

PROCEEDINGS OF SPIE

# ***International Conference on Power Electronics Technology and Grid Systems (PETGS 2025)***

**Wei Lai**  
*Editor*

**28 February – 2 March 2025**  
**Guangzhou, China**

*Organized by*  
Wuhan University (China)  
Anhui Science and Technology University (China)

*Published by*  
SPIE

**Volume 13641**

Proceedings of SPIE 0277-786X, V. 13641

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Power Electronics Technology and Grid Systems (PETGS 2025)*, edited by Wei Lai, Proc. of SPIE 13641, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

---

## POWER ELECTRONICS AND ELECTRICAL APPLIANCES RESEARCH

---

13641 02	<b>Fault reconstruction and fault-tolerant control of resilient equilibrium zone based on random forest algorithm [13641-29]</b>
13641 03	<b>Improved DC-DC boost converter for renewable energy generation systems: featuring high voltage gain and low component stress [13641-3]</b>
13641 04	<b>SCAPS-1D simulation of RbGeI3-based solar cells with gradient doping and no hole transport layer [13641-4]</b>
13641 05	<b>A method for monitoring dielectric loss of sensor based on harmonic analysis is presented [13641-19]</b>
13641 06	<b>Design of magnetic components for wind power converter power supply [13641-9]</b>
13641 07	<b>A multisource domain adaptive method for CVT remaining useful life prediction [13641-18]</b>
13641 08	<b>Design and performance analysis of inverter systems based on state-space identification [13641-5]</b>
13641 09	<b>Effect of humidity on the electrochemical migration [13641-32]</b>
13641 0A	<b>Virtual power plant energy optimization scheduling method based on source load coordination [13641-8]</b>
13641 0B	<b>A hybrid control algorithm for neutral-point voltage balancing in three-level inverters with zero-sequence signal injection and virtual zero-level modulation [13641-28]</b>
13641 0C	<b>Research on low-carbon optimization strategy of virtual power plant based on demand response [13641-10]</b>
13641 0D	<b>Design of a transimpedance amplifier with high gain and low noise [13641-21]</b>
13641 0E	<b>Research on proton irradiation of SiC high-voltage power semiconductor devices [13641-23]</b>
13641 0F	<b>Performance evaluation of secondary power supply products under multi-degree-of-freedom vibration environments [13641-20]</b>

- 13641 OG **Performance evaluation study of secondary power products under different thermal environments** [13641-24]
- 13641 OH **A novel flux observer for linear induction motor based on super-twisting algorithm** [13641-27]
- 13641 OI **Research on capacitor charging power supply for electric pulse de-icing device** [13641-40]
- 13641 OJ **Double-sided cooling power modules integrating vapor chamber with excellent heat dissipation performance** [13641-42]
- 13641 OK **Correlation analysis of combined wind and solar power output** [13641-26]
- 13641 OL **Advances in nickel-based metal-organic framework (MOF) electrode materials for supercapacitors and their impact on energy management in computer and artificial intelligence systems** [13641-33]

---

#### POWER SYSTEMS AND SMART GRID MODELLING

---

- 13641 OM **Multivoltage level coordination low-carbon operation control strategy of urban flexible distribution system** [13641-49]
- 13641 ON **Research on the optimal ratio allocation method for hybrid systems of following/forming grid type** [13641-14]
- 13641 OO **Research on cloud-edge integration service architecture for edge computing** [13641-44]
- 13641 OP **Single-stage high-frequency isolated three-port converter based on interleaved totem-pole structure** [13641-55]
- 13641 OQ **Research of power supply and communication integrated system applied to train control** [13641-7]
- 13641 OR **Advanced tin-lead hybrid chalcogenide solar technology to empower smart grids: NG optimises PEDOT:PSS to boost battery performance** [13641-6]
- 13641 OS **Pilot optimization of low-voltage PLC systems based on simulated annealing algorithm** [13641-52]
- 13641 OT **Research on power grid planning based on complex adaptive system theory** [13641-13]
- 13641 OU **Impact of energy storage response delay on power system frequency response metrics** [13641-30]
- 13641 OV **Application of multidomain data fusion in equipment-level load forecasting of distribution networks** [13641-47]
- 13641 OW **Harmonic detection method based on parameter spectrum** [13641-12]

- 13641 0X **Research on trusted capacity of new energy with storage under spot market conditions**  
[13641-25]
- 13641 0Y **Research on technology to reduce high-frequency ripple of electron gun power supply**  
[13641-36]
- 13641 0Z **Extreme high-temperature impact on distribution network operation characteristics**  
[13641-37]
- 13641 10 **New energy technologies driven by the global energy transition development path construction** [13641-56]
- 13641 11 **A photovoltaic new energy station network attack quantity prediction model based on GA-BP** [13641-46]
- 13641 12 **Quantitative risk assessment of communication system of distributed photovoltaic power station** [13641-50]
- 13641 13 **CNN-based cyber-attack detection research for photovoltaic new energy stations**  
[13641-41]
- 13641 14 **A method for multipoint secure access of IED to distributed new energy information system**  
[13641-43]
- 13641 15 **Link topology generation and source tracing for network attacks in power systems**  
[13641-57]
- 13641 16 **Market abuse evaluation of generators with time-varying pricing** [13641-54]
