

PROCEEDINGS OF SPIE

International Conference on Energy Technology and Electrical Power (ETEP 2024)

**Jiashen Teh
Gen Li**
Editors

**20–22 December 2024
Guangzhou, China**

Organized by
Hanjiang Normal University (China)
University Sains Malaysia (Malaysia)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

SPIE

Volume 13566

Proceedings of SPIE 0277-786X, V. 13566

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Energy Technology and Electrical Power (ETEP 2024)*, edited by Jiashen Teh, Gen Li, Proc. of SPIE 13566, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

ELECTRICAL SYSTEM AND PERFORMANCE OPTIMISATION RESEARCH

- 13566 02 **Experimental investigation of the effects of cylinder-to-cylinder variations on the performance of a gasoline spark ignition engine using a multisensor information fusion technique** [13566-19]
- 13566 03 **Optimizing the switching method of open rack vaporizer in a natural liquefied gas station** [13566-10]
- 13566 04 **Influence of pole-slot combinations and winding form on electromagnetic characteristics of torque motors** [13566-70]
- 13566 05 **A hybrid repetitive control strategy of grid-connected five-level inverter under LVRT operation** [13566-27]
- 13566 06 **Example analysis and preventive proposal of 110kV transformer short circuit fault** [13566-72]
- 13566 07 **Effects of carrier material on regeneration behavior of wall-flow catalyzed diesel particulate filters** [13566-37]
- 13566 08 **Research on the design of a full performance testing pipeline for Bluetooth circuit breakers based on digital twin technology** [13566-62]
- 13566 09 **Identification of GIS equipment isolation switch on/off status based on ILPSO-LSSVM** [13566-39]
- 13566 0A **Design and performance validation of aircraft turbine silencer products based on JCA (Johnson-Champoux-Allard) parameters** [13566-75]
- 13566 0B **Fault current limiter and control strategy based on hybrid distribution transformer in DC microgrid** [13566-22]
- 13566 0C **Effect of pre-injection on the performance of methanol-ammonia dual-fuel engines** [13566-14]
- 13566 0D **A data-driven digital design method for electrical transmission and substation engineering** [13566-47]
- 13566 0E **Test and application research of airborne insulator zero-value live detection device** [13566-74]
- 13566 0F **Research on multisource image fusion of power equipment based on LatLRR and multiple filtering** [13566-54]

- 13566 OG **Design and realisation of a new multifunctional low-cost experimental microgrid** [13566-87]
- 13566 OH **A design of an improved RCD clamping circuit** [13566-46]
- 13566 OI **Research on data traceability method for the whole process of power equipment** [13566-66]
- 13566 OJ **Research on online monitoring system of transformer oil storage tank based on ultrasonic technology** [13566-59]
- 13566 OK **Research on transformer residual life evaluation model technology** [13566-56]
- 13566 OL **Thermal management of high-power electronics using swirl jet liquid cooling devices** [13566-35]
- 13566 OM **Stress analysis and design of a large propylene spherical tank based on ASME VIII-2** [13566-25]
- 13566 ON **Research on stator insulation diagnosis method based on leakage current of high-voltage motor** [13566-2]
- 13566 OO **MMC submodule topology for integrated photovoltaic and energy storage converters and its improved control strategy based on double k -value ordering** [13566-84]

INTELLIGENT ANALYSIS OF ENERGY AND POWER SYSTEMS

- 13566 OP **Source network load energy storage flow carbon flow analysis method based on multidomain characteristics and CNN** [13566-58]
- 13566 OQ **Research on grounding fault location methods for DC systems in substations** [13566-38]
- 13566 OR **Numerical simulation study of the combustion characteristics on secondary air mixed with ventilation air methane** [13566-7]
- 13566 OS **Empirical study on health status assessment of outdoor energy storage power stations** [13566-29]
- 13566 OT **Research on transmission line risk warning system in mining subsidence area based on deep learning** [13566-67]
- 13566 OU **Advancements in flexible anode materials for lithium-ion batteries** [13566-32]
- 13566 OV **Action analysis of SVG system in photovoltaic power plants after power grid line faults and trips caused by natural disasters** [13566-15]
- 13566 OW **Deep-learning-based prediction model for indoor temperature parameters and energy consumption of radiant cooling system** [13566-20]

- 13566 0X **Temperature rise verification of electric vehicle AC charging pile with solar irradiation effects** [13566-33]
- 13566 0Y **The coordinated operation control strategy of the integrated energy system in industrial park considering PV economic consumption** [13566-89]
- 13566 0Z **Study on analysis of water content in organic heat transfer fluid** [13566-73]
- 13566 10 **Research on reactive power configuration of offshore wind power transmission system through power frequency AC transmission** [13566-92]
- 13566 11 **Impedance modeling method for wind farms integrated systems considering the impact of output power and connection impedance** [13566-16]
- 13566 12 **Multiscale optimization scheduling method for comprehensive energy based on dual carbon targets and GSA algorithm** [13566-60]
- 13566 13 **Optimal configuration of energy storage for distribution networks with high penetration of distributed energy resources based on an improved particle swarm optimization algorithm** [13566-82]
- 13566 14 **Stress measurement of deformed pipeline in oil and gas station based on numerical analysis method** [13566-5]
- 13566 15 **Application of new noise reduction materials in natural gas residual pressure power generation** [13566-48]
- 13566 16 **Optimization analysis of multienergy cloud storage integrated with energy conversion systems** [13566-30]
- 13566 17 **Capacity allocation optimization for integrated energy system with P2G and CCS** [13566-6]
- 13566 18 **Study on the influence of wind and sand erosion on the audible noise of corona discharge in the uniformity ring of transformer bushings in 750kV substations** [13566-8]
- 13566 19 **Simulation analysis of the effect of aperture size on the heat release characteristics of phase change energy storage systems** [13566-34]
- 13566 1A **Digital management of carbon emissions in complex power systems based on big data** [13566-31]
- 13566 1B **Historical data-driven approach for energy storage system state of charge estimation** [13566-83]
- 13566 1C **Gain analysis of the configuration of energy storage for basin hydro-wind-photovoltaic integrated energy base** [13566-42]
- 13566 1D **Cost analysis of renewable hydrogen transmission by high-voltage electric lines and pipelines** [13566-11]

- 13566 1E **Photovoltaic power prediction based on secondary modal decomposition, kernel principal component analysis, and bidirectional long short-term memory neural network** [13566-28]
- 13566 1F **Ultra-short-term power prediction method of photovoltaic power stations based on ConvLSTM and multimodule fusion algorithm** [13566-23]

INTELLIGENT OPTIMISATION AND SYNERGISTIC DEVELOPMENT IN GRID TECHNOLOGY

- 13566 1G **Analysis of price correlation and trend projection based on multidimensional data modelling** [13566-65]
- 13566 1H **Pattern recognition of potential stealing behavior based on outlier data mining algorithm** [13566-57]
- 13566 1I **MIDC system voltage support capability evaluation index with renewable energy sources** [13566-9]
- 13566 1J **Multitimescale optimization of distributed generation high-penetration distribution network loss reduction under environmental protection concept** [13566-55]
- 13566 1K **Research on fault arc detection method based on multimodal fusion strategy** [13566-43]
- 13566 1L **Fault line selection method based on steady-state zero-sequence voltage** [13566-64]
- 13566 1M **Detection method for group fixed-proportion electricity theft behaviors** [13566-63]
- 13566 1N **A new identification method of critical lines for cascading failures** [13566-61]
- 13566 1O **Accounting for and optimizing efficient consumption of large-scale new energy sources on the grid with multitimescale uncertainties** [13566-53]
- 13566 1P **Effect of contact angle of HVDC conductors on the dynamic characteristics of water droplets** [13566-4]
- 13566 1Q **Multiobjective optimization decision-making on electricity procurement for grid companies considering imbalanced funds under a dual-track system** [13566-21]
- 13566 1R **Coyote optimization algorithm based on mutation opposition-based learning in terminal optimization** [13566-41]
- 13566 1S **Research on grid-load cooperative optimization model supporting new power system** [13566-88]
- 13566 1T **Research on abnormal data detection in distribution networks using a parallel network integrating GraphSAGE and CNN-GRU** [13566-45]
- 13566 1U **An iterative calculation algorithm for transmission line conductor ice cover based on laser point cloud arc dip observation** [13566-68]

- 13566 1V **A multiobjective optimal scheduling method of active power from source network load storage for smart distribution networks** [13566-51]
- 13566 1W **Privacy protection method for power customers based on federated learning model** [13566-77]
- 13566 1X **Harmonic analysis of three-phase fully controlled bridge rectifier circuit based on MATLAB** [13566-26]
- 13566 1Y **Privacy-preserving computation model for power trading based on homomorphic commitment and encryption** [13566-80]
- 13566 1Z **Short and medium term power load forecasting based on bidirectional long-short-term memory network models** [13566-36]
- 13566 20 **Calculation of grid forming energy storage configuration for island grids based on virtual inertia sufficiency probability** [13566-12]
- 13566 21 **Reliable transmission technology of massive heterogeneous information in complex environment of public buildings** [13566-79]
- 13566 22 **The wideband residual current sensitivity detection and protection based on DC charging pile application** [13566-81]
- 13566 23 **Study on the influence of wind and sand erosion on the audible noise of corona discharge at the terminal ball of pipe-shaped busbars in 750kV substations** [13566-13]
- 13566 24 **VRGIS 3D simulation system for power grid soil and water conservation** [13566-71]
- 13566 25 **Research on cloud-side collaborative secure trusted access of power terminal based on open source Hongmeng** [13566-50]
