Volume 13645

Proceedings of SPIE 0277-786X, V. 13645

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Frontiers of Traffic and Transportation Engineering (FTTE 2024)*, edited by Yi Zhou, Jianqing Wu, Proc. of SPIE 13645, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*
ix *Introduction*

INTELLIGENT TRANSPORTATION SYSTEM AND ARTIFICIAL INTELLIGENCE TECHNOLOGY

13645 02 **Application of system theoretic process analysis method in safety analysis of navigation-assisted driving system** [13645-37]

13645 03 **Energy saving research on frequency conversion simulation of ship central cooling water system** [13645-6]

13645 04 **An anonymous and lightweight authentication scheme for Internet of Vehicles** [13645-26]

13645 05 **A review on current status of electro-mechanical brake actuator for intelligent and electric vehicles** [13645-56]

13645 06 **Research on green synergistic development of urban traffic and land use based on the synergistic degree model of composite system** [13645-28]

13645 07 **Research on the resilience of urban bus networks based on Bayesian networks** [13645-47]

13645 08 **Research and application of an optimal route selection support system for highways in Zhejiang Province** [13645-18]

13645 09 **Integration of route updating and trajectory optimization for connected and automated vehicles on road networks** [13645-15]

13645 0A **Research on the site selection of emergency rescue take-off and landing sites based on GIS-AHP** [13645-34]

13645 0B **Passenger satisfaction evaluation and massmotion-based simulation of pedestrian flow in Wuhan Xujiapeng Station** [13645-7]

13645 0C **Computer interlocking system maintenance and troubleshooting** [13645-52]

13645 0D **Addressing inaccessible customers in the vehicle routing problem** [13645-29]

13645 0E **Research on the definition, connotation, and functional service boundary of the data brain in comprehensive transportation** [13645-59]

13645 0F **Edge intelligent vision for road disease detection** [13645-36]

13645 0G **Category identification of urban public transport commuter groups based on the DBSCAN clustering algorithm** [13645-63]

13645 0H **Analysis of the coupling and coordination between transport equity and regional economic development** [13645-53]

TRAFFIC FLOW DETECTION AND AUTOMATIC CONTROL

13645 0I **Research on the definition standard of long steep longitudinal slopes on mountainous highways: an empirical analysis based on accident data** [13645-19]

13645 0J **Research on parking brake fault reappearance of electric multiple unit** [13645-49]

13645 0K **Short-term traffic flow prediction based on improved Chimp algorithm optimized BiGRU** [13645-33]

13645 0L **Comprehensive method for determining the primary deformation monitoring indicators of ship lock head based on monitoring data** [13645-60]

13645 0M **Research on real-time traffic safety warning application based on expressway gantry big data** [13645-10]

13645 0N **Adaptive traffic signal control for road networks based on dueling double deep q-network** [13645-8]

13645 0O **Study on the spacing between urban arterial intersections and adjacent upstream access points** [13645-9]

13645 0P **Variable speed limit control method for highways based on an improved SAC algorithm** [13645-32]

13645 0Q **A tactile pedestrian signal control method based on yellow flashing** [13645-5]

13645 0R **Energy-optimization-based agent motion model: a hybrid approach integrating data-driven methods and trajectory prediction for intersection traffic simulation** [13645-27]

13645 0S **Research on drivers' risky driving based on extended planned behavior theory** [13645-4]

13645 0T **Calculation method of wheel/rail adhesion coefficient in complex operating environment** [13645-25]

13645 0U **Time-series prediction method for departure taxi delay situations at airports** [13645-3]

13645 0V **Research on the correction method for detecting the roughness of rural highway** [13645-21]

13645 0W **Using mobile phone signaling to analyze the impact of driving restriction on travel modes** [13645-35]

13645 0X **Temporal-spatial dependence-based method for ship traffic flow prediction in wind farms water area** [13645-58]

13645 0Y **Modelling the impact of conversion of trunk roads into expressway on the operational efficiency of road network** [13645-22]

13645 0Z **Electric bicycle-motor vehicle conflict assessment method based on maximum remaining reaction time** [13645-17]

13645 10 **Differential analysis of active safety test in China based on traffic accident data** [13645-41]

13645 11 **A study on logarithmic convergence law smooth mode control of magnetic levitation train levitation system** [13645-14]

INTELLIGENT TRAFFIC MANAGEMENT AND TRANSPORTATION PATH OPTIMIZATION

13645 12 **Study on control method of ships passing through the mouth area of curved branching channel in mountainous areas** [13645-42]

13645 13 **A study on lane change trajectory planning methods considering driving styles** [13645-20]

13645 14 **Research on the whole process management of railway construction materials based on unified coding system** [13645-12]

13645 15 **ArcGIS-based evaluation of the comprehensive synergy of multi-modal public transportation in Lanzhou** [13645-13]

13645 16 **Method for vehicle route planning in large-scale construction sites based on low-density floating car data** [13645-44]

13645 17 **Dynamic management and control strategy for reusing bus lanes under intelligent connected and mixed traffic flows** [13645-24]

13645 18 **Research on the monitoring management model for hazardous chemical transport vehicles in Muzhailing Tunnel** [13645-23]

13645 19 **Optimization strategies for batch distribution processes at logistics transit station** [13645-61]

13645 1A **Research and verification of ship navigation simulation method in complex curved river** [13645-45]

13645 1B **Research on the optimization of the scheduling of grain carrier fleets for dry bulk companies considering dynamic demand** [13645-39]

13645 1C **Research on maintenance strategies and quality control for key components of electric train bogies** [13645-62]

13645 1D **Research on the adjustment and optimization of regular bus lines and stops along Nantong metro line 1** [13645-51]

13645 1E **Research on steering control strategies and methods for tractor and semi-trailer** [13645-55]

13645 1F **Station passenger flow evacuation method based on social force model and improved Dijkstra algorithm** [13645-31]

13645 1G **A novel scheduling method for airport shuttle bus based on simultaneous pickup and delivery services** [13645-46]

13645 1H **Split-delivery-based collaborative delivery routing problem of trucks and drones in emergency rescue scenarios** [13645-43]
