PROCEEDINGS OF SPIE

Fifth International Conference on Applied Mathematics, Modelling, and Intelligent Computing (CAMMIC 2025)

Peicheng Zhu
Guihua Lin
Editors

21–23 March 2025
Shanghai, China

Organized by
Shanghai University (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13644

Proceedings of SPIE 0277-786X, V. 13644

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Fifth International Conference on Applied Mathematics, Modelling, and Intelligent Computing (CAMMIC 2025)*, edited by Peicheng Zhu, Guihua Lin, Proc. of SPIE 13644, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

NUMERICAL METHODS AND MATHEMATICAL MODELING

13644 02 **A high-precision numerical scheme for nonlinear Burgers equation** [13644-81]

13644 03 **Classification of solutions with polynomial energy growth for the $SU(n+1)$ Toda system on the punctured complex plane** [13644-54]

13644 04 **Convergence theorem for solutions of a class of generalized variational inequalities** [13644-9]

13644 05 **Research on the stability of stochastic differential equations for G-Brownian motion** [13644-78]

13644 06 **The solvability of the number theory functional equation** [13644-86]

13644 07 **Complexity of the substituted graphs based on paths and cycles** [13644-91]

13644 08 **Adams prediction-correction algorithm for solving coupled fractional order differential equations** [13644-46]

13644 09 **Numerical range of some combinations of two orthogonal projections** [13644-19]

13644 0A **Solutions of higher-order equations** [13644-75]

13644 0B **Energy decay for a viscoelastic wave equation with space-time potential and logarithmic source terms in $\mathbb{R}^n$** [13644-71]

13644 0C **The four-linear spectral form for the Dirac operator with torsion** [13644-30]

13644 0D **Complete convergence of randomly weighted sums for m-WOD sequences under sub-linear expectation** [13644-20]

13644 0E **Forced oscillation of impulsive fractional partial differential equations** [13644-51]

13644 0F **Statistical characteristics of Rayleigh and log-normal distribution sea clutter polarization based on Stokes parameters** [13644-8]

13644 0G **The Lichnerowicz formula and spectral forms for perturbed Dirac operator** [13644-33]

13644 0H **Research on mathematical modeling for cylindrical workpieces in vision-guided cooperative manufacturing systems** [13644-76]

13644 0I **Exponential time differencing scheme for modified Cahn-Hilliard equation in arbitrary domains** [13644-25]

13644 0J **Research on the stability of fractional-order non-local reaction-diffusion equations utilizing attractor theory** [13644-23]

13644 0K **Obtain superposed periodic wave solutions for KP-like II equations using the Hirota bilinear method** [13644-80]

13644 0L **Symbolic calculation of combination series** [13644-12]

13644 0M **Legendre wavelets for approximate solutions of Fredholm integro-differential equations** [13644-62]

13644 0N **Wavelet regularization method and extrapolation for the approximate solution of Fredholm integral equations** [13644-58]

INTELLIGENT COMPUTING AND OPTIMIZATION ALGORITHMS

13644 0O **Model aggregation for multisource domain adaptation** [13644-41]

13644 0P **Characterization of fuzzy implication functions based on power of nullnorms with continuous underlying operators** [13644-74]

13644 0Q **An improved differential network analysis method based on fMRI matrix data** [13644-52]

13644 0R **Skyhook damping control method for displacement sensors based on virtual sensor fusion** [13644-72]

13644 0S **Hybrid CNN-transformer approach for remote sensing change detection with bi-temporal feature interaction** [13644-34]

13644 0T **Low-carbon route optimization in cold chain logistics driven by adaptive genetic algorithm** [13644-83]

13644 0U **Recognition and rehabilitation of hand function actions in stroke patients based on pose estimation** [13644-63]

13644 0V **An improved Banker's algorithm based on sorted resource buckets** [13644-47]

13644 0W **Fault diagnosis of wind turbine gearbox based on multiscale time-frequency feature fusion** [13644-27]

13644 0X **A multidomain optical network multipoint crosstalk attack propagation model based on virus propagation dynamics** [13644-40]

13644 0Y **Distributed air conditioning system design based on consensus algorithm and regulation capacity** [13644-55]

13644 0Z **Augmented SAM for medical image segmentation** [13644-26]

13644 10 **Community detection based on DeepwalkGAN** [13644-64]

13644 11 **Topology personalized-aware and enhanced graph attention network** [13644-6]

13644 12 **An improved interacting multiple model algorithm with sparrow search optimization for maneuvering target tracking** [13644-85]

13644 13 **Quantum color visual cryptography scheme** [13644-79]

13644 14 **Structural optimization of combined cavity acoustic coating based on hybrid optimization algorithm** [13644-45]

13644 15 **Detection of TC-type anomalies in time series based on a weighted MCD approach** [13644-21]

13644 16 **Quantitative evaluation method of lower limb multiparameter fusion based on BP neural network** [13644-13]

13644 17 **Large-scale mulched film mapping based on few-shot learning and Sentinel-2 satellite imagery** [13644-17]

13644 18 **Sensitivity analysis of shape optimization problems for the hemivariational inequality** [13644-44]

13644 19 **Deep learning spectrum sensing method based on univariate sampling algorithm optimization** [13644-7]

13644 1A **Combination of SVD and univariate sampling algorithm for single objective optimization problem** [13644-14]

DATA PROCESSING AND APPLICATION ANALYSIS

13644 1B **DIMIL: data augmentation with the help of significant instances for whole slide images classification** [13644-69]

13644 1C **Influence of subcell schemes on convergence properties of high-order CPR method with subcell-limiting in solving steady flow problems** [13644-32]

13644 1D **Hamiltonian isoenergy sets under Lorentzian metric** [13644-4]

13644 1E **Construction of optimal linear regression equation of quantities of daily 110 emergency cases and weather factors based on stepwise regression analysis** [13644-38]

13644 1F **Distributed multisensor track to track association algorithm based on improved clustering** [13644-67]

13644 1G **The generalized 3-connectivity of two kinds graphs** [13644-90]

13644 1H **Multistep time series prediction method integrating hidden Markov model and deep reinforcement learning** [13644-53]

13644 1I **Modeling of gas sensors based on particle swarm optimization combined with least squares support vector machine** [13644-50]

13644 1J **UAV Positioning system research program based on pure azimuth passive positioning technology** [13644-29]

13644 1K **ICEEMDAN-iTransformer: a short-term load forecasting model** [13644-22]

13644 1L **Wind power prediction method based on 1D convolutional layer and CatBoost** [13644-56]

13644 1M **On matching energies of the complements of graphs** [13644-24]

13644 1N **Dynamic optimization of emergency lane allocation: a noise-resilient multi-objective evolutionary framework for intelligent transportation systems** [13644-70]

13644 1O **Conditions for ($\mathbb{U}$,N)-implication to satisfy core rules of inference** [13644-16]

13644 1P **Damage identification algorithm for high-speed rail ballastless track fasteners based on random forest** [13644-82]

13644 1Q **Many-objective evolutionary optimization algorithm based on the Gaussian mixture models** [13644-60]

13644 1R **Atmospheric corrosion prediction and visualization of galvanized steel based on EFG-GCN** [13644-57]

13644 1S **Optimization algorithms for space target surveillance constellations: a survey and future directions** [13644-28]

13644 1T **Research on privacy-preserving logistic regression scheme based on homomorphic encryption** [13644-3]

13644 1U **Grid resource allocation strategy and algorithm based on economic principle** [13644-94]

13644 1V **Adaptive moment estimation optimization algorithm using projection gradient for deep learning** [13644-87]

13644 1W **Design of elevator control and monitoring system based on PLC and WinCC** [13644-93]

13644 1X **BTSEG-Nas: a neural network architecture search-based multimodal MRI segmentation network for brain tumors** [13644-35]
