560-41]
- 13560 20 **Camouflaged object detection network based on edge information enhancement** [13560-154]

Part Two

- 13560 21 **YOLOv11 for SAR ship detection: advancements, performance, and applications in sea or inland waterway transportation** [13560-100]
- 13560 22 **A methodology for detecting damage in wind turbine blades** [13560-129]
- 13560 23 **Rolling bearing fault diagnosis model based on CWT algorithm and CBAM-CNN** [13560-152]
- 13560 24 **Prediction of suspension gap in high-speed maglev trains based on SOFTSQR** [13560-168]
- 13560 25 **In-depth analysis of road detection for autonomous driving based on machine vision** [13560-166]
- 13560 26 **Intelligent measurement switch full performance testing pipeline operation and maintenance based on digital twin technology** [13560-80]
- 13560 27 **Research on prediction method of precalciner outlet temperature based on CNN-Transformer** [13560-7]
- 13560 28 **Abnormal traffic detection method for customer service cloud service data center based on improved Transformer** [13560-127]
- 13560 29 **Long sequence prediction method for photovoltaic power generation based on CNN-LSTM-KAN modeling** [13560-73]
- 13560 2A **Forecasting China's oil demand based on combined GA-BP neural network model** [13560-58]
- 13560 2B **X-ray detection method of industrial pressure vessel weld defects based on convolutional neural network** [13560-110]
- 13560 2C **Concept drift data stream regression model based on adaptive drift detection and incremental broad learning** [13560-128]
- 13560 2D **Fall detection system based on LSTM-Transformer and FMCW radar** [13560-2]

- 13560 2E **Lightweight passion fruit timing detection based on optimized YOLOv8 model** [13560-28]
- 13560 2F **YOLOv3-EKSC: an improved algorithm model for efficient detection of floating objects in complex near-shore waters** [13560-22]
- 13560 2G **Remaining useful life prediction of rolling bearings based on cross attention mechanism and BiTCN, BiGRU** [13560-49]
- 13560 2H **Short term load forecasting model based on CNN-LSTM-attention in the electricity market** [13560-112]
- 13560 2I **Carbon emission prediction and analysis of influencing factors based on the LSTM model** [13560-53]
- 13560 2J **Nut detection of robotic arm vision system based on FNCS-YOLOv5s** [13560-26]
- 13560 2K **Analysis of improved YOLOv8x based on ODConv in tumor target detection of breast MRI** [13560-118]
- 13560 2L **Underwater object detection algorithm based on YOLOv8 and Swin Transformer** [13560-48]
- 13560 2M **Spherical-ViTAE-based scanpath prediction for virtual reality** [13560-83]
- 13560 2N **Advancing the diagnostic technique for detecting pipeline defects using YOLOv8: a deep learning-based approach** [13560-35]
- 13560 2O **Integrating ERNIE 3.0 and biterm topic model for rumor detection on Weibo** [13560-81]
- 13560 2P **Research on automatic detection technology for missile warhead-body separation events based on infrared imaging** [13560-87]
- 13560 2Q **Scene text detection based on progressive multiscale feature fusion and contextual information enhancement** [13560-21]
- 13560 2R **An improved method for small object detection in aerial images based on YOLOv8** [13560-34]
- 13560 2S **Real-time safety helmet detection on construction sites using YOLOv5 lite** [13560-153]
- 13560 2T **YOLO-FS: a unified framework for object detection and semantic segmentation** [13560-98]
- 13560 2U **Research on carbon emission forecasting in the construction industry based on LMDI-NGO-BP neural networks** [13560-14]
- 13560 2V **Design and implementation of handlebar defect detection method based on machine recognition** [13560-51]

- 13560 2W **Vehicle detection and early warning research based on improved YOLOv8 networks** [13560-19]
- 13560 2X **Enhancing real-time object detection for UAVs using optimized YOLOv8 architecture** [13560-123]
- 13560 2Y **Infrared dim small target detection based on spatial attention** [13560-56]
- 13560 2Z **Citrus leaf disease detection based on improved YOLO11 with C3K2** [13560-106]
- 13560 30 **Experimental demonstration of a Res2Net-50-based intelligent detection algorithm for mega-thermal metallic component adhesive defect** [13560-147]
- 13560 31 **Research and application of oil pipeline leakage monitoring technology** [13560-82]

ARTIFICIAL INTELLIGENCE AND DEEP LEARNING APPLICATIONS

- 13560 32 **Multisource collaborative control strategy and dynamic response characteristics analysis in smart microgrid** [13560-27]
- 13560 33 **Research on the perception fusion model of autonomous driving for urban traffic** [13560-32]
- 13560 34 **Cardinality estimator based on attention mechanism and tree structure LSTM** [13560-11]
- 13560 35 **A research on web crawler algorithm based on deep learning** [13560-109]
- 13560 36 **Evaluation of the effectiveness in refuting health rumors by short video platform accounts: a study based on TODIMSort and machine learning clustering approaches** [13560-77]
- 13560 37 **FedSigmoid: a sigmoid-based dynamic federated learning algorithm** [13560-57]
- 13560 38 **Design of decision evaluation model for the infrastructure management system based on particle swarm optimization algorithm** [13560-88]
- 13560 39 **Security risk scanning of comprehensive energy multi-source database based on BWOA-SVM algorithm** [13560-90]
- 13560 3A **Camouflage segmentation algorithm based on improved multiscale triplet networks** [13560-144]
- 13560 3B **Optimization of deep learning algorithms in image recognition** [13560-91]
- 13560 3C **Software design of micron indentation system based on LabVIEW** [13560-99]
- 13560 3D **Research and application of a communication construction engineering subcontracting platform based on AI and big data** [13560-60]

- 13560 3E **Research on optimization of data mining algorithm based on OpenMP** [13560-24]
- 13560 3F **Research and application of intelligent management system for non-site law enforcement and non-stop detection based on the AI technology** [13560-167]
- 13560 3G **Research and application of real-time management and control platform for dam material transport vehicles based on YOLOv8 and RTK** [13560-71]
- 13560 3H **River and lake building extraction algorithm based on improved residual attention mechanism and double convolutional kernel update heads** [13560-42]
- 13560 3I **Application of region growing algorithm in segmentation of sublingual veins based on Halcon** [13560-75]
- 13560 3J **Large-scale alarm root analysis in bank information infrastructure environment** [13560-3]
- 13560 3K **Application analysis of power dispatch automation based on artificial intelligence technology** [13560-69]
- 13560 3L **Research on the digital innovation design of Chinese cloud-patterned eave tiles** [13560-15]
- 13560 3M **An incremental learning-based approach for faulty text classification** [13560-38]
- 13560 3N **An attention-based proximal policy optimization algorithm for imitation reinforcement learning** [13560-55]
- 13560 3O **Emotional management plays a bridge between human-computer interaction and employee value co-creation behavior** [13560-76]
- 13560 3P **Research and development of the Ziyun culture IP digital information display platform based on virtual reality technology** [13560-61]
- 13560 3Q **Research on key technologies of cloud-edge collaboration in the power IoT based on computing power perception** [13560-165]
- 13560 3R **Research on monitoring and early warning of power dispatching platform based on artificial intelligence** [13560-84]
- 13560 3S **Research and application of digital production platform for cable industry based on YOLOv5 and IoT technology** [13560-65]
- 13560 3T **Research on path tracking algorithms for intelligent vehicles in complex dynamic environments** [13560-169]
- 13560 3U **Enhancement of air combat through hierarchical reinforcement learning** [13560-108]
- 13560 3V **Collection of electric carbon energy consumption data in industrial parks based on time series and federated learning algorithms** [13560-124]

- 13560 3W **Design and implementation of a virtual experimentation system for scientific literacy of vocational students based on computer vision and deep learning** [13560-178]
- 13560 3X **Design of intelligent electricity meter system based on Internet of Things** [13560-175]
- 13560 3Y **An accelerated improvement of neural network pruning based on multilayer pruning algorithm** [13560-142]
- 13560 3Z **Research on interactive ceramic sculpture based on virtual reality technology** [13560-131]
- 13560 40 **Digital inheritance and innovation of non-heritage in the perspective of interactive virtual reality technology** [13560-137]
