

PROCEEDINGS OF SPIE

International Conference on Artificial Intelligence and Machine Learning Research (CAIMLR 2024)

**Jun Liu
Ankush Ghosh
Chee Wei Tan
Haiquan Zhao**
Editors

**28–29 September 2024
Singapore**

Organized by
Nanyang Technological University (Singapore)
Southwest Jiaotong University (China)

Sponsored by
Nanyang Technological University (Singapore)

Volume 13635

Proceedings of SPIE 0277-786X, V. 13635

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Artificial Intelligence and Machine Learning Research (CAIMLR 2024)*, edited by Jun Liu, Ankush Ghosh, Chee Wei Tan, Haiquan Zhao, Proc. of SPIE 13635, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

**INTERNATIONAL CONFERENCE ON ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING
RESEARCH (CAIMLR 2024)**

13635 02	FIREfly project: forest fire monitoring and prediction using machine learning [13635-3]
13635 03	A fine-grained sentiment recognition method for online Government-Public interaction texts based on large language models [13635-29]
13635 04	Risk-averse multi-agent reinforcement learning with distributional mean-variance formulation [13635-18]
13635 05	From theory to practice: implementing and evaluating e-fold cross-validation [13635-21]
13635 06	Research on multi-screen eye tracking and manipulation intent recognition [13635-11]
13635 07	Enhancing user intent for recommendation systems via large language models [13635-30]
13635 08	Detection of hate speech using machine learning algorithms [13635-5]
13635 09	DMNet: time series forecasting based on dynamic attention and multi-branch structure [13635-10]
13635 0A	Research on the fusion application of LSTM and transformer in network traffic prediction [13635-6]
13635 0B	A remaining useful life prediction method based on DCS-optimized BiTCN-BiGRU [13635-15]
13635 0C	Long-term sequence prediction model: integrating trend decomposition and composite attention [13635-27]
13635 0D	Prediction of abnormal energy consumption in rail transit based on machine learning combinatorial algorithms [13635-17]
13635 0E	The application of large language models in recommendation systems [13635-31]
13635 0F	Quantifying expressive power of time-series neural networks [13635-12]
13635 0G	High-precision cotton pest detection algorithm based on improved YOLOv9c [13635-8]

- 13635 OH **An efficient lung disease classification from x-ray image using graph convolutional network and transformer** [13635-26]
- 13635 OI **Research on network intrusion detection based on deep learning** [13635-36]
- 13635 OJ **Industrial sheet image processing technology based on machine vision** [13635-4]
- 13635 OK **Remote sensing scene classification based on convolutional neural network model** [13635-14]
- 13635 OL **SAR image unsupervised segmentation using edge geometric complexity penalty** [13635-35]
- 13635 OM **Evaluation of Kolmogorov-Arnold-inspired networks for blind sharpness assessment of authentic images** [13635-34]
- 13635 ON **Full-field 3D deformation measurement of 4D-printed components based on multiview DIC system** [13635-33]
- 13635 OO **High-precision multimodal remote sensing image matching based on Log-Gabor filtering** [13635-32]
- 13635 OP **Deep-learning-based 3D reconstruction from single-shot structured-light image** [13635-37]
- 13635 OQ **Improved YOLOv5 algorithm in quadcopter UAV target detection** [13635-39]
- 13635 OR **A zero-trust security model applied in SDN intelligent network** [13635-22]
- 13635 OS **A novel privacy protection method for mHealth systems based on differential privacy federated learning** [13635-9]
- 13635 OT **Soybean genomic phenotype prediction method based on improving the transformer model with batch normalization and cosine annealing algorithm** [13635-23]
- 13635 OU **Genetic algorithms with elitism-immigration strategies for weapon-target assignment** [13635-28]
- 13635 OV **Ractopamine concentration in pork prediction network based on improved one-dimensional convolutional autoencoder** [13635-19]
- 13635 OW **Comparative analysis of preprocessing methods and machine learning models for geographical origin identification in an imbalanced *Panax notoginseng* dataset with near-infrared spectroscopy** [13635-16]
- 13635 OX **Machine-learning-based implementation for predicting thousand-grain weight in rapeseed using genetic data** [13635-7]
- 13635 OY **Research on machine learning in credit risk management: current developments and future trends** [13635-13]

- 13635 0Z **Research on personal credit scoring prediction based on machine learning methods**
[13635-24]
- 13635 10 **Application and optimization of virtual simulation teaching assisted by artificial intelligence
in ideological and political courses in universities** [13635-20]
