SPIE

Volume 13647

Proceedings of SPIE 0277-786X, V. 13647

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Third Conference on Space, Atmosphere, Marine, and Environmental Optics (SAME 2025)*, edited by Dong Liu, Shuo Shi, Proc. of SPIE 13647, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

THIRD CONFERENCE ON SPACE, ATMOSPHERE, MARINE, AND ENVIRONMENTAL OPTICS (SAME 2025)

- 13647 02 **Planning a lunar long-term research station in Mare Smythii** [13647-1]
- 13647 03 **Research on correction of tilt aberration in atmospheric transmission of array laser** [13647-3]
- 13647 04 **Step-by-step detection of co-phase errors for Golay6 optical sparse aperture via deep learning** [13647-5]
- 13647 05 **Research on structural analysis and improvement of telescope for space gravitational wave detection** [13647-6]
- 13647 06 **Lattice-and-skin 3D printing high lightweight support structure for long strip space mirror** [13647-9]
- 13647 07 **Research on structural optimization and performance improvement of photoacoustic cells** [13647-10]
- 13647 08 **Research on structural design of a novel kind of lens for space laser communication** [13647-11]
- 13647 09 **Research on the aerothermal effect of optical windows under the influence of turbulence** [13647-12]
- 13647 0A **Deep learning method in wavefront detection** [13647-14]
- 13647 0B **Measurements of total organic nitrates by thermal dissociation broadband cavity-enhanced absorption spectroscopy** [13647-15]
- 13647 0C **Research on rapid detection of BOD in marine water quality based on fluorescence spectroscopy technology** [13647-16]
- 13647 0D **Advances in the next-generation infrared high-quantitative multi-spectral imager technology** [13647-17]
- 13647 0E **Research on fast prediction method for far-field spot characteristic parameters in laser atmospheric propagation** [13647-21]
- 13647 0F **Research on error analysis and correction of intensity modulation spectral polarization technology** [13647-26]

- 13647 OG **Research on wavefront correction for atmospheric turbulence based on model-free optimization algorithms [13647-27]**
- 13647 OH **Research on dynamic image quality testing methods for space astronomical telescopes [13647-28]**
- 13647 OI **Differential single-pixel video and audio recording via a rotating encoded disk [13647-35]**
- 13647 OJ **Infrared turbulence-degraded image simulation based on atmospheric optical turbulence transmission characteristics [13647-37]**
- 13647 OK **Spaceborne high-spectral-resolution lidar ACDL/DQ-1 retrieval and classification of the dust and smoke aerosols [13647-39]**
- 13647 OL **High-repetition-frequency lidar echo signal acquisition technology for enhanced fire monitoring [13647-41]**
- 13647 OM **Research on denoising of second harmonic signal in LITES based on TVF-EMD-WTD method [13647-42]**
- 13647 ON **Dual-modal detection of seawater dissolved organic matter using fluorescence imaging processing and absorbance spectroscopy [13647-43]**
- 13647 OO **Design of a large-aperture cryogenic very long-wave infrared reflective optical system [13647-44]**
- 13647 OP **Research on detection limits of UAV-based oceanic lidar [13647-45]**
- 13647 OQ **Joint optimization design of optical sparse aperture layout and image restoration under atmospheric turbulence [13647-48]**
- 13647 OR **Construction and analysis of statistical models for laser power density in bucket [13647-50]**
- 13647 OS **Lightweight design and performance analysis of cordierite reflective mirror [13647-51]**
- 13647 OT **Dynamic modeling and analysis of aerosol scale height based on multiple meteorological factors [13647-52]**
- 13647 OU **Design of a virtual impactor aimed at inertial classification of bioaerosols [13647-54]**
- 13647 OV **A method for polarization detection and property identification of fine particulate matter based on LSTM [13647-63]**
- 13647 OW **The motion trajectories of aerosol particles based on TOPS and the experimental verification thereof [13647-64]**
- 13647 OX **Design of cascaded microfluidic chip for inertial sorting of atmospheric aerosol particles [13647-71]**

- 13647 0Y **Optical hygroscopic growth characterization of pollen aerosol particles based on FDTD**
[13647-72]
- 13647 0Z **Research on spatiotemporal sequence prediction of air quality parameters in Hefei area
based on multi-model comparative analysis** [13647-73]
- 13647 10 **Design of a surface acoustic wave-driven microfluidic chip for aerosol particle sorting**
[13647-76]
- 13647 11 **Single-pixel imaging and ranging via rotating encoding patterns** [13647-77]
- 13647 12 **Design of support structure for large aspect ratio reflectors with restricted complex optical
paths** [13647-80]
- 13647 13 **Analysis of a lightweight active optics mirror with a multi-sensor fusion unit** [13647-81]
- 13647 14 **Vibration amplitude enhanced quartz tuning fork photoacoustic spectroscopy sensor**
[13647-82]
- 13647 15 **Highly sensitive photoacoustic spectroscopy for trace acetylene gas detection employing
a 1.53- μm laser diode** [13647-83]
- 13647 16 **Modelling disturbance rejection performance of a space platform for active optics system**
[13647-84]
- 13647 17 **A droplet microfluidic chip for in-situ bioaerosol sampling and detection** [13647-86]
- 13647 18 **Ultra-sensitive CH_4 monitoring using QEPAS and a 3.3- μm interband cascade laser**
[13647-89]
